PUB: Promise and Progress: Introduction Murugesu Sivapalan, Thorsten Wagener, Stefan Uhlenbrook, Erwin Zehe, Venkat Lakshmi, Xu Liang, Yasuto Tachikawa & Praveen Kumar

1 Model Improvements Through Detailed Process Studies Stefan Uhlenbrook & Xu Liang

Hydrological conceptual models of two Haute-Mentue subcatchments through environmental tracing and TDR soil moisture measurements Daniela Balin, Christophe Joerin & André Musy

Identification of flow pathways along hillslopes using electrical resistivity tomography (ERT) Stefan Uhlenbrook & Jochen Wenninger

Using factor analysis and end-member mixing techniques to infer sources of runoff generation Corinna Abesser, Ruth Robinson & Chris Soulsby

Process-based strategies for model structural improvement and reduction of model prediction uncertainty Kellie B. Vaché & Jeffrey J. Mcdonnell

Analysis of process controls on streamflow response in an Australian tropical catchment Laura Montanari, Murugesu Sivapalan & Alberto Montanari

Evaluation of a grid-based distributed hydrological model over a large area Victor Koren, Fekadu Moreda, Seann Reed, Michael Smith & Ziya Zhang

PAI-OFF: a new strategy for online flood forecasting in mountainous catchments J. Cullmann, G. H. Schmitz & W. Görner

2 Model Evaluation and Comparison: Uncertainty Analysis and Diagnostics Thorsten Wagener

Water resources estimation in less developed regions—issues of uncertainty associated with a lack of data Denis A. Hughes

Evaluating uncertainty in modelled sediment delivery in data-sparse environments: application to the Mae Chaem Catchment, Thailand David A. Post & Michael G. Hartcher

Bayesian kriging and GLUE applied to estimation of uncertainty due to precipitation representation in hydrological modelling Luciano Nobrega Rodrigues Xavier, Afonso Augusto Araujo De Magalhaes & Otto Correa Rotunno Filho

Evaluation of water quantity and quality modelling in ungauged European basins Berit Arheimer

A new approach for the numerical modelling of the groundwater flow in the fractured rock massifs Jiří Maryška, Otto Severýn, Miloslav Tauchman & David Tondr

PUB and water resources management practises in Nigeria Olusegun Adeaga, Lekan Oyebande & Idowu Balogun

Frequency-domain analyses of GPR waveforms: enhancing near-surface observational capabilities Guy Serbin & Dani Or

Water level change in wells—a predictor for earthquakes? Joseph Guttman, Akiva Flexer & Annat Yellin-Dror

4 New Modelling Approaches and Methods for Testing Models against Observations Erwin Zehe & Yasuto Tachikawa

Physically-based model of heat and water transfer in frozen soil and its parameterization by basic soil data Alexander Gelfan

Effect of soil shrinkage on runoff generation in micro and mesoscale catchments Falk Lindenmaier, Erwin Zehe, Martin Helms, Oleg Evdakov & Jürgen Ihringer

Modelling flood plain vegetation based on long-term simulations of daily river–groundwater dynamics Bruno Büchele, Peter Burek, Ralf Baufeld & Ilona Leyer

Indirect assessment of flooding duration as a driving factor of plant diversity in wet grasslands Cyrille Violle, Christophe Cudennec, Manuel Plantegenest, Christian Damgaard, Didier Le Coeur, Jan-Bernard Bouzille & Anne Bonis

Effects of conservation tillage on storm flow: a model-based assessment for a mesoscale watershed in Germany Ingo Haag, Annette Luce & Kai Gerlinger

Assessing the predictive ability of the spatially distributed conceptual AFFDEF model for a mesoscale catchment Tapash Das, Greta Moretti, András Bárdossy & Alberto Montanari

Large basin simulation experience in South America Daniel Gustavo Allasia, Benedito Cláudio da Silva, Walter Collischonn & Carlos Eduardo Morelli Tucci

Distributed rainfall–runoff analysis in a flow regulated basin having multiple multi-purpose dams Takahiro Sayama, Yasuto Tachikawa, Kaoru Takara & Yutaka Ichikawa

Surface runoff simulation for part of Yewa basin Olusegun Adeaga, Lekan Oyebande & Christian Depraetere
Inversion d’une modélisation de type hydrogramme unitaire à base géomorphologique: interprétation physique et première mise en œuvre
Houda Boudhraa, Christophe Cudennec, Mohamed Slimani & Herve Andrieu

Numerical modelling of water transfer among precipitation, surface water, soil moisture and groundwater Xi Chen, Zhicai Zhang & Yongqin David Chen

Disaggregation of upslope catchment area and steepest slope for transferring geomorphometric information across scales Nawa R. Pradhan, Yasuto Tachikawa & Kaoru Takara

A multi-level and multi-scale structure of river network geomorphometry with potential implications towards basin hydrology Christophe Cudennec, Jean-Christophe Pouget, Houda Boudhraa, Mohamed Slimani & Slah Nasri

Application of the wavelet transform for analysis of precipitation and runoff time series Celso Augusto G. Santos & Sandra Maria Araújo Ideiã

5 Progress in PUB Implementation (PUB Working Groups)
Murugesu Sivapalan

The PUB Top-Down Modelling Working Group (TDWG): initial development and activities Ian G. Littlewood, Barry F. W. Croke & David A. Post

Towards an uncertainty framework for predictions in ungauged basins: The Uncertainty Working Group Thorsten Wagener, Jim Freer, Erwin Zehe, Keith Beven, Hoshin V. Gupta & Andras Bardossy

MEDCLUB—starting line and first activities Mauro Fiorentino, Domenico Carriero, Vito Iacobellis, Salvatore Manfreda & Ivan Portoghese

Groundwater pollution and risks for the coastal environment (southeastern Italy) Maurizio Polemio & Pier Paolo Limoni

Canadian PUB planning and implementation Christopher Spence, John W. Pomeroy & Alain Pietroniro

Research initiatives in Thailand on Predictions in Ungauged Basins Dushmanta Dutta, Chavalit Chaleeraktrakoon & Saisunee Budhakooncharoen

PUB Working Group on Orographic Precipitation, Surface Water and Groundwater Interactions, and their Impacts on Water Resources Xu Liang, L. Ruby Leung, Maoyi Huang, Yun Qian, Mark S. Wigmosta, George B. Matanga & Dave Matthews
