Greenhouse Gases and Animal Agriculture: An Update

Proceedings of the 2nd International Conference on Greenhouse Gases and Animal Agriculture, held in Zurich, Switzerland between 20 and 24 September 2005

Editors:

Carla Riccarda Soliva
Institute of Animal Science, Animal Nutrition
ETH Zurich
SWITZERLAND

Junichi Takahashi
Obihiro University of Agriculture and Veterinary Medicine
Department of Animal Science
Obihiro, Hokkaido
JAPAN

Michael Kreuzer
Institute of Animal Science, Animal Nutrition

</table>
The influence of head-space and inoculum dilution on in vitro ruminal methane measurements

Micrometeorological techniques to measure ecosystem-scale greenhouse gas fluxes for model validation and improvement
W. Eugster and M.J. Zeeman

Modelling nitrous oxide abatement strategies in intensive pasture systems
R. Eckard, I. Johnson and D. Chapman

Modeling GHG emissions and carbon sequestration in Swiss agriculture: An integrated economic approach
W. Hediger

Modeled effects of policy instruments to mitigate greenhouse gas emissions from livestock farming systems in southwest Germany
M. Schäfer and H. Neufeldt

Strategies to mitigate methane emission from livestock

Effects of pasture improvement on productivity, gross margin and methane emissions of a grazing sheep enterprise
D. Alcock and R.S. Hegarty

Greenhouse gas mitigation opportunities with immediate application to pastoral grazing for ruminants
G.C. Waghorn and D.A. Clark

The persistence over time of divergent methane production in lot fed cattle
J.P. Goopy, R.S. Hegarty and R.C. Dobos

Inconsistencies in rumen methane production—effects of forage composition and animal genotype
G.C. Waghorn, S.L. Woodward, M. Tavendale and D.A. Clark

Methane emission as determined in contrasting dairy cattle breeds over the reproduction cycle
A. Münger and M. Kreuzer

Effects of dietary and animal factors on methane production in dairy cows offered grass silage-based diets
T. Yan, C.S. Mayne and M.G. Porter
Archaeal community structure diversity in the rumen of faunated and defaunated sheep
D.P. Morgavi, J.P. Jouany, C. Martin and M.J. Ranilla

Control of rumen methanogenesis by inhibiting the growth and activity of methanogens with hydroxymethylglutaryl-SCoA inhibitors
M.J. Wolin and T.L. Miller

Dietary additives to control methanogenesis in the rumen
C.J. Newbold and L.M. Rode

Encapsulated fumaric acid as a means of decreasing ruminal methane emissions

Effects of various feed additives on the methane emissions from beef cattle
K.A. Beauchemin and S.M. McGinn

Inhibition of ruminal methanogenesis by tropical plants containing secondary compounds
D.N. Kamra, N. Agarwal and L.C. Chaudhary

Strategic use of tannins as means to limit methane emission from ruminant livestock
H.D. Hess, T.T. Tiemann, F. Noto, J.E. Carulla and M. Kreuzer

Effect of foliage from multi-purpose trees and a leguminous crop residue on in vitro methanogenesis and ruminal N use
A.B. Zeleke, C. Clément, H.D. Hess, M. Kreuzer and C.R. Soliva

Effects of the addition of some medicinal plants on methane production in a rumen simulating fermenter (RUSITEC)
R. García-González, S. López, M. Fernández and J.S. González

Effect of spices on rumen fermentation, methanogenesis and protozoa counts in in vitro gas production test
A.K. Patra, D.N. Kamra and N. Agarwal

Effect of plant oils on methane emission and biohydrogenation in vitro

Micro-algae as potent rumen methane inhibitors and modifiers of rumen lipolysis and biohydrogenation of linoleic and linolenic acid
C. Boeckaert, J. Mestdagh, B. Vlaeminck, D. Clayton and V. Fievez

</table>
Efficient use of digested cattle slurry from biogas plant with respect to nitrogen recycling in grassland
T. Matsunaka, T. Sawamoto, H. Ishimura, K. Takakura and A. Takekawa

Nitrogen losses from intensive livestock farming systems in Southeast Asia: A review of current trends and mitigation options
P. Gerber and H. Menzi

Nitrogen budgets and losses in livestock systems
O. Oenema

Reduction of nitrogen surplus by material circulation between dairy farms and arable crop farms in the mixed production area, Japan

Ammonia emissions from agriculture—changing perception and research priorities in time: Case study in Switzerland
H. Menzi, B. Reidy, W. Richner and F.X. Stadelmann

Ammonia and greenhouse gas emissions from a straw flow system for fattening pigs
B. Amon, A. Pöllinger, V. Kryvoruchko, I. Mösenbacher, A. Hausleitner, M. Fröhlich and Th. Amon

Gaseous emissions from a deep litter farming system for dairy cattle
J. Mosquera, J.M.G. Hol and G.J. Monteny

Greenhouse gas and ammonia emission abatement by slurry treatment
B. Amon, V. Kryvoruchko, G. Moitzi and T. Amon

Gaseous emissions (NH₃, N₂O, CH₄, CO₂) during pig slurry biological aerobic treatment and treatment by-product storages
L. Loyon, F. Guiziou, F. Béline and P. Peu

Measurement and regulation of environmentally hazardous gas emissions from beef cattle manure composting
M. Shiraishi, N. Wakimoto, E. Takimoto, H. Kobayashi and T. Osada

Anaerobic co-digestion of dairy manure and sugar beets

Effect of moisture control in pile-type composting of dairy manure by adding wheat straw on greenhouse gas emission
T. Tamura and T. Osada
Influence of different methods of covering slurry stores on greenhouse gas and ammonia emissions
B. Amon, V. Kryvoruchko and T. Amon

Effect of novel covering digested dairy slurry store on ammonia and methane emissions during subsequent storage
N. Sakamoto, M. Tani and K. Umetsu

A low cost solution for ammonia emission abatement from slurry storage
P. Balsari, E. Dinuccio and F. Gioelli

Ammonia nitrogen emission from land spread farmyard manure
P. Balsari, F. Gioelli and E. Dinuccio

Utilization of anaerobically digested dairy slurry combined with other wastes following application to agricultural land
M. Tani, N. Sakamoto, T. Kishimoto and K. Umetsu

Effect of Holstein–Friesian strain and feeding system on greenhouse gas emissions from pastoral dairy production systems
D.K. Lovett, L. Shalloo, B. Horan, P. Dillon and F.P. O’Mara

Effects of tannins on ruminal degradation and excretory pattern of N and implications for the potential N emission from the manure
H.D. Hess, T.T. Tiemann, Ch.D. Stürm, J.E. Carulla, C.E. Lascano and M. Kreuzer

Gaseous nitrogen losses from a grassland area used for overwintering cattle
M. Šímek, R.J. Stevens, R.J. Laughlin, J. Hynšt, P. Brůček, J. Čuhel and L. Pietola

Mitigating N₂O emissions from urine patches in pastures
J.W. van Groenigen, D.M. Kool, G.L. Velthof, O. Oenema and P.J. Kuikman

Nitrous oxide emissions from a fertilized grazed grassland in Ireland
B.P. Hyde, M.J. Hawkins, M. Ryan and O.T. Carton

Nitrous oxide emissions during storage of broiler litter and following application to arable land
R.E. Thorman, D.R. Chadwick, L.O. Boyles, R. Matthews, E. Sagoo and R. Harrison

Impact of NO₃ leaching abatement measures on N₂O and CH₄ emissions from a UK dairy system
A. del Prado, L. Cardenas and D. Scholefield
“Forgotten” terrestrial sources of N-gases

P. Boeckx and O. Van Cleemput
