Bilthoven, The Netherlands*

Proceedings of the ModelCARE 2005 conference held in The Hague,  
The Netherlands, 6–9 June 2005. This conference was jointly organized by:

**TNO Built Environment and Geosciences, Utrecht, The Netherlands, and**

**The International Commission on Groundwater (ICGW), of the  
International Association of Hydrological Sciences (IAHS).**

*Financial sponsorship for this publication was provided  
by the International Hydrological Programme of  
UNESCO*

# Contents

Preface by *M. F. P. Bierkens, J. C. Gehrels & K. Kovar*

v

## 1 Use of Geophysical and Geochemical Measurements, Remote Sensing, Monitoring and *a priori* Hydrological Knowledge

- Reducing uncertainty of hydrogeological parameters by co-conditional stochastic simulation: lessons from practical applications in aquifers and in low permeability layers *A. Dassargues, C. Rentier & M. Huysmans* 3

- A simple procedure for the identification of aquifer parameters based on steady-state pumping tests *Giovanni Firmani, Aldo Fiori & Alberto Bellin* 10

- Reducing ambiguity in fractured-porous media characterization using single-well tracer tests *I. Ghergut, C. McDermott, M. Sauter, M. Herfert & O. Kolditz* 17

- A tomographic approach to identify hydraulic conductivity of a phreatic aquifer by the “differential system method” *Mauro Giudici, Giovanni Angelo Meles, Giansilvio Ponzini, Chiara Vassena & Guido Parravicini* 25

- Inclusion of remote sensing information to improve groundwater flow modelling in the Chobe region (Botswana) *H. J. W. M. Hendricks Franssen, P. Brunner, L. Kgothlang & W. Kinzelbach* 31

- Simulating environmental tracer transport in unsaturated-saturated porous media *G. A. Onnis, R. Althaus, S. Klump, H. J. W. M. Hendricks Franssen, F. Stauffer & W. Kinzelbach* 38

- Identification of chemical reactions and their reaction rate coefficients with push-pull tests *A. Vandenbohede & L. Lebbe* 46

- Towards an upscaled model of aquifer recharge through glacial drift deposits, Shropshire, UK *R. Mackay, M. O. Cuthbert, H. Ash & J. H. Tellam* 52

- Identification of hydrogeological models: application to tracer test analysis in a karst aquifer *Carolina Massmann, Steffen Birk, Rudolf Liedl & Tobias Geyer* 59

## 2 Calibration and Parameter Uncertainty

- Comparison of parameter estimation algorithms in hydrological modelling *R. S. Blasone, H. Madsen & D. Rosbjerg* 67

- Evaluation of the inverse modelling process for heterogeneous porous media through laboratory air injection tests *Kiyoshi Masumoto* 73

Parameter estimation for a double continuum transport model for fractured porous media <i>M. Beyer &amp; U. Mohrlok</i>	80
Calibration of hydraulic and tracer tests in fractured media represented by a DFN model <i>Leonardo David Donado, Xavier Sánchez-Vila, Eduardo Ruiz, Francisco Javier Elorza, Carmen Bajos &amp; Antonio Vela-Guzman</i>	87
On the use of Pareto optimization for multi-criteria calibration of hydrological models <i>Henrik Madsen &amp; Soon-Thiam Khu</i>	93
Influence of modelling concepts and approaches on the results of field scale reactive transport modelling <i>Sascha E. Oswald, Ian A. Watson, Roger S. Crouch &amp; Steven A. Banwart</i>	100
Using Bayesian inverse modelling in real-world projects: opportunities and challenges <i>J. R. Valstar, B. Minnema, J. J. J. C. Snepvangers &amp; C. B. M. te Stroet</i>	108
Inverse modelling of groundwater flow using model reduction <i>P. T. M. Vermeulen &amp; A. W. Heemink</i>	113
<b>3 Combined Flow and Transport: Heterogeneity, Parameters, Processes</b>	
Assessing contaminant mass flow rates obtained by the integral groundwater investigation method by using the Virtual Aquifer approach <i>S. Bauer &amp; O. Kolditz</i>	123
Upscaling retardation factors in 2-D porous media <i>J. Jaime Gómez-Hernández, Jianlin Fu &amp; Daniel Fernández-García</i>	130
Stochastic analysis of the effect of spatial variability of diffusion parameters on radionuclide transport in a low permeability clay layer <i>Marijke Huysmans &amp; Alain Dassargues</i>	137
Uncertainties in modelling and parameterization of fluid–rock consumption–production interaction in porous media <i>W. Kessels &amp; S. Wessling</i>	143
Reactive transport codes applied to gypsum dissolution in a laboratory column experiment focusing on the sensitivity of model concepts and data uncertainty <i>Wilfried Pfingsten, Jens Mibus &amp; Roland Kuechler</i>	151
Block-upscaling of transport in heterogeneous aquifers <i>M. Willmann, X. Sánchez-Vila, J. Carrera &amp; A. Guadagnini</i>	158

## 4 Reliability of Model Results/Stochastic Forward Modelling

Upscaling of solute transport in mildly heterogeneous media: comparison of Fickian and non-Fickian approaches <i>Christophe C. Frippiat &amp; Alain E. Holeyman</i>	167
On the departure from Gaussianity and Fickianity of transport in highly heterogeneous aquifers <i>I. Janković, A. Fiori &amp; G. Dagan</i>	174
Palaeo-evolution and uncertainty analysis of regional groundwater flow in discretely fractured crystalline rock <i>S. D. Normani, J. F. Sykes, E. A. Sudicky &amp; Y. J. Park</i>	180

## 5 Modelling of Well Capture Zones

State-space first-order estimate of well catchment uncertainty <i>M. I. Bakr, A. P. Butler, A. Guadagnini &amp; M. Riva</i>	189
Integral pumping tests: average concentration and mass flow at the capture zone scale <i>Marti Bayer-Raich &amp; Jerker Jarsjö</i>	196
Comparison of stochastic and regression based methods for quantification of predictive uncertainty of model-simulated wellhead protection zones in heterogeneous aquifers <i>Steen Christensen, Catherine Moore &amp; John Doherty</i>	202
Upscaling transmissivity in the near-well region <i>Jianlin Fu, J. Jaime Gómez-Hernández &amp; Carl L. Axness</i>	209
Modelling of regional-scale well-flow in heterogeneous aquifers: 2-D or not 2-D? <i>The late P. Indelman &amp; G. Dagan</i>	215
A synthetic study of the worth of transmissivity and head data to delineate groundwater protection zones in braided alluvial aquifers <i>J. Kerrou, P. Renard, I. Lunati &amp; H. J. W. M. Hendricks Franssen</i>	220
A composite medium approach for probabilistic modelling of contaminant travel time distribution to a pumping well in a heterogeneous aquifer <i>M. Riva, L. Guadagnini, A. Guadagnini, E. Martac &amp; T. Ptak</i>	227
Recharge fronts and stagnation areas for pumping wells <i>M. Riva &amp; A. Guadagnini</i>	234
Uncertainty estimation of well catchments: combined effect of inhomogeneous transmissivity and uncertain mean recharge <i>Fritz Stauffer &amp; Harrie-Jan Hendricks Franssen</i>	240
Delineation of capture zones in transient groundwater flow systems <i>Velimir V. Vesselinov &amp; Bruce A. Robinson</i>	246

## 6 Developments in Modelling

A random-walk approach for simulating wastewater transport and transformations in the unsaturated zone <i>Cristina Cata &amp; Ulf Mohrlok</i>	255
Simulation of groundwater–seawater interactions in the Aral Sea basin by a coupled water balance model <i>Jerker Jarsjö, Irina Alekseeva, Corinna Schrum &amp; Georgia Destouni</i>	261
Diffuse loading of surface water from groundwater in areas with shallow groundwater tables: quasi-2-D vs 2-D simulation <i>Elisabeth Peters &amp; Jasper Griffioen</i>	268
Modelling thermohaline variable-density flow and solute transport in fractured porous media <i>T. Graf &amp; R. Therrien</i>	275
Complex groundwater whirl systems <i>Kick Hemker &amp; Mark Bakker</i>	281
A numerical assessment of the random walk particle tracking method for heterogeneous aquifers <i>P. Salamon, D. Fernández-García &amp; J. J. Gómez-Hernández</i>	288
<b>7 Decision Making under Uncertainty</b>	
Los Alamos National Laboratory's risk-based decision analysis for groundwater remediation and monitoring <i>Paul A. Davis, Diana Hollis, Kay H. Birdsell, Velimir V. Vesselinov, Daniel E. Rives &amp; Sergey Pozdniakov</i>	297
An analysis of different strategies for the prioritization of groundwater quality prediction studies with a sequential numerical game <i>Kees Vink &amp; Paul Schot</i>	303
Risk analysis on groundwater contamination at the megasite Port of Rotterdam <i>Annemieke Marsman, Johan Valstar &amp; Jeroen ter Meer</i>	309
Key word index	315
