FOUNDATIONS FOR THE FUTURE IN MATHEMATICS EDUCATION

Edited by

Richard A. Lesh
Indiana University

Eric Hamilton
U.S. Air Force Academy—Colorado

James J. Kaput
## CONTENTS

**Preface**
Foundations for the Future in Engineering and other Fields That Are Heavy Users of Mathematics, Science and Technology .......................... vii
*Richard Lesh*

**PART I**
What Changes are Occurring in the Kind of Problem-Solving Situations Where Mathematical Thinking Is Needed Beyond School? .......................... 1
*Eric Hamilton*

**Chapter 1**
The Meanings of Statistical Variation in the Context of Work .... 7
*Celia Hoyles and Richard Noss*

**Chapter 2**
Problem-Solving and Learning in Everyday Structural Engineering Work ................................................. 37
*Julie Gainsburg*

**Chapter 3**
Modeling Without End: Conflict Across Organizational and Disciplinary Boundaries in Habitat Conservation Planning .... 57
*Bruce Evan Goldstein and Rogers Hall*

**Chapter 4**
Mathematical Modeling ‘in the Wild’: A Case of Hot Cognition ... 77
*Wolff-Michael Roth*

**Chapter 5**
Learning in Design ......................................................... 99
*David Williamson Shaffer*

**Chapter 6**
*Rafael Núñez*

**PART II**
*Richard Lesh*

**Chapter 7**
Models, Simulations, and Exploratory Environments: A Tentative Taxonomy .................................................. 161
*Judah L. Schwartz*
Chapter 8  Technology Becoming Infrastructural in Mathematics Education ................................................................. 173  
Jim Kaput, Richard Lesh, and Steve Hegedus

Chapter 9  Why Build a Mathematical Model? Taxonomy of Situations That Create the Need for a Model to Be Developed .......... 193  
Maynard Thompson and Caroline Yoon

Chapter 10  Cultivating Modeling Abilities ................................................................. 201  
Caroline Yoon and Maynard Thompson

Joseph G. Rosenstein

Chapter 12  Formalizing Learning as a Complex System: Scale Invariant Power Law Distributions in Group and Individual Decision Making ................................................................. 225  
Thomas Hills, Andrew C. Huford, Walter M. Stroup, and Richard Lesh

Chapter 13  Systemics of Learning for a Revised Pedagogical Agenda ...... 245  
Andrea A. diSessa

Chapter 14  The DNR System as a Conceptual Framework for Curriculum Development and Instruction ......................... 263  
Guershon Harel

Chapter 15  Aspects of Affect and Mathematical Modeling Processes ...... 281  
Gerald A. Goldin

PART III  What Kind of Instructional Activities are Are Needed to Develop New Levels and Types of Understanding and Ability? ................................................................. 297  
Richard Lesh and Jim Kaput

Chapter 16  Beyond Efficiency: A Critical Perspective of Singapore’s Educational Reforms .............................................. 301  
Mani Le Vasan, Richard Lesh, and Mardiana Abu Bakar

Chapter 17  John Dewey Revisited—Making Mathematics Practical versus Making Practice Mathematical ................................. 315  
Richard Lesh, Caroline Yoon, and Judi Zawojewski

Chapter 18  The Use of Reflection Tools in Building Personal Models of Problem-Solving .............................................. 349  
Eric Hamilton, Richard Lesh, Frank Lester, and Caroline Yoon
Walter M. Stroup, Nancy Ares, Andrew C. Hurford, and Richard Lesh

Chapter 20  When the Model Is a Program  395
Fred G. Martin, Margret A. Hjalmarson, and Phillip C. Wankat

Chapter 21  Uncertainty and Iteration in Design Tasks for Engineering Students  409
Margret A. Hjalmarson, Monica Cardella, and Phillip C. Wankat

Chapter 22  Teacher Development in a Large Urban District and the Impact on Students  431
Roberta Y. Schorr, Lisa Warner, Darleen Gearhar, and May Samuels

Chapter 23  Directions for Future Research  449
Richard Lesh, Eric Hamilton, and Jim Kaput

Author Index  455
Subject Index  463
