Anaerobic Digestion X

Selected Proceedings of the 10th IWA Congress on Anaerobic Digestion, held in Montreal, Canada, 29 August – 2 September 2004

Issue Editors: Serge R. Guiot*, Spyros G. Pavlostathis** and Jules B. van Lier***
* Biotechnology Research Institute, National Research Council Canada, Montreal (Québec) H4P 2R2 Canada
** School of Civil and Environmental Engineering, Georgia Institute of Technology, Atlanta, GA 30332-0512, USA
*** Environmental Technology, Wageningen University, P.O.Box 8129, 6700 EV Wageningen, The Netherlands
Contents

Preface

Plenary and keynote papers
1 The anaerobic treatment approach towards a more sustainable and robust environmental protection G. Lettinga
13 Metabolic interactions in methanogenic and sulfate-reducing bioreactors A.J.M. Stams, C.M. Plugge, F.A.M. de Bok, B.H.G.W. van Houten, P. Lens, H. Dijkman and J. Weijma
21 Fundamentals of the fermentative production of hydrogen P.C. Hallenbeck
31 Simultaneous wastewater treatment and biological electricity generation B.E. Logan
39 Anaerobic digestion: impact of future greenhouse gases mitigation policies on methane generation and usage P.F. Greenfield and D.J. Batstone
49 Integrated energy production and reduction of the environmental impact at alcohol distillery plants A.C. van Haandel

Microbial ecology
73 Microbial characteristics of a methanogenic phenol-degrading sludge T. Zhang, S.Z. Ke, Y. Liu and H.P. Fang
79 Behavior of cellulose-degrading bacteria in thermophilic anaerobic digestion process K. Syutsubo, Y. Nagaya, S. Sakai and A. Miya
85 Analysis of community structures in anaerobic processes using a quantitative real-time PCR method Y. Yu, C. Lee and S. Hwang
93 Hygienization by anaerobic digestion: comparison between evaluation by cultivation and quantitative real-time PCR M. Lebuhn, M. Effenberger, G. Garcés, A. Gronauer and P.A. Wilderer
107 Sequence-specific cleavage of 16S rRNA for rapid and quantitative detection of particular groups of anaerobes in bioreactors Y. Sekiguchi, Y. Uyeno, A. Sunaga, H. Yoshida and Y. Kamagata

Hydrogen
115 Start-up of bio-hydrogen production reactor seeded with sewage sludge and its microbial community analysis M.L. Gong, N.Q. Ren and D.F. Xing

</table>
Leachate pre-treatment strategies before recirculation in landfill bioreactors
V. Vigneron, T. Bouchez, C. Bureau, N. Mailly, L. Mazeas, C. Duquennoi, J.M. Audic,
I. Hébé and N. Bernet

Domestic wastewater

The effect of operational conditions on the performance of UASB reactors for
domestic wastewater treatment
R.C. Leitão, J.A. Silva-Filho, W. Sanders,
A.C. van Haandel, G. Zeeman and G. Lettinga

Performance of UASB septic tank for treatment of concentrated black water
within DESAR concept
K. Kujawa-Roeleveld, T. Fernandes, Y. Wiryawan, A. Tawfik,
M. Visser and G. Zeeman

Treatment of municipal wastewater UASB reactor effluent by unconventional
flotation and UV disinfection
F. Tessele, L.O. Montegia and J. Rubio

A low-cost municipal sewage treatment system with a combination of UASB and
the "fourth-generation" downflow hanging sponge reactors
M. Tandukar,
S. Uemura, I. Machdar, A. Ohashi and H. Harada

Industrial wastewater treatment and bioremediation

Phosphate inhibition on thermophilic acetoclastic methanogens: a warning
P.L. Paulo, A.B. dos Santos, C.N. Ide and G. Lettinga

Comparison of chemo-, hetero- and mixotrophic denitrification in laboratory-
scale UASBs
R. Sierra-Alvarez, F. Guerrero, P. Rowlette, S. Freeman and J.A. Field

Anaerobic biodegradability of Tween surfactants used as a carbon source for the
microbial reductive dechlorination of hexachlorobenzene
D.H. Yeh and
S.G. Pavlostathis

Reductive decolourisation of azo dyes by mesophilic and thermophilic
methanogenic consortia
F.J. Cervantes, A.B. dos Santos, M.P. de Madrid,
A.J.M. Stams and J.B. van Lier

Anaerobic transformation of tetrachloroethane, perchloroethylene, and their
mixtures by mixed-cultures enriched from contaminated soils and sediments
F. Aulenta, A. Fina, M. Potalivo, M. Petrangelii Papini, S. Rossetti and M. Majone

Thermophilic treatment by anaerobic granular sludge as an effective approach to
accelerate the electron transfer and improve the reductive decolorization of azo
dyes in bioreactors
A.B. dos Santos, J. Traverse, F.J. Cervantes and J.B. van Lier

Microbial sulphate reduction during anaerobic digestion: EGSB process
performance and potential for nitrite suppression of SRB activity
C. O'Reilly and
E. Colleran

Anaerobic biodecolorization of textile reactive anthraquinone and
phthalocyanine dyebaths under hypersaline conditions
Y.H. Lee, R.D. Matthews
and S.G. Pavlostathis

Treatment of a low concentration industrial chemicals mixture in an UASB
reactor
P. Castilla, A. Leyva, U. Garcia, O. Monroy and M. Meraz

Phenolic refinery wastewater biodegradation by an expanded granular sludge
bed reactor
F.J. Almendariz, M. Meraz, A.D. Olmos and O. Monroy

Waste sizing solution as co-substrate for anaerobic decolourisation of textile
dyeing wastewaters
I. Bisschops, A.B. dos Santos and H. Spanjers

UASB treatment of liquid residues from grass bioraffination
U. Baier and
P. Delavy

Modelling, control and instrumentation

Characterisation of high-rate acidogenesis processes using a titration and
off-gas analysis sensor
C. Wangnai, R.J. Zeng and J. Keller

Kinetic parameters estimation in an anaerobic digestion process using
successive quadratic programming
C.A. Aceves-Lara, E. Aguilar-Garnica,
Modular expert system for the diagnosis of operating conditions of industrial anaerobic digestion plants

Factors affecting measurement of specific methanogenic activity

Effect of co-substrate, biomass and sulfate concentration on the performance of a control strategy used to determine the anaerobic stage length of an anaerobic/aerobic SBR degrading p-nitrophenol

Robust interval-based regulation for anaerobic digestion processes

An integrated system to remote monitor and control anaerobic wastewater treatment plants through the internet

Multi-wavelength fluorometry for anaerobic digestion process monitoring

Automated equipment for anaerobic sludge parameters determination

Application of the IWA Anaerobic Digestion Model (ADM1) for simulating full-scale anaerobic sewage sludge digestion

Continuity-based interfacing of models for wastewater systems described by Petersen matrices

Multidimensional modelling of anaerobic granules

Effect of inoculum and sludge concentration on viscosity evolution of anaerobic granular sludges

Technical development and sustainability

Continuous microbial fuel cells convert carbohydrates to electricity

Thermophilic anaerobic digester with ultrafilter for solids stabilization

Anaerobic digestion of slaughterhouse waste with UF-membrane separation and recycling of permeate after free ammonia stripping

Flow pattern visualization in a mimic anaerobic digester: experimental and computational studies

Minimization of greenhouse gas emission by application of anaerobic digestion process with biogas utilization

Assessing the environmental burdens of anaerobic digestion in comparison to alternative options for managing the biodegradable fraction of municipal solid wastes

Anaerobic digestion as a sustainable solution for biosolids management by the Montreal Metropolitan Community
