
New Theory of the Earth

Don L. Anderson

*Seismological Laboratory, California Institute
of Technology, Pasadena, California*

 **CAMBRIDGE**
UNIVERSITY PRESS

Contents

<i>Preface and Philosophy</i>	page ix
<i>Abbreviations and acronyms</i>	xiv

Part I Planetary perspective	1
<i>Chapter 1</i> Origin and early history	3
<i>Chapter 2</i> Comparative planetology	12
<i>Chapter 3</i> The building blocks of planets	22

Part II Earth: the dynamic planet	33
<i>Chapter 4</i> The outer shells of Earth	35
<i>Chapter 5</i> The eclogite engine	58
<i>Chapter 6</i> The shape of the Earth	62
<i>Chapter 7</i> Convection and complexity	73

Part III Radial and lateral structure	89
<i>Chapter 8</i> Let's take it from the top: the crust and upper mantle	91
<i>Chapter 9</i> A laminated lumpy mantle	109
<i>Chapter 10</i> The bowels of the Earth	116
<i>Chapter 11</i> Geotomography: heterogeneity of the mantle	124

Part IV Sampling the Earth	141
<i>Chapter 12</i> Statistics and other damned lies	143
<i>Chapter 13</i> Making an Earth	153
<i>Chapter 14</i> Magmas: windows into the mantle	168
<i>Chapter 15</i> The hard rock cafe	189
<i>Chapter 16</i> Noble gas isotopes	198
<i>Chapter 17</i> The other isotopes	211

Part V Mineral physics	231
<i>Chapter 18</i> Elasticity and solid-state geophysics	233
<i>Chapter 19</i> Dissipation	246
<i>Chapter 20</i> Fabric of the mantle	256
<i>Chapter 21</i> Nonelastic and transport properties	274
<i>Chapter 22</i> Squeezing: phase changes and mantle mineralogy	282

Part VI	Origin and evolution of the layers and blobs	299
<i>Chapter 23</i>	The upper mantle	301
<i>Chapter 24</i>	The nature and cause of mantle heterogeneity	312
<i>Chapter 25</i>	Crystallization of the mantle	318

Part VII	Energetics	331
<i>Chapter 26</i>	Terrestrial heat flow	333
<i>Chapter 27</i>	The thermal history of the Earth	349

<i>References and notes</i>	356
<i>Appendix</i>	375
<i>Index</i>	380
