Preface vii

INVITED LECTURE
The Importance of Residual Stresses in Microelectronic Products and Materials
W.H. Müller

SESSION 1A: MEASURING METHODS I
An X-Ray Diffraction Method to Determine Stress at Constant Penetration/Information Depth
A. Kumar, U. Welzel, M. Wohlschlägel, W. Baumann and E.J. Mittemeijer

Mechanical Stress Gradients in Thin Films Analyzed Employing X-Ray Diffraction Measurements at Constant Penetration/Information Depths
M. Wohlschlägel, W. Baumann, U. Welzel and E.J. Mittemeijer

Sub-Surface Residual Stress Gradients: Advances in Laboratory XRD Methods
C.L. Azanza Ricardo, M. D’Incau and P. Scardi

Determination of Real Space Residual Stress Distributions $\sigma_i(z)$ of Surface Treated Materials with Diffraction Methods Part I: Angle-Dispersive Approach
T. Manns, J. Gibmeier and B. Scholtes

Determination of Real Space Residual Stress Distributions $\sigma_i(z)$ of Surface Treated Materials with Diffraction Methods Part II: Energy Dispersive Approach
I.A. Denks, M. Klaus and C. Genzel

SESSION 1B: MATERIAL PROCESSING I
The Residual Stresses Generated by Deep Rolling and their Stability in Fatigue & Application to Deep-Rolled Crankshafts
H. Michaud, J.M. Sprauel and F. Galzy

Stability of Residual Stresses of Deep Rolled Sintered Iron at Quasistatic and Cyclic Loading
J. Merkel, V. Schulze, A. Wanner and O. Vöhringer

Residual Stress Stability in High Temperature Fatigued Mechanically Surface Treated Metallic Materials
I. Altenberger, I. Nikitin, P. Juierm and B. Scholtes

Residual Stresses Induced by Cross-Rolling

SESSION 1C: SIMULATION I
Geometry Effects when Controlling Residual Stresses in Friction Stir Welds by Mechanical Tensioning
D.G. Richards, P.B. Prangnell, P.J. Withers, S.W. Williams, A. Wescott and E.C. Oliver

Measuring and Predicting the Effects of Residual Stresses on Crack Propagation
A. Shterenlikt, D. Stefanescu, M.E. Fox, K. Taylor, J. Quinta da Fonseca, A.H. Sherry and P.J. Withers

A Novel Closed-Form Calculation of the Stress Intensity Factor for a Crack in a Residual Stress Field
J. Meng Lee Tan, M.E. Fitzpatrick and L. Edwards

Residual Stresses in 3D Sheet Metal Guillotining Using a Coupled Finite Elastoplastic Damage Model
A. Cherouat, N. Belamri, K. Saanouni and P. Autesserre

Residual Stress State at Different Scales in Deep Drawn Cup of Unstable Austenitic Steel
M.R. Berrahmoune, S. Berveiller, K. Inal and E. Patoor
SESSION 2A: MEASURING METHODS II

White Beam Microdiffraction Experiments for the Determination of the Local Plastic Behaviour of Polycrystals
O. Castelnau, P. Goudeau, G. Geandier, N. Tamura, J.L. Béchade, M. Bornert and D. Caldemanis 103

Inter- and Intragranular Stress Determination with Kossel Microdiffraction in a Scanning Electron Microscope
R. Pesci, K. Inal, S. Berveiller, E. Patoor, J.S. Lecomte and A. Eberhardt 109

Determinability of Complete Residual Strain Tensor from Multiple CBED Patterns
A. Morawiec 115

FibDAC - Residual Stress Determination by Combination of Focused Ion Beam Technique and Digital Image Correlation
J. Keller, A. Gollhardt, D. Vogel, E. Auerswald, N. Sabate, J. Auersperg and B. Michel 121

SESSION 2B: MATERIAL PROCESSING II

Residual Stress State and Fatigue Behaviour of Laser Shock Peened Titanium Alloys
I. Altenberger, Y. Sano, M.A. Cherif, I. Nikitin and B. Scholtes 129

Dynamic Analysis of Residual Stress Introduced by Laser Peening
K. Akita, M. Kuroda and P.J. Withers 135

Strengthening of Si₃N₄ Ceramics by Laser Peening
K. Akita, Y. Sano, K. Takahashi, H. Tanaka and S.I. Ohyaa 141

X-Ray Diffraction in Failure Analysis of Rolling Bearings
W. Nierlich, J. Gegner and M. Bruckner 147

Relaxation of Residual Stresses in and around Mechanical Fasteners Due to Fatigue Loading
M.E. Fox and P.J. Withers 153

SESSION 2C: SIMULATION II

A Kinematic Hardening Finite Elements Model to Evaluate Residual Stresses in Shot-Peened Parts, Local Measurements by X-Ray Diffraction
C. Ould, E. Rouhaud, M. François and J.L. Chaboche 161

Thermomechanical Modelling of a Steel Plate Impacted by a Shot and Experimental Validation

Material Flow Curve Influence on Macroscopic Residual Stresses in the Workpiece Bottom in High-Pressure Sheet Metal Forming
R. Krux, W. Homberg and M. Kleiner 173

Experimental and FEM Analysis of Cutting Sequence on Residual Stresses in Machined Layers of AISI 316L Steel
J.C. Outeiro, D. Umbrello and R. M'Saoubi 179

Effect of Residual Stresses on Mechanical Properties of Duplex Stainless Steel Studied by Diffraction and Self-Consistent Modelling
R. Dakhlaoui, C. Braham, A. Baczmański, S. Wróński, K. Wierzbanowski and E.C. Oliver 185

POSTER SESSION I

The Materials Science Beamline EDDI for Energy-Dispersive Analysis of Subsurface Residual Stress Gradients
C. Genzel, I.A. Denks and M. Klaus 193

Design of Engineering Diffractometer at J-PARC

E7 - New Strain Scanner at HMI - High Q-Resolution for Phase-Sensitive Analysis of Stress Distributions
F. Henkel, U. Hermeking-Goebel, P. Lemke, T. Wilpert, C. Pietsch and R. Schneider 205
The New Materials Science Diffractometer STRESS-SPEC at FRM-II

SALSA: Advances in Residual Stress Measurement at ILL
T. Pirling, G. Bruno and P.J. Withers ................................................................. 217

The New and Upgraded Neutron Instruments for Materials Science at HMI - Current Activities in Cooperation with Industry
T. Poeste, R.C. Wimpory and R. Schneider ................................................................. 223

Review of Residual Stress Determination and Exploitation Techniques Using X-Ray Diffraction Method
M. Belassel, J. Pineault and M.E. Brauss ................................................................. 229

New Type of Diffraction Elastic Constants for Stress Determination
A. Baczmanski, A. Tidu, P. Lipinski, M. Humbert and K. Wierzbanski ...................... 235

Residual Stress Reconstruction by Variational Eigenstrain Procedures
A.M. Korsunsky, G.M. Regino and D. Nowell ................................................................. 241

Application of the cos α Method to Area Detector Type Neutron Stress Measurement
T. Sasaki ................................................................. 247

Residual Stress Distribution in Pure Bending Beam Subjected to Tensile Failure on One Side
X.B. Wang ................................................................. 253

Evaluation of Uncertainties of Measurement for Residual Stresses in Coatings Determined by the Dilatometric Method
A. Ryabchikov, H. Lille and R. Laaneots ................................................................. 259

SESSION 3A: MEASURING METHODS III
Aspects of Residual Stress Determination Using Energy-Dispersive Synchrotron X-Ray Diffraction
A. Steuwer, M. Peel and T. Buslaps ................................................................. 267

Micro Diffraction Imaging of Bulk Polycrystalline Materials
T. Wroblewski, A. Bjoumikhov and B. Hasse ................................................................. 273

Determination of Residual Stress Fields with High Local Resolution
B. Hasse, M. Koçak and W. Reimers ................................................................. 279

Evaluation by Synchrotron Radiation of Shape Factor Effects on Residual Stress in Nitrided Layers
V. Goret, A. Fabre, L. Barrallier and P. Vardon ................................................................. 285

Residual Stress Analysis Around Foreign Object Damage Using Synchrotron Diffraction
J. Ding, P. Frankel, M. Preuss, J. Byrne and P.J. Withers ................................................................. 291

SESSION 3B: MATERIAL PROCESSING III
Residual Stress in Laser Bent Steel Components
M. Topic, R. Bucher, W.J.J. Vorster, S.Y. Zhang, P. McGrath and A.M. Korsunsky ................................................................. 299

The Influence of Aluminium Alloy Quench Sensitivity on the Magnitude of Heat Treatment Induced Residual Stress
J.S. Robinson and D.A. Tanner ................................................................. 305

Effect of Residual Stress on High Temperature Deformation in a Weld Stainless Steel
R.C. Wimpory, F.R. Biglari, R. Schneider, K.M. Nikbin and N.P. O'Dowd ................................................................. 311

Influence of Heat Treatment and Grinding Conditions on Surface Residual Stresses in the Production of Rollers
V. Güley, A. Erman Tekkaya, T. Savaş and F. Özhan ................................................................. 317

Residual Stress Prediction and Relaxation in Welded Tubular Joints under Constant Cyclic Loading
Z. Barsoum ................................................................. 323
SESSION 3C: SIMULATION III

Numerical and Experimental Analysis of Residual Stress Induced by Elastic-Plastic Bending, Tension or Torsion Loading
A. Lahlal, J.M. Sprauel and H. Michaud ......................................................... 331

Analysis of the Impact of a Shot at Low Velocity Using the Finite Element Method. Application to the Ultrasonic Shot-Peening Process
F. Cochennec, E. Rouhaud, D. Retraint, S. Rouquette and A. Roos ........................................ 337

Residual Stress Analysis in Shot Peened and Fretting Fatigued Samples by the Eigenstrain Method
A.M. Korsunsky, K.M. Kim and G.M. Regino ....................................................... 343

Finite Element Simulation of the Residual Stress States after Shot Peening
M. Klemenz, V. Schulze, O. Vöhringer and D. Löhe .............................................. 349

Residual Stresses due to High Temperature Annealing. Mathematical Model and Calculations
O.R. Hachkevych, V.S. Mykhailyshyn and A. Ravska-Skotnichna .................................. 355

INVITED LECTURE

Influence of Residual Stress Redistribution on Fatigue Crack Growth and Damage Tolerant Design
L. Edwards ........................................................................................................ 363

SESSION 4A: MEASURING METHODS IV

Neutron and X-Ray Diffraction Analysis of Residual Stresses in Cold-Rolled Pearlitic Steel Sheet
M. Seefeldt, A. Walentek, P. Van Houtte, M. Vrána and P. Lukáš ........................................ 375

Residual Stress in Railway Rails by IP/\cos\alpha Method

Feasibility of Thermal Strain Measurements during Quasi-Steady State Using Neutron Diffraction

A Comparison of Strain Measurements on an Inertia Friction Weld Using the ENGIN-X and SALSA Neutron Strain Mapping Instruments
M. Karadge, B. Grant, G. Bruno, J.R. Santisteban, P.J. Withers and M. Preuss .......................... 393

SESSION 4B: MATERIAL PROCESSING IV

Residual Stresses in Welded Joints after Different Mechanical Surface Treatments
T. Nitschke-Pagel and H. Eslami-Chalandar .................................................................. 401

Characterisation of Residual Stresses by X-Ray Diffraction of Laser Welded AZ91 Magnesium Alloy
A. Kouadri and L. Barrallier ...................................................................................... 407

Residual Stresses in Laser Beam Welded Butt Joints of the Airframe Aluminium Alloy AA6056
P. Staron, W.V. Vaidya, M. Koçak, J. Homeyer and J. Hackius ........................................... 413

Residual Stress Analysis of Laser Welded Aluminium T-Joints Using Neutron Diffraction
F.S. Bayraktar, P. Staron, M. Koçak and A. Schreyer ................................................ 419

SESSION 4C: SIMULATION IV

Diffraction Post-Processor for Polycrystalline Plasticity Modelling
D. Dini, A.M. Korsunsky and F.P.E. Dunne ................................................................ 427

Numerical Simulation of Residual Stresses during the Heat Treatment of Dies Made of Hot Work Tool Steel
C. Redl, C. Friesenbichler and V. Wieser .................................................................. 433
Numerical and Analytical Scale-Transition Prediction of Hygro-Mechanical Stresses in Multidirectional Carbon-Epoxy Laminates
S. Fréour, F. Jacquemin and R. Guillén

Letterbox Type Repair Weld Finite Element Simulation and Residual Stress Prediction

SESSION 5A: MEASURING METHODS V
Ultrasonic Stress Measurement in Welded Component by Using Lcr Waves: Analysis of the Microstructure Effect
H. Qozam, J. Hoblos, G. Bourse, C. Robin, H. Walaszek, P. Bouteille and M. Cherfaoui

Ultrasonic Stress Measurement: Application to Preload Assessment on Already Tightened Bolts
P. Bouteille and H. Walaszek

A new Approach in Residual Stresses Analysis by Speckle Interferometry
A. Maras, G. Montay, O. Sicot, E. Rouhaud and M. François

Laser Photoacoustic Microscopy of Mechanical Stresses in Modern Ceramics and Metals
K.L. Muratikov and A.L. Glazov

SESSION 5B: MATERIAL PROCESSING V
Experimental Study of the Influence of a Trailing Heat Sink on the Welding Residual Stress Distribution
E.M. van der Aa, M.J.M. Hermans, I.M. Richardson, N.M. van der Pers and R. Delhez

Development and Effects of Residual Stresses in Joints Produced by Electromagnetic Compression and its Implication on the Mechanical Properties
P. Barreiro, V. Schulze and D. Löhre

Post-Weld Heat Treatment Stress Relaxation in Zircaloy 4 Plasma Welds

Development of Instrument for Residual Stress Measurement in a 50 mm Inner Diameter Power Generation Pipes
M. Belassel, J. Pineault and M.E. Brauss

SESSION 5C: SIMULATION V
Effect of Grain Size Distribution on Second Order Stresses in Plastically Deformed Polycrystals
S. Berbenni and M. Berveiller

D. Gloaguen, J. Fajou, B. Courant and R. Guillén

Numerical Simulation of Residual Stresses at the Grain and Sub-Grain Length Scale Using Atomistic Modeling
R. Rentsch and E. Brinksmeier

Plastic Heterogeneities Characterisation in 16MND5 RPV Steel by X-Ray Diffraction, Comparison with Finite-Element Approach
J.P. Mathieu, D. Bouscaud, K. Inal, S. Berveiller and O. Diard

SESSION 6A: MEASURING METHODS VI
Measuring the Variation of Residual Stress with Depth: A Validation Exercise for Fine Incremental Hole Drilling
A.T. Fry and J.D. Lord

Residual Stress Analysis in Crankshaft Using the Hole Drilling Method
G. Montay, A. Cherouat and J. Lu

Method for Mapping Multi-Axial Residual Stresses in Continuously-Processed Bodies
A.T. DeWald and M.R. Hill
Deep Hole Drill Residual Stress Measurement Technique Experimental Validation
W.R. Mabe, W.J. Koller, A.M. Holloway and P.R. Stukenborg ........................................ 549

Application of Hole-Drilling Method in Practice
B. Podgornik, J. Vizintin and F. Kopač ................................................................. 555

SESSION 6B: MATERIAL PROCESSING VI

Measurement and Interpretation of Residual Stresses Induced in Ti-17 by Machining Conditions
S. Fréour, E. Girard and R. Guillén ................................................................. 563

Effect of Laser Assistance Machining on Residual Stress and Fatigue Strength for a Bearing Steel (100Cr6) and a Titanium Alloy (Ti 6Al 4V)
G. Germain, F. Morel, J.L. Lebrun, A. Morel and B. Huneau ........................................ 569

Influence of Work Material Properties on Residual Stresses and Work Hardening Induced by Machining
J.C. Outeiro and A.M. Dias ................................................................. 575

Residual Stress in High-Pressure Water Jet Assisted Turning of Austenitic Stainless Steel
M. Habak, J.L. Lebrun, S. Waldmann, P. Robert and C. Fischer ........................................ 581

Characterisation of Residual Stresses in Machined Surfaces of a High Strength Nickel-Base Superalloy
W. Li, M. Preuss, P.J. Withers, D. Axinte and P. Andrews ........................................ 587

SESSION 6C: LAYERS I

Residual Stresses Gradient Determination in Cu Thin Films
J. Peng, V. Ji, J.M. Zhang and W. Seiler ................................................................. 595

X-Ray Diffraction Analysis of Nonuniform Residual Stress Fields ηii(τ) under Difficult Conditions
M. Klaus, I.A. Denks and C. Genzel ................................................................. 601

Residual Stress Gradients in PVD-Coated Carbide Cutting Tools
B. Denkena and B. Breidenstein ................................................................. 607

Measurement of Residual Stresses in Thin Films by Two-Dimensional XRD
B.B. He ................................................................. 613

Residual Stress Evolution during Decomposition of Ti(1-4)Al(4)N Coatings Using High-Energy X-Rays
M.R. Terner, P. Hedström, J. Almer, J. Ilavsky and M. Odén ........................................ 619

POSTER SESSION II

A Comparative Study of Microstructure and Residual Stresses of CMT-, MIG- and Laser-Hybrid Welds
H. Pinto, A. Pyzalla, H. Hackl and J. Bruckner ................................................................. 627

Strain Scan and Texture of an Anhydrite-Dolomite Rock from the Piora-Syncline (Switzerland)
C. Scheffzüük, K. Wälther, A. Frischbutter and R. Naumann ........................................ 633

In Situ Neutron Diffraction Study on the Mechanical Behavior of an Ultra-Fine-Grained Steel

SESSION 7A: MEASURING METHODS VII

Determination of Welding Residual Stresses with Help of the Micromagnetic Measurement Method
M. Bruns and T. Nitschke-Pagel ................................................................. 647

Measurement of Residual Stress in an A533B Ferritic Steel Plate Containing a Repair Weld
X. Ficquet, C.E. Truman and D.J. Smith ................................................................. 653
Layer Growing/Removing Method for Determination of Residual Stresses in Thin Orthotropic Inhomogeneous Discs
J. Koo and J. Valgur ................................................................. 659

Residual Strain Measurement of C/C-SiC Tubes at High Temperature
R.C. Wimpory, C. Ohms, P. Horňák, D. Neov and A. Youtosos ......................................................... 665

Residual Stress Measurements in Single and Multi-Pass Groove Weld Specimens Using Neutron Diffraction and the Contour Method

SESSION 7B: MATERIAL PROCESSING VII

The Effect of Plastic Anisotropy on the Residual Stress within a 316L Stainless Steel Bead-on-Plate Specimen
M. Turski, S. Pratihar, L. Edwards, M.R. Daymond and M.E. Fitzpatrick ............................................. 679

Grinding-Induced Residual Shear Stresses
B. Okolo and A. Wanner .......................................................... 685

Evaluation of Subsurface Distribution of Residual Stress in Austenitic Stainless Steel Using Strain Scanning Method

Residual Stress Evaluation of Ni Based Weld Metal Using Neutron Diffraction Method
S. Okido, H. Suzuki and K. Saito ................................................. 697

Residual Stresses and Accuracy of Pipe Preparations by Manufacture Zirconium Tubes for the Nuclear Industry
G. Kolmogorov, E. Kuznetsova and V. Filippov ................................................................. 703

SESSION 7C: LAYERS II

Stress Factors and Absolute Residual Stresses in Thin Films Determined by the Combination of Curvature and sin^2Ψ Methods
K.J. Martinschitz, E. Eiper and J. Keckes .............................................. 711

Effect of Surface Nano Crystallization on Tribological Properties of Stainless Steel
T. Roland, D. Retraint, K. Lu and J. Lu ........................................... 717

Stresses Analysis on Coarse Grain Zn Film during Tensile Loading
W.J. Huang, V. Ji and W. Seiler ....................................................... 723

Scratch Test of TiCN Thin Films with Different Preferred Orientation
H. Goto, M. Gotoh, S. Ejiri, Y. Horimoto and Y. Hirose .......................................................... 729

Strains, Stresses and Elastic Properties in Polycrystalline Metallic Thin Films: In Situ Deformation Combined with X-Ray Diffraction and Simulation Experiments
P. Goudeau, D. Faurie, B. Girault, P.O. Renault, E. Le Bourhis, P. Villain, F. Badawi, O. Castelnau, R. Brenner, J.L. Béchade, G. Geandier and N. Tamura .................................................. 735

SESSION 8A: MEASURING METHODS VIII

Oxford HEXameter: Laboratory High Energy X-Ray Diffractometer for Bulk Residual Stress Analysis
A.M. Korsunsky, S.Y. Zhang, D. Dini, W.J.J. Vorster and J. Liu .................................................. 743

A New Type of X-Ray Diffractometer with Cooperating Robots for Residual Stress Analysis on Large Components
R. Hessert, W. Satzger, A. Haase and A. Schaefermeister .......................................................... 749

Effect of Detector Width and Peak Location Technique on Residual Stress Determination in Case of Work-Hardened Materials
M. Belassel, E. Bocher and J. Pineault ........................................... 755

Specific Corrections Associated to Linear CCD Detectors Used in X-Ray Diffraction
C. Ferreira, M. François and R. Guillén ........................................... 761
SESSION 8B: MULTIPHASE MATERIALS

Internal Stress Development during Fatigue Cycling of High-Strength Al/SiC Metal Matrix Composites
M.E. Fitzpatrick

Effective Stresses and Plastic Strain Rates in a Superalloy: a High Temperature In Situ Study by Synchrotron X-Ray TCD
A. Jacques, O. Ferry, F. Diologent, P. Caron and P. Bastie

Varistor Ceramic: Residual Strain and Texture Analysis by Neutron Time-of-Flight Diffraction
C. Scheffzlik, P. Kluge-Weiss and F. Greuter

Residual Stresses in Sintered Diamond-Cobalt Composites

SESSION 8C: LAYERS III

Data Collection Requirements for the Analysis of Residual Stress in Polycrystalline Coatings
A.C. Vermeulen and D. Götz

Interdiffusion and Stress Development in Thin Film Diffusion Couples

Evaluation of Deformation Behavior in Cu Thin Film under Tensile and Fatigue Loading by X-Ray Method
Y. Akiniwa, T. Suzuki and K. Tanaka

Dependence Between Aging Treatments and Residual Stresses on Composite Laminate
O. Sicot, X.L. Gong, X.J. Gong, A. Cherouat and J. Lu

SESSION 9A: PHASE TRANSFORMATION I

Evolution of Residual Strains in Metastable Austenitic Stainless Steels and the Accompanying Strain Induced Martensitic Transformation
P. Hedström, J. Aimer, U. Lienert and M. Öden

The Effect of Phase Transformations on Predicted Values of Residual Stresses in Welded Ferritic Components
A.P. Warren, S.K. Bate, R. Charles and C.T. Watson

Residual and Internal Stress States in Duplex Steel with TWIP Effect
M.N. Shiekhelsouk, V. Favier, K. Inal, S. Allain, O. Bouaziz and M. Cherkaoui

SESSION 9B: MICRO AND INTERGRANULAR STRESSES I

Quantitative Estimation of the Second Order Plastic Incompatibility Stresses in Textured Duplex Steel
S. Wróński, A. Baczmański, K. Wierzbanowski, C. Brahm, R. Dakhlaoui and E.C. Oliver

In Situ X-Ray Diffraction Study of Load Partitioning and Microyielding for the Super Duplex Stainless Steel SAF2507 (UNS S32750)

Development of Intergranular Stresses in Zirconium Alloy Cladding Tubes: Experimental and Numerical Studies
D. Gloaguen, E. Girard and R. Guillem

Second Order Stresses Distribution in Textured Copper
N. Hfaiedh, M. François and K. Saanouni

SESSION 9C: LAYERS IV

Residual Stress Evaluation in TiN Coatings Used for Erosion Protection of Aerospace Components
M. Bielawski
### Measurement of Residual Stresses in Electrochemically Metallized Coatings on Thin Cross-Cut Ring Substrate

H. Lille, J. Kóó, A. Ryabchikov and T. Pihl

### Residual Stress in EB-PVD Thermal Barrier Coatings

K. Suzuki, K. Tanaka and T. Shobu

### Comparative Studies of Textured Pulsed Laser Deposition and Sol-Gel Growth of Thin Hydroxyapatite Layers on Titanium Substrates

A. Carrado, A. Fabre, L. Barrallier, N. Viart, I.N. Mihailescu, G. Socol, S. Grigorescu, J. Werckmann, S. Ciucă and M. Tarcolea

### SESSION 10A: PHASE TRANSFORMATION II

#### Intergranular Strain and Phase Transformation in a Cobalt-Based Superalloy

#### Fatigue Degradation and Martensitic Transformation of Austenitic Stainless Steel AISi 321: New Results and Prospects

Y.V. Taran, J. Schreiber, M.R. Daymond and E.C. Oliver

#### Stress Determination during the Mechanically-Induced Martensite Phase Transformation in the Superelastic Alloy CuAlBe by Neutron Diffraction

B. Malard, T. Pirling, K. Inal, E. Patoor and S. Berveiller

#### Residual Stress and Microstructure in the Rail/Wheel Contact Zone of a Worn Railway Wheel

E. Wild and W. Reimers

#### On the Development of Grain-Oriented-Dependent and Inter-Phase Stresses in a Super Duplex Stainless Steel under Uniaxial Loading

### SESSION 10B: MICRO AND INTERGRANULAR STRESSES II

#### Evolution of Microstrains at Cyclic Incremental Deformation of Steel 42CrMo4

L.W. Meyer, C. Kuprin, G. Fritsche and F. Hahn

#### In Situ X-Ray Stress Analysis for the Highly Textured Mg-Base Wrought Alloy AZ31

J. Gibmeier, M. Göttig, W. Zinn and B. Scholtes

#### Formation and Interpretation of Micro Residual Stresses in Cold Deformed Brass Alloys

B. Reetz and W. Reimers

#### X-Ray Stress Estimation of Carbide in Spheroidized JIS SK5 Steel

L. Che, M. Gotoh, Y. Horimoto and Y. Hirose

### SESSION 10C: LAYERS V

#### Mechanical Properties of Hydroxyapatite in Bone at the Interface with Implants

A. Benmarouane, T. Hansen, P. Millet and A. Lodini

#### The Measurement of Stresses within Oxides Produced on Austenitic and Ferritic Steels Using Raman Spectroscopy

G. Hilson, K.R. Hallam and P.E.J. Flewitt

#### Dependence of Oxidation Behavior and Residual Stresses in Oxide Layers on Armco Iron Substrate Surface Condition

C. Juricic, H. Pinto, T. Wroblewski and A. Pyzalla

#### Residual Stress Analysis in Reed Pipe Brass Tongues of Historic Organs

A. Manescu, A. Giuliani, F. Fiori and B. Baretzky

#### Neutron Strain Scanning of Archaeological Bronzes

J.R. Santisteban, S. Siano and M.R. Daymond
