Contents

1 Introduction
1.1 Intertemporal Incentives 1
1.2 The Prisoners' Dilemma 3
1.3 Oligopoly 4
1.4 The Prisoner's Dilemma under Imperfect Monitoring 5
1.5 The Product-Choice Game 7
1.6 Discussion 8
1.7 A Reader's Guide 10
1.8 The Scope of the Book 10

Games with Perfect Monitoring

2 The Basic Structure of Repeated Games with Perfect Monitoring 15
2.1 The Canonical Repeated Game 15
2.1.1 The Stage Game 15
2.1.2 Public Correlation 17
2.1.3 The Repeated Game 19
2.1.4 Subgame-Perfect Equilibrium of the Repeated Game 22
2.2 The One-Shot Deviation Principle 24
2.3 Automaton Representations of Strategy Profiles 29
2.4 Credible Continuation Promises 32
2.5 Generating Equilibria 37
2.5.1 Constructing Equilibria: Self-Generation 37
2.5.2 Example: Mutual Effort 40
2.5.3 Example: The Folk Theorem 41
2.5.4 Example: Constructing Equilibria for Low $\delta$ 44
2.5.5 Example: Failure of Monotonicity 46
2.5.6 Example: Public Correlation 49
2.6 Constructing Equilibria: Simple Strategies and Penal Codes 51
2.6.1 Simple Strategies and Penal Codes 51
2.6.2 Example: Oligopoly 54
2.7 Long-Lived and Short-Lived Players 61
2.7.1 Minmax Payoffs 63
2.7.2 Constraints on Payoffs 66
3 The Folk Theorem with Perfect Monitoring

3.1 Examples
3.2 Interpreting the Folk Theorem
   3.2.1 Implications
   3.2.2 Patient Players
   3.2.3 Patience and Incentives
   3.2.4 Observable Mixtures
3.3 The Pure-Action Folk Theorem for Two Players
3.4 The Folk Theorem with More than Two Players
   3.4.1 A Counterexample
   3.4.2 Player-Specific Punishments
3.5 Non-Equivalent Utilities
3.6 Long-Lived and Short-Lived Players
3.7 Convexifying the Equilibrium Payoff Set Without Public Correlation
3.8 Mixed-Action Individual Rationality

4 How Long Is Forever?

4.1 Is the Horizon Ever Infinite?
4.2 Uncertain Horizons
4.3 Declining Discount Factors
4.4 Finitely Repeated Games
4.5 Approximate Equilibria
4.6 Renegotiation
   4.6.1 Finitely Repeated Games
   4.6.2 Infinitely Repeated Games

5 Variations on the Game

5.1 Random Matching
   5.1.1 Public Histories
   5.1.2 Personal Histories
5.2 Relationships in Context
   5.2.1 A Frictionless Market
   5.2.2 Future Benefits
   5.2.3 Adverse Selection
   5.2.4 Starting Small
5.3 Multimarket Interactions
5.4 Repeated Extensive Forms
   5.4.1 Repeated Extensive-Form Games Have More Subgames
   5.4.2 Player-Specific Punishments in Repeated Extensive-Form Games
   5.4.3 Extensive-Form Games and Imperfect Monitoring
   5.4.4 Extensive-Form Games and Weak Individual Rationality
   5.4.5 Asynchronous Moves
   5.4.6 Simple Strategies
5.5 Dynamic Games: Introduction 174
  5.5.1 The Game 175
  5.5.2 Markov Equilibrium 177
  5.5.3 Examples 178
5.6 Dynamic Games: Foundations 186
  5.6.1 Consistent Partitions 187
  5.6.2 Coherent Consistency 188
  5.6.3 Markov Equilibrium 190
5.7 Dynamic Games: Equilibrium 192
  5.7.1 The Structure of Equilibria 192
  5.7.2 A Folk Theorem 195

6 Applications 201
  6.1 Price Wars 201
    6.1.1 Independent Price Shocks 201
    6.1.2 Correlated Price Shocks 203
  6.2 Time Consistency 204
    6.2.1 The Stage Game 204
    6.2.2 Equilibrium, Commitment, and Time Consistency 206
    6.2.3 The Infinitely Repeated Game 207
  6.3 Risk Sharing 208
    6.3.1 The Economy 209
    6.3.2 Full Insurance Allocations 210
    6.3.3 Partial Insurance 212
    6.3.4 Consumption Dynamics 213
    6.3.5 Intertemporal Consumption Sensitivity 219

7 The Basic Structure of Repeated Games with Imperfect Public Monitoring 225
  7.1 The Canonical Repeated Game 225
    7.1.1 The Stage Game 225
    7.1.2 The Repeated Game 226
    7.1.3 Recovering a Recursive Structure: Public Strategies and Perfect Public Equilibria 228
  7.2 A Repeated Prisoners' Dilemma Example 232
    7.2.1 Punishments Happen 233
    7.2.2 Forgiving Strategies 235
    7.2.3 Strongly Symmetric Behavior Implies Inefficiency 239
  7.3 Decomposability and Self-Generation 241
  7.4 The Impact of Increased Precision 249
  7.5 The Bang-Bang Result 251
## 7.6 An Example with Short-Lived Players
- **7.6.1 Perfect Monitoring**
- **7.6.2 Imperfect Public Monitoring of the Long-Lived Player**

## 7.7 The Repeated Prisoners' Dilemma Redux
- **7.7.1 Symmetric Inefficiency Revisited**
- **7.7.2 Enforcing a Mixed-Action Profile**

## 7.8 Anonymous Players

## 8 Bounding Perfect Public Equilibrium Payoffs
- **8.1 Decomposing on Half-Spaces**
- **8.2 The Inefficiency of Strongly Symmetric Equilibria**
- **8.3 Short-Lived Players**
  - **8.3.1 The Upper Bound on Payoffs**
  - **8.3.2 Binding Moral Hazard**
- **8.4 The Prisoners' Dilemma**
  - **8.4.1 Bounds on Efficiency: Pure Actions**
  - **8.4.2 Bounds on Efficiency: Mixed Actions**
  - **8.4.3 A Characterization with Two Signals**
  - **8.4.4 Efficiency with Three Signals**
  - **8.4.5 Efficient Asymmetry**

## 9 The Folk Theorem with Imperfect Public Monitoring
- **9.1 Characterizing the Limit Set of PPE Payoffs**
- **9.2 The Rank Conditions and a Public Monitoring Folk Theorem**
- **9.3 Perfect Monitoring Characterizations**
  - **9.3.1 The Folk Theorem with Long-Lived Players**
  - **9.3.2 Long-Lived and Short-Lived Players**
- **9.4 Enforceability and Identifiability**
- **9.5 Games with a Product Structure**
- **9.6 Repeated Extensive-Form Games**
- **9.7 Games of Symmetric Incomplete Information**
  - **9.7.1 Equilibrium**
  - **9.7.2 A Folk Theorem**
- **9.8 Short Period Length**

## 10 Private Strategies in Games with Imperfect Public Monitoring
- **10.1 Sequential Equilibrium**
- **10.2 A Reduced-Form Example**
  - **10.2.1 Pure Strategies**
  - **10.2.2 Public Correlation**
  - **10.2.3 Mixed Public Strategies**
  - **10.2.4 Private Strategies**
- **10.3 Two-Period Examples**
  - **10.3.1 Equilibrium Punishments Need Not Be Equilibria**
  - **10.3.2 Payoffs by Correlation**
  - **10.3.3 Inconsistent Beliefs**
10.4 An Infinitely Repeated Prisoner’s Dilemma 340
10.4.1 Public Transitions 340
10.4.2 An Infinitely Repeated Prisoners’ Dilemma: Indifference 343

11 Applications 347
11.1 Oligopoly with Imperfect Monitoring 347
11.1.1 The Game 347
11.1.2 Optimal Collusion 348
11.1.3 Which News Is Bad News? 350
11.1.4 Imperfect Collusion 352
11.2 Repeated Adverse Selection 354
11.2.1 General Structure 354
11.2.2 An Oligopoly with Private Costs: The Game 355
11.2.3 A Uniform-Price Equilibrium 356
11.2.4 A Stationary-Outcome Separating Equilibrium 357
11.2.5 Efficiency 359
11.2.6 Nonstationary-Outcome Equilibria 360
11.3 Risk Sharing 365
11.4 Principal-Agent Problems 370
11.4.1 Hidden Actions 370
11.4.2 Incomplete Contracts: The Stage Game 371
11.4.3 Incomplete Contracts: The Repeated Game 372
11.4.4 Risk Aversion: The Stage Game 374
11.4.5 Risk Aversion: Review Strategies in the Repeated Game 375

Games with Private Monitoring

12 Private Monitoring 385
12.1 A Two-Period Example 385
12.1.1 Almost Public Monitoring 387
12.1.2 Conditionally Independent Monitoring 389
12.1.3 Intertemporal Incentives from Second-Period Randomization 392
12.2 Private Monitoring Games: Basic Structure 394
12.3 Almost Public Monitoring: Robustness in the Infinitely Repeated Prisoner’s Dilemma 397
12.3.1 The Forgiving Profile 398
12.3.2 Grim Trigger 400
12.4 Independent Monitoring: A Belief-Based Equilibrium for the Infinitely Repeated Prisoner’s Dilemma 404
12.5 A Belief-Free Example 410

13 Almost Public Monitoring Games 415
13.1 When Is Monitoring Almost Public? 415
13.2 Nearby Games with Almost Public Monitoring 418
13.2.1 Payoffs 418
13.2.2 Continuation Values 419
13.2.3 Best Responses 421
13.2.4 Equilibrium 421

13.3 Public Profiles with Bounded Recall 423

13.4 Failure of Coordination under Unbounded Recall 425
  13.4.1 Examples 425
  13.4.2 Incentives to Deviate 427
  13.4.3 Separating Profiles 428
  13.4.4 Rich Monitoring 432
  13.4.5 Coordination Failure 434

13.5 Patient Players 434
  13.5.1 Patient Strictness 435
  13.5.2 Equilibria in Nearby Games 437

13.6 A Folk Theorem 441

14 Belief-Free Equilibria in Private Monitoring Games 445
  14.1 Definition and Examples 445
    14.1.1 Repeated Prisoners' Dilemma with Perfect Monitoring 447
    14.1.2 Repeated Prisoners' Dilemma with Private Monitoring 451
  14.2 Strong Self-Generation 453

Part IV Reputations 459

15 Reputations with Short-Lived Players 459
  15.1 The Adverse Selection Approach to Reputations 459
  15.2 Commitment Types 463
  15.3 Perfect Monitoring Games 466
    15.3.1 Building a Reputation 470
    15.3.2 The Reputation Bound 474
    15.3.3 An Example: Time Consistency 477
  15.4 Imperfect Monitoring Games 478
    15.4.1 Stackelberg Payoffs 480
    15.4.2 The Reputation Bound 484
    15.4.3 Small Players with Idiosyncratic Signals 492
  15.5 Temporary Reputations 493
    15.5.1 Asymptotic Beliefs 494
    15.5.2 Uniformly Disappearing Reputations 496
    15.5.3 Asymptotic Equilibrium Play 497
  15.6 Temporary Reputations: The Proof of Proposition 15.5.1 500
    15.6.1 Player 2's Posterior Beliefs 500
    15.6.2 Player 2's Beliefs about Her Future Behavior 502
### 15.6.3 Player 1's Beliefs about Player 2's Future Behavior

503

#### 16 Reputations with Long-Lived Players

16.1 The Basic Issue
511

16.2 Perfect Monitoring and Minmax-Action Reputations
515

16.2.1 Minmax-Action Types and Conflicting Interests
515

16.2.2 Examples
518

16.2.3 Two-Sided Incomplete Information
520

16.3 Weaker Reputations for Any Action
521

16.4 Imperfect Public Monitoring
524

16.5 Commitment Types Who Punish
531

16.6 Equal Discount Factors
533

16.6.1 Example 1: Common Interests
534

16.6.2 Example 2: Conflicting Interests
537

16.6.3 Example 3: Strictly Dominant Action Games
540

16.6.4 Example 4: Strictly Conflicting Interests
541

16.6.5 Bounded Recall
544

16.6.6 Reputations and Bargaining
546

16.7 Temporary Reputations
547

### 17 Finitely Repeated Games

17.1 The Chain Store Game
550

17.2 The Prisoners' Dilemma
554

17.3 The Product-Choice Game
560

17.3.1 The Last Period
562

17.3.2 The First Period, Player 1
562

17.3.3 The First Period, Player 2
565

### 18 Modeling Reputations

18.1 An Alternative Model of Reputations
568

18.1.1 Modeling Reputations
568

18.1.2 The Market
570

18.1.3 Reputation with Replacements
573

18.1.4 How Different Is It?
576

18.2 The Role of Replacements
576

18.3 Good Types and Bad Types
580

18.3.1 Bad Types
580

18.3.2 Good Types
581

18.4 Reputations with Common Consumers
584

18.4.1 Belief-Free Equilibria with Idiosyncratic Consumers
585

18.4.2 Common Consumers
586

18.4.3 Reputations
587

18.4.4 Replacements
588

18.4.5 Continuity at the Boundary and Markov Equilibria
590

18.4.6 Competitive Markets
594
18.5 Discrete Choices 596

18.6 Lost Consumers 599
  18.6.1 The Purchase Game 599
  18.6.2 Bad Reputations: The Stage Game 600
  18.6.3 The Repeated Game 601
  18.6.4 Incomplete Information 603
  18.6.5 Good Firms 607
  18.6.6 Captive Consumers 608

18.7 Markets for Reputations 610
  18.7.1 Reputations Have Value 610
  18.7.2 Buying Reputations 613
