Preface xi

Part I THEORETICAL ASPECTS
1. PRELIMINARIES ON DYNAMIC RANDOM WALKS 3
   1. Introduction 3
   2. Definitions 5
   3. A riemannian dynamic random walk 6
   4. Examples 7

2. LIMIT THEOREMS FOR DYNAMIC RANDOM WALKS 11
   1. A strong law of large numbers 11
   2. A central limit theorem 12
   3. A local limit theorem 14
   5. A functional large deviation principle 23

3. RECURRENCE AND TRANSIENCE 33
   1. Introduction 33
   2. The one-dimensional case 33
   3. The higher-dimensional case 35

4. DYNAMIC RANDOM WALKS IN A RANDOM SCENERY 39
   1. The recurrent case 41
   2. The transient case 59
   3. A particular dynamical system: The rotation on the torus 66

5. ERGODIC THEOREMS 71
   1. Introduction 71
   2. Principal Results 72
3. Proof of Theorems 5.4 and 5.5 76
4. Proof of Theorem 5.3 77
5. Proof of Theorem 5.6 81

6. DYNAMIC RANDOM WALKS ON HEISENBERG GROUPS 83
   1. Introduction 83
   2. Generalities on Heisenberg groups 84
   3. Limit theorems 85

7. DYNAMIC QUANTUM BERNOULLI RANDOM WALKS 99
   1. Introduction 99
   2. Quantum probabilistic notions 99
   3. Quantum Bernoulli random walks 100
   4. The dual of $SU(2)$ 102
   5. Quantum Bernoulli random walks as random walks on the dual of $SU(2)$ 105
   6. Dynamic random walks on the dual of $SU(2)$ 105

Part II APPLICATIONS

8. DISTRIBUTED ALGORITHMS WITH DYNAMICAL RANDOM TRANSITIONS 119
   1. Colliding stacks 119
   2. The banker algorithm 128

9. DATA STRUCTURES WITH DYNAMICAL RANDOM TRANSITIONS 143
   1. Introduction 143
   2. Preliminaries 143
   3. Dynamic linear lists 146
   4. Dynamic priority queues 154
   5. Dynamic dictionaries 155
   6. An example: Linear lists and rotation on the torus 158

10. TRANSIENT RANDOM WALKS ON DYNAMICALLY ORIENTED LATTICES 167
    1. Introduction 167
    2. Model and results 168
    3. Proofs 172
    4. Examples 186

11. ASSET PRICING IN DYNAMIC $(B,S)$-MARKETS 191
    1. Introduction 191
2. Absence of Arbitrage of Dynamic \((B, S)\)-Markets 194
3. Completeness of Dynamic \((B, S)\)-Markets 206
4. Fair Pricing and Hedging Strategies in Complete Dynamic Markets 210
5. \(\gamma\)-Pricing and \(\gamma\)-Hedging 217
6. Asymptotic Behavior of Binary \((B, S)\)-markets 221

Appendices 230
A–Ergodic theory 231
1. Some definitions and basic theorems 231
2. Examples of dynamical systems 233
B–Some Results on Diophantine Approximations 235
C–Skorohod metric 241
D–Fourier series 243
E–Hilbert spaces, representations, *-algebras, von Neumann algebras 245
1. Hilbert spaces 245
2. Lie algebras and representations 246
3. *-algebras and von Neumann algebras 247
