Bringing Groundwater Quality Research to the Watershed Scale

Edited by

NEIL R. THOMSON

Department of Civil Engineering, University of Waterloo, Canada

IAHS Publication 297

in the IAHS Series of Proceedings and Reports
Contents

Preface by Neil R. Thomson & James F. Barker  v

1  Groundwater Quality

A global inventory of groundwater quality: first results Jasper Griffioen, Rianne Brunt, Slavek Vasak & Jac Van Der Gun  3

Groundwater quality in Canada: a national overview Suzanne Lesage  11

Cumulative factors affecting groundwater quality in domestic wells in Finland Kirsti Korkka-Niemi  19

Urbanization of rural watersheds in the region of Waterloo: implications for water quality Randy L. Stotler, Jon Paul Jones, Shaun K. Frape, Robert J. Drimmie, Craig T. Johnston & Ian Judd-Henry  29

Burial sites and their impact on groundwater Julian Trick, Ben Klinck, Patricia Coombs, Dave Noy & Geoff Williams  36

Quality of water from hand-dug wells, boreholes, and streams in two localities in southwest Nigeria: implications for incidence of water borne diseases Samson Ayanlaja, O. O. Kehinde-Phillips, Francis Ogunkolo, Bunmi Dada & B. A. Senjobi  44

Groundwater quality trend detection at the regional scale: effects of spatial and temporal variability H. P. Broers, J. Rozemeijer, M. Van De Aa, B. Van Der Grift & E. A. Buijs  50

2  Contaminant Input Processes

Evaluating diffuse groundwater pollution trends—a key challenge for the new EC water directives Stephen Foster  63

Indicators for assessing transport of oil sands process-affected waters Michael MacKinnon, Grey Kampala, Bill Marsh, Phil Fedorak & Selma Guigard  71

Herbicide runoff on a pastoral hill slope—a case study Karin Müller, Roland Stenger & Anis Rahman  81

Dynamics of groundwater recharge through structured soils and the influence on water quality Edwin Cey, David Rudolph & René Therrien  89

Assessing water travel times during riverbank filtration Melissa Dawe & Kerry MacQuarrie  97
Investigating surface water–groundwater interactions with the help of sewage indicators in Berlin, Germany  
Gudrun Massmann, Uwe Dünnbier, Janek Greskowiak, Andrea Knappe & Asaf Pekdeger  

Fate and transport of phage as surrogates for viral pathogens in UK aquifers  
Eadaoin Joyce, Katie Collins, Aidan Cronin, Joerg Rueedi, Steve Pedley, Alwyn Hart, John Tellam & Richard Greswell  

Effects of macropore flow on solute transport in a vadoze zone under repetitive rainfall events  
Fumi Sugita, Tokuo Kishii & Michael English  

Factors controlling the chemistry of shallow groundwater in different geological and hydrological environments  
Irén Varsányi, Hélène Pauwels & Lajos Ö.Kovács  

Impact of a polluted stream on its adjacent aquifer: the case of the Alamar zone, Tijuana, Mexico  
Fernando T. Wakida, Luis E. Ponce-Serrano, Eulalia Mondragon-Silva, E. Garcia-Flores, David N. Lerner & Guillermo Rodríguez-Ventura  

The influence of relative permeability heterogeneity on DNAPL releases  
G. P. Grant, J. I. Gerhard & B. H. Kueper  

3 Site Characterization  

Characterization of Quaternary gravel aquifers and their implementation in hydrogeological models  
Uli Maier, Andreas Becht, Boris Kostic, Claudius Bürger, Peter Bayer, Georg Teutsch & Peter Dietrich  

Geostatistical evaluation of high frequency hydraulic property and groundwater quality data collected by the Waterloo Profiler  
Shane McDonald, Jeff Groncki & Susanne Biteman  

Quantification of PCE mass flow rates for source zone identification  
Sebastian Bauer, Marti Bayer-Raich, Christian Kolesar, Dietmar Müller, Thomas Holder & Thomas Ptak  

Characterization of transport processes in a heterogeneous aquifer using electrical resistivity tomography (ERT)  
Kerstin Müller, Jan Vanderborgh, Andreas Englert, Andreas Kemna & Harry Vereecken  

Contaminant retardation by double-porosity diffusive exchange in the Chalk: implications for monitoring  
William Burgess, John Barker, Sally Watson & Ben Fretwell  

Real and apparent thickness relationship for gasoline and gasohol contamination  
Alexandra Finotti, Nelson Caicedo, Everton De Oliveira & José Luiz Zoby
Detection and characterization of a vinyl chloride plume inside an urbanized area

Alessandro Gargini & Monica Pasini

Wettability effects on the natural remobilization of mixed DNAPL pools

James W. Roy, James E. Smith & Robert W. Gillham

4 Management and Decision Making

Impacts of changing agricultural land-use practices on municipal groundwater quality: Woodstock, Ontario

Claus P. Haslauer, David L. Rudolph, Neil R. Thomson, Rob Walton & Margaret Misek-Evans

Developing a farm wellhead protection plan

Hugh Simpson & James Myslik

Managing basin-wide groundwater quality changes resulting from enhanced groundwater recharge programs

N. Thomas Sheahan, W. Greg Hamer & David S. Gould

Risk-based design of cost-efficient remediation strategies at megasites

Fabio Serapiglia, Judith Sievers & Michael Finkel

IMS—A risk-based management approach for megasites, example Bitterfeld megasite, Germany

Jochen Großmann, Judith Sievers, Anje Ritter & Martin Keil

Macro and micro scale evaluation of contaminant plumes at Aberdeen Proving Ground

Donald J. Green

5 Natural Attenuation Processes and Applications

STReN: Site for innovative research on monitored natural attenuation

Assessing measurements of first-order degradation rates through the virtual aquifer approach

Sebastian Bauer, Christof Beyer & Olaf Kolditz

Investigations of a large TCE plume discharging to surface water

Steven Chapman, Beth Parker & John Cherry

Assessment of stable carbon isotopes as a tool for assessing MTBE biodegradation at a field site

Luis E. Lesser, Gerard Spinnler, Paul C. Johnson & Ramon Aravena

Natural attenuation of volatile hydrocarbons in the unsaturated zone—modelling for the Værløse field site

Uli Maier, Uli Mayer & Peter Grathwohl
Fate and transport of naphthenic acids in groundwater  
Francoise Gervais & James Barker  

Wetlands as natural reactive barriers: the hydrological and geomorphological landscape perspective  
Seiichiro Ioka & Norio Tase  

Steady state plumes: transverse mixing in aquifers, numerical experiments and field scale predictions for natural attenuation  
Uli Maier, Hermann Rügner & Peter Grathwohl  

Modelling a controlled-sourced, multichemical plume undergoing natural attenuation  
Caitlin Martin, Hugh McCreadie, John W. Molson & Jim Barker  

Tracing landfill leachate impacts on groundwater using DOC geochemistry and δ13C measurements  
Hossein Mohammadzadeh, Ian Clark & Gilles St-Jean  

Natural attenuation of N-S-O heteroaromatic compounds in groundwater: chemical analyses, reactive transport experiments and field studies  
Matthias Piepenbrink, Martina Krüger, Thomas Ptak & Peter Grathwohl  

6  
**In Situ Remediation**  

*In situ* groundwater clean-up of MTBE by photocatalysis  
May Chan, Alex Orlov, Richard Lambert & Rod Lynch  

Spatial variations in MTBE-biodegradation activity near a biobarrier in Port Hueneme, California  
Luis E. Lesser & Paul C. Johnson  

Sequential reactive barrier remediation of ammonium-contaminated groundwater using polymer mats  
Bradley M. Patterson, Michelle E. Grassi, Blair Robertson, Gregory B. Davis & Allan J. McKinley  

Separating the kinetic and sorption parameters of nitroaromatic compounds in contact with granular iron  
Melissa Marietta & John F. Devlin  

Investigation of the performance of organic carbon permeable reactive barriers using dissolved gas analysis  
Randi L. Williams, K. Ulrich Mayer, Rich T. Amos, David W. Blowes & Carol J. Ptacek  

Adsorption of natural organic matter and its effects on TCE degradation by iron PRBs  
Stefano Marconetto, Lai Gui & Robert Gillham  

*In situ* chemical oxidation test of organic solvents with potassium permanganate  
Salvador Jordana, Jordi Guimerà, Josep A. Domèneck & Josep M. Subirana  

A meso-scale constructed wetland for the remediation of chlorobenzene contaminated groundwater  
Arno Kaschl, Andrea Schultz, Carsten Vogt, Falk Dorusch, Peter Popp, Helko Borsdorf, Eberhard Küster, Peter Kuschk, Matthias Kästner & Holger Weiß
## Contents

On-site landfill leachate management in a headwater catchment  *Brian Beatty & Joanne Thompson*  

Surfactant enhanced air sparging in Borden sand  *Gordon H. Brown, Michael D. Annable, Jaehyun Cho & Heonki Kim*  

Remediation of bromate contaminated groundwater  *Ray Butler, E. Cartmell, A. Godley & L. Lytton*  

Remediation of groundwater contaminated by trichloroethylene using groundwater extraction and effects of natural attenuation  *Nobuyuki Egusa, Tatemasa Hirata, Masanori Yoshioka & Osami Nakasugi*  

### 7 Flow and Transport Modelling  

Pesticide transport in groundwater at the national scale: coupling an unsaturated zone model with a groundwater flow model  *Aaldrik Tiktak, Ton Van Der Linden & Gerard Uffink*  

Stochastic modelling of well head protection zones in highly heterogeneous aquifers  *Monica Riva, Laura Guadagnini, Eugeniu Martac & Thomas Ptak*  

An adaptive hybrid method of characteristics technique for solving solute transport problems  *Jianmei Cheng, Danhong Huang & Jianming Chen*  

Modelling groundwater/surface water interactions using MODFLOW-WhaT  *R. Brad Thoms & R. L. Johnson*  

A fully-coupled approach to evaluate the effectiveness of tile-drain systems to control drainage water and salinity  *George B. Matanga, Claire Jacquemin & Don Demarco*  

How old is the water? Simulating groundwater age at the watershed scale  *J. W. Molson & E. O. Frind*  

Large-scale groundwater flow and transport modelling: methodology and application to the Meuse Basin, Belgium  *Philippé Orban, Serge Brouyere, Horatiu Corbeanu & Alain Dassargues*  

Delineation of well head protection areas for wells in Urmia Plain, Iran, using WhAEM2000  *K. Badv & M. Deriszadeh*  

Surface and groundwater qualities in an urbanized catchment: scenario from a developing country  *Moshood N. Tijani & Shin-Ichi Onodera*  

Applying a laboratory-scale biodegradation concept to model field-scale reactive transport with advanced numerical methods  *Sascha E. Oswald, Ian A. Watson, Roger S. Crouch & Steven A. Banwart*
