Metric Properties of Harmonic Measures

Vilmos Totik
## Contents

1 Introduction 1

2 Metric properties of harmonic measures, Green functions and equilibrium measures 4
   2.1 Notations and some basic results from potential theory 6
   2.2 Preliminary estimates 10
   2.3 Proof of Theorem 2.3 for $E \subseteq [0, 1]$ 15
   2.4 Proof of Theorem 2.2 19
   2.5 Proof of Theorem 2.1 23
   2.6 Proof of Theorem 2.3 24

3 Sharpness 28
   3.1 Proof of Theorem 3.1 and its corollaries 29

4 Higher order smoothness 35

5 Cantor-type sets 44
   5.1 Preliminaries for Cantor sets 45
   5.2 Proof of Theorems 5.1 and 5.3 53
   Proof of Theorem 5.9 53
   Proof of Theorem 5.1 60
   Proof of Theorem 5.3 70

6 Phargmén–Lindelöf type theorems 74
   6.1 Proof of Theorem 6.2 78

7 Markov and Bernstein type inequalities 107
   7.1 Proof of Theorems 7.1; 7.2 and 7.3 109

8 Fast decreasing polynomials 113

9 Remez and Schur type inequalities 123

10 Approximation on compact sets 126

11 Appendix 147
   11.1 Discretizing logarithmic integrals 147
   11.2 Some lemmas on $\Theta$ integrals 153

12 References 157

13 List of symbols 160

14 List of figures 161
