Remembering the Manhattan Project
Perspectives on the Making of the Atomic Bomb and its Legacy

editor
Cynthia C. Kelly
President, The Atomic Heritage Foundation, USA
CONTENTS

PART I: A REPORT ON THE PROCEEDINGS

CHAPTER 1: A HISTORY WORTH PRESERVING 3

Opening Remarks 5
Senator Jeff Bingaman, New Mexico

Opening Remarks 9
Dr. Everet H. Beckner

Preserving the History of the Manhattan Project 13
Cynthia C. Kelly

CHAPTER 2: THE MANHATTAN PROJECT — A MILLENNIAL TRANSFORMATION 15

The Atomic Bomb in the Second World War 17
Richard Rhodes

The Manhattan Project: An Extraordinary Achievement of the “American Way” 31
Stephane Groueff

CHAPTER 3: THE ALLIES AND THE ATOMIC BOMB 39

A Tale of Two Documents 41
Andrew Brown

A Footnote on Hiroshima and Atomic Morality: Conant, Niebuhr, and an “Emotional” Clergyman, 1945–46 47
James G. Hershberg

A Los Alamos Beginning 53
Kai Bird
Martin Sherwin
CHAPTER 4: THE MILITARY AND SCIENCE IN THE CRUCIBLE OF WAR

General Leslie R. Groves and the Scientists
*Robert S. Norris*

Science in the Service of the State: The Cautionary Tale of Robert Oppenheimer
*Gregg Herken*

Leo Szilard: Baiting Brass Hats
*William Lanouette*

CHAPTER 5: SPEAKING FROM EXPERIENCE

SEDs at Los Alamos: A Personal Memoir
*Benjamin Bederson*

Some Experiences at the Met. Lab and What Could Be Learned from a Highly Successful and Challenging Project
*Jerome Karle*

My First Professional Assignment
*Isabella Karle*

Triumph and Tragedy: The Odyssey of J. R. Oppenheimer — A Personal Perspective
*Maurice M. Shapiro*

CHAPTER 6: LESSONS OF THE MANHATTAN PROJECT FOR THE 21ST CENTURY

Then and Now
*Maxine Singer*

The Manhattan Project: Qualitative or Quantitative Change?
*Stephen Younger*

Expertise and Independence: The Role of the Science Advisor
*Richard L. Garwin*
The Future of Nuclear Deterrence
Richard Rhodes

CHAPTER 7: CLOSING REFLECTIONS

Reflections on the Manhattan Project: Consequences and Repercussions
Dr. James Schlesinger

APPENDIX A: PROGRAM

APPENDIX B: PARTICIPANTS

PART II: A PLAN FOR PRESERVING THE MANHATTAN PROJECT

Preserving America: A Strategy for the Manhattan Project

Evaluation of the Manhattan Project Properties
Basis for Recommendations

Cross-Cutting Recommendations
1. Special Resource Study for National Park Units
2. Oral Histories of Manhattan Project Veterans
3. Preservation and Storage of Equipment; Artifacts and Documents

Preservation Strategies for the Manhattan Project:
Two Options

The Essential Manhattan Project (Option A)
Oak Ridge: Isotope Separation and Reactor Operations
Hanford: Plutonium Production
Los Alamos: Designing, Building and Testing the Bomb
The Trinity Site
Remembering the Manhattan Project

The Enriched Manhattan Project (Option B) 156

Oak Ridge 157
Hanford 157
Los Alamos 158
Trinity Site 158
University of Chicago 159
University of California, Berkeley 159
Columbia University 159

APPENDIX A: DESCRIPTION OF MANHATTAN PROJECT PROPERTIES 161

1. Oak Ridge, Tennessee 161

K-25 Footprint (Isotope Separation) 161
Roosevelt Cell (Isotope Separation) 162
K-29 as Described in the O.R. White Paper (Isotope Separation) 162
Beta 3 Electromagnetic Separation Racetracks at Y-12 (Isotope Separation) 162
Building 9731, Known as the Y-12 Pilot Plant (Isotope Separation and Research) 163
X-10 Graphite Reactor (Reactor Operations) 163
American Museum of Science and Energy 164

2. Hanford, Washington 164

B Reactor (Fuel Irradiation) 164
T Plant (Chemical Separation) 166
T Plant Exhaust Stack (Chemical Separation) 167
Process Control Laboratory (Chemical Separation) 167
Concentration Building (Chemical Separation) 167
Plutonium Isolation Building (Chemical Separation) 168
Test Pile/Hot Cell Verification Building (Research and Development) 168
Separations Laboratory (Research and Development) 168
Radiochemistry Laboratory (Research and Development) 168
Fresh Metal Storage Building (Fuel Manufacturing) 169
Metallurgical Engineering Laboratory (Fuel Manufacturing) 169
Metal Fuels Fabrication Facility (Fuel Manufacturing) 169
River Pump House (Fuel Irradiation) 169
Lag Storage Building (Fuel Irradiation) 170
Plutonium Vaults (Product Storage) 170

3. Los Alamos, New Mexico 170
   “Gun Site” (Weapons Research and Development) 171
   “V Site” (Weapons Research and Development) 171
   Concrete Bowl (Weapons Research and Development) 172
   Louis Slotin Accident Building (Biomedical/Health Physics) 172
   Quonset Hut TA-22-1 (Weapons Research and Development) 172
   East Guard Tower (Security) 173
   Pond Cabin (Administrative and Social History) 173
   Trinity Test Site (Weapons Research and Development) 173

FEATURE ARTICLE: THE FRISCH–PEIERLS MEMORANDUM 175

Memorandum on the Properties of a Radioactive Super-bomb 177
   Otto R. Frisch
   Rudolf Peierls

INDEX 181
