Contents

Preface by Ramon J. Batalla and Celso Garcia

v

1 Slope Processes and Impacts

Modelling hillslope connectivity and channel interactions in semiarid areas: implications for hillslope restoration following land abandonment *Mike Kirkby & Louise Bracken* (keynote lecture) 3

Surface erosion assessment in two Calabrian basins (southern Italy) *Loredana Antronico, Roberto Coscarelli & Oreste Terranova* 16

Methods for the characterization of areas sensitive to desertification: an application to the Calabrian territory (Italy) *Roberto Coscarelli, Ivana Minervino & Marino Sorriso-Valvo* 23

Runoff and soil moisture relationships in a small forested basin in the Sistema Central Ranges (Spain) *José Martínez-Fernández, Antonio Ceballos, Segismundo Casado, Carlos Morán & Virginia Hernández* 31

The effect of wildfire intensity on soil aggregate stability in the Cadiretes Massif, NE Spain *Xavier Úbeda & Sara Bernia* 37

Sediment delivery from a landslide to a stream in a drainage basin in Hong Kong *Mervyn R. Peart, Mark E. Ruse & Lincoln Fok* 46

Targetting erosion control in large river systems using spatially distributed sediment budgets *Scott N. Wilkinson, Jon M. Olley, Ian P. Prosser & Arthur M. Read* 56

2 Catchment Hydrology and Water Quality

The effects over time of an arterial drainage scheme on the flood magnitude–return period relations *Keshav P. Bhattarai & Kieran M. O'Connor* 67

Modelling the hydraulic regime and the water quality of Sebou River (Morocco): first results *Mohammed Igouzal, Jean M. Mouchel, Karim Tamoh & Abdellatif Maslouhi* 75

Phosphorus concentrations of brook runoff in a Swiss agricultural catchment: longitudinal variability and subsurface drainage impact *Rainer Weissshaidinger, Bernd Hebel, Petra Ogermann, Philipp Schneider, Christian Katterfeld & Randy Koch* 81

3 Suspended Sediment Transport and Yield

Comparison of a neural network and a regression model to estimate suspended sediment in a semiarid basin *Susanne Schnabel & Marco Maneta* 91

Suspended sediment transport and trapping processes in the regulated lower Durance River, southeastern France *Emmanuel Ribes & Mireille Provansal* 101

Seasonal suspended sediment concentrations and their relationship with discharge in the Anoia river basin, NE Spain *Joaquim Farguell & Maria Sala* 111

Monitoring suspended sediment fluxes in the Na Borges basin, Mallorca, Spain <i>Joan Estrany & Celso Garcia</i>	117
Assessment of sediment yield of watersheds by means of reservoir survey and simulation modelling in Brazilian semiarid environment <i>José C.-de Araújo & Donald W. Knight</i>	124
Patterns of suspended sediment transport in two forested Mediterranean mountainous basins (Ribera Salada, Catalan Pre-Pyrenees, NE Spain) <i>J. Carles Balasch, Ramon J. Batalla, Rosa M. Poch & Damia Vericat</i>	131
 4 Bed load Transport and River–Channel Processes	
Estimating the transport of bed material at low rate in gravel armoured channels <i>Michael Church & Marwan Hassan</i> (keynote lecture)	141
Geomorphologic units and sediment transport in a very low relief basin: Rio Quequén Grande, Argentina <i>Liliana B. Teruggi, Gustavo A. Martinez, Paolo Billi & Emanuele Preciso</i>	154
Determining the competence of mountainous Mediterranean streams using lichenometric techniques <i>Frederic Gob, Nicolas Jacob, Jean-Paul Bravard & Francois Petit</i>	161
Bed load under low sediment transport in a large regulated river: the lower Ebro, NE Spain <i>Damia Vericat & Ramon J. Batalla</i>	171
A particle-size sediment budget for a Mediterranean river (the lower Tordera, northeastern Spain) <i>Albert Rovira</i>	179
 5 River Dynamics and Impacts	
Accumulation of sediments within the channelized reach of the Upper Odra River, Poland <i>Czajka Agnieszka</i>	191
Anthropogenic impacts on sediment discharge in the dry-hot valleys of SW China—the example of Longchuanjiang <i>Xi Xi Lu, Yunmei M. Zhu & Yue Zhou</i>	197
The change in flood regime along the Lower Jordan River: its influence on floodplain agricultural land use <i>Micha Klein</i>	205
Downstream effects of river impoundment on hydrological and geomorphological aspects of bedrock rivers (Golan Heights, Israel) <i>Nurit Shtober-Zisu & Moshe Inbar</i>	217
A proposed index of channel sensitivity to riparian disturbance <i>Chad E. Bailey, Robert G. Millar & Michael Miles</i>	223
Channel morphology and sedimentology in mountainous channel: a comparison between disturbed and undisturbed reaches <i>Lea Wittenberg & Noam Greenbaum</i>	231
 Key word index	
Author index	243
	245
