Contents

Preface iii

List of Contributors vii

1. Basics of Biocommunication in Insect–Plant Interactions: Role of Chemical Signals
   T.N. Ananthakrishnan 1

2. Plant Volatiles in Relation to Biocommunication
   S.S. Krishna 7

3. Pheromone Technology: Problems and Opportunities in Exploring Biocommunication Systems in Insects
   S. Narasimhan 12

4. Chemistry, Technology and Application of Pheromones as Components of IPM
   T. Ravindranathan 29

5. Modality and Relevance of Biocommunication in the Biological Control of Insects
   T.N. Ananthakrishnan 38

6. Sensillar Diversity and Insect Biocommunication
   P. Usha Rani 45

7. Neuroethological Approaches in Insect–Plant Interactions
   Alok Sen 54

8. Pheromone Production in Moths: Control by Intrinsic and Extrinsic Factors
   Ashok K. Raina 69

9. The Evolution of Communication as Exemplified by the Honey-bee Queen Pheromones
   Raghavendra Gadagkar 79

10. Cell-to-Cell Communication
    R.J. Rabindra and J.B. Kennedy 94

Index 101
