
Edited on behalf of the Gesellschaft für Ökologie / Ecological Society of Germany, Austria and Switzerland by Thomas S. Hoffmeister and Martin Diekmann
Preface .......................................................................................................................... xxvii

List of Symposia and Convenors .............................................................................. xxviii

Keynote Lectures ........................................................................................................ xxx

Symposium 01: Global Change Ecology ...................................................................... 1
Climate change disrupts the synchrony in food chain phenology
   M.E. VISSER .............................................................................................................. 2
Some like it hot: Voltinism patterns of Gomphus vulgatissimus under the influence of climate change
   E. BRAUNE, D. SÖNDGERATH, F. SUHLING, O. RICHTER ...................................... 3
Interspecific comparative analyses of demographic responsiveness to climatic variability: seabirds as a model system
   H. SANDVIK ............................................................................................................. 4
From ecological field observations to physiology and back - explaining field observations from physiology?
   R. KNUST, C. BOCK, G. LANNIG, F. SARTORIS, H.O. PÖRTNER ................................ 5
Global change in Antarctic pelagic ecosystems: Effects of bottom-up regulation (iron fertilisation) and top-down control (krill-salp interactions) on plankton biomass
   U. BATHMANN ET AL. .......................................................................................... 6
Water temperature and mixing depth in late winter affect seasonal succession of the plankton
   S. DIEHL, S.A. BERGER, H. STIBOR, G. TROMMER, M. RUHENSTROTH .................. 7
The role of fish in the Antarctic food web - implications for food web vulnerability to environmental change and perturbation
   K. MINTENBECK, T. BREY, U. JACOB, R. KNUST ............................................... 8
Growth or defence: Performance of Populus spec. under changing environmental conditions
   Z. LUO, C. CALFAPIETRA, L. PIETROSANTI, E. EENSALU, A. POLLE ....................... 9
Effects of simulated environmental change on epidermal UV-B transmission and concentration of phenolic compounds in three alpine plant species
   L. NYBAKKEN, K. KLANDERUD, Ø. TOTLAND .................................................. 10
A species rich alpine pasture under the combined effects of increased atmospheric ozone and nitrogen deposition
   M. VOLK, S. BASSIN, N. BUCHMANN, J. FUHRER ............................................ 11
Effects of elevated atmospheric CO$_2$ concentrations on carbon turnover processes in an agro-ecosystem
   K. HEIDUK, A. PACHOLSKI, R. MARTHEN, H.-J. WEIGEL ................................. 12
Effect of nitrogen deposition reduction on biodiversity and carbon sequestration
Impact of climate change on annual plant communities in the eastern Mediterranean
   J. METZ, K. TIELBÖRGER .................................................................................... 14
Estimating extinction probabilities of annual plant species under climate change: an experimental approach
C. Lampe, K. Tiellbörger ................................................................. 15

Projecting ecosystem response to climate extremes
A. Rammig, A.M. Jonsson, B. Smith, L. Bärring, M. Sykes ..................... 16

Semi-arid grazing systems under climate change – present model shortcomings and ways to handle them
B. Tietjen, F. Jeltsch, E. Zehe .......................................................... 17

Impacts of topography and landuse on vegetation dynamics and hydrological processes in a semi-arid environment
A. Popp, M. Vogel, A. Groengroeft, F. Jeltsch .................................... 18

Drought effects in temperate grasslands: An experiment in three Swiss grasslands at different altitudes
A.K. Gilgen, M. Scherer-Lorenzen, N. Buchmann .................................. 19

Influence of drought stress to the root hydraulic system of different age stages of Fagus sylvatica and Quercus petraea
B. Rewald, C. Leuschner ................................................................. 20

Opposite trends of performance in the life cycle of annual plants caused by daily precipitation variability
M. Köchy, F. Jeltsch .......................................................... 21

Proline accumulation in leaves, shoots, and roots of young trees after different irrigation regimes
B. Rewald, C. Leuschner ................................................................. 22

-1.5 MPa – The universal permanent wilting point?
B. Rewald, J. Schumann, C. Leuschner ................................................ 23

Elevated atmospheric CO₂ – consequences for wheat grain quality and human nutrition?

Effects of elevated atmospheric CO₂ concentration on minerals and energy content of wheat and associated weeds
G. Bermejo, K. Becker, P. Högy, A. Fangmeier ...................................... 25

Long-term effect of fen-restoration on the C-balance and the GWP-balance
M. Drosler, L. Bergmann, A. Freibauer, H.F. Jungkunst, R. Schultz, B.S.
Höll, S. Fiedler ................................................................. 26

Impact of climate change on the coastal flora of N-Germany
D. Metzing .......................................................... 27

Changes in plant species composition following a climatic gradient in West Africa
M. Schmidt, A. Ouédraogo, A. Thiombiano, K. Hahn-Hadjiali, G. Zizka, R.
Wittig .......................................................... 28

Climatic gradients and ecosystem functioning at a deserts margins and their consequences for the impact of climate change
M. Veste, T. Littmann, S.-W. Breckle, A. Yair .................................... 29

Consequences of climate change for stocking rates of sheep and goats in the Mediterranean
M. Mathaj, F. Jeltsch et al ................................................................. 30

Species distribution models for the ptarmigan (Lagopus mutus) at two different scales in the Swiss Alps and the effect of global change
R. Revermann, N. Zbinden, H. Schmid, B. Schröder ................................ 31
Species distribution modelling and predictions on future habitat suitability for blackbird and ring ouzel in Switzerland
J. von dem Bussche, R. Spaar, H. Schmid, N. Zbinden, B. Schröder ........................................ 32
Feeding responses of the pelagic tunicate Salpa thompsoni to an iron induced
phytoplankton bloom in the Southern Polar Frontal Zone (EIFEX)
L. von Harbour, I. Peeken, U. Bathmann, S. Jansen, S. Kragefsky ........................................ 33
Sealing Carbon and Life in the Ecotron (SCALE)
A. Milcu, P. Manning, A. Heinemeyer, H. Vallack, P. Ineson ........................................ 34
Effects of increasing drought on choice of commercial forest trees in Bavaria
C. Zang, A. Rothe, H. Pretzsch ........................................ 35

Symposium 02: Multitrophic Interactions ........................................ 36
Multitrophic interactions: Past, present, and future
G.B. de Deyn ........................................ 37
Plant response to multiple herbivore attack
S. Wurst, W.H. van der Putten ........................................ 38
Habitat structure and chemical diversity: How host and non-host plants affect an
herbivore - parasitoid interaction
B. Randlkofer, T. Meiners, E. Obermaier ........................................ 39
Effects of secondary plant products on the feeding behaviour of termites – a behavioural
and neurophysiological approach
S. Gross, M. Kaib, G. Hardiess, S. Mikus, K. Feher, W. Francke ........................................ 40
Evolutionary arms race between fungi and insects
A. Vlcsinksas ........................................ 41
Earthworms and litter decomposition in
A. Milcu, S. Partsch, S. Scheu ........................................ 42
Influence of fungivorous soil invertebrates on the seed bank persistence of grassland
species under field conditions
N. Mitschunas, J. Films ........................................ 43
Characteristics of soil fungi affecting the predation by Collembola
J. Böllmann, M. Elmer, J. Wöllecke, R.F. Hüt tl........................................ 44
Top-down control of herbivorous nematodes by soil microorganisms in coastal sand
dunes
A.M. Piskiewicz, W.H. van der Putten ........................................ 45
Fatty acids as biomarkers – a new tool for decomposer food web studies
L. Ruess, D. Haubert, M.M. Hägbblom, S. Scheu ........................................ 46
Impact of plant colonizing soil fungi on the invasive root feeding herbivore Diabrotica
virgifera virgifera mediated via the host plant
J. Moeser, S. Vidal ........................................ 47
Predator diversity drives pair-wise interaction strength and trophic cascades in a natural
food web
S.B. Otto, U. Brose ........................................ 48
Dealing with high predation risks: How aphid parasitoids interact with aphid predators
R. Meyhöfer ........................................ 49
Prey and predator spectra of the flower-dwelling crab spider species Misumena vatia
and consequences for seed set
R. Brechbühl, S. Bacher ........................................ 50
Consequences of microhabitat diversification on agrobiotic generalist predators
K. Birkhofer, D.H. Wise, S. Scheu ........................................ 51
Microbial diets in a host parasitoid interaction – quality or quantity?
M. DORSCH, M. ROHLFS 

Variable response in host habitat selection – do parasitoid mothers know what they do?
J. STARK, M. ROHLFS 

Multitrophic interactions between red spider mites and coffee infested with leaf miners and rust pathogens, linking preferences to reproduction
A. TEODORO, A.-M. KLEIN, T. TSCHARNTKE 

Structure and diversity of host and non-host plants influence herbivore oviposition, egg parasitism and larval development: A test of the preference-performance hypothesis
E. MÖLLER, T. MEINERS, H.J. POETHKE, B. RANDLKOFER, E. OBERMAIER 

Host plant finding in the specialized leaf beetle Cassida canaliculata – an analysis of small-scale movement behavior
A. HEISSWOLF, S. ULMANN, E. OBERMAIER, O. MITESSER, H.J. POETHKE 

What is the price of a plant’s direct defences?
A. STEPPUHN, I. BALDWIN 

Effects of plant genotype on tritrophic interactions
A. KEMPEL, R. BRANDL, M. SCHÄDLER 

Pollinator diversity and plant-pollinator interaction in a gradient of plant species diversity
A. RICHTER, A.-M. KLEIN, T. TSCHARNTKE, W. WEISSER 

Influence of the structure of decomposer fauna on an artificial plant community
M. SCHÄDLER, A. LINDFELD, C. SCHELHORN, R. BRANDL 

Interactions between saprophytic fungi and fungivorous microarthropods in the belowground system
S. STAADEN, S. SCHEU 

Down from the top: honeydew as a carbon source for soil organisms
J. SEEGER, J. FILSER 

Do different plant traits promote dissimilar soil decomposer communities?
C. WITT, H. SETÅLA 

You are what you eat - but for whom are you meat? Insights from a complex marine network
U. JACOB, U. BROSE, T. BREY 

Field specific forecasting models based on pheromone trap catches – The prediction of spinach infestations by caterpillars of the silver Y moth (Autographa gamma)
T. KLUG, T.S. HOFFMEISTER, R. MEYHÖFER 

How arthropods can help explaining the ecological function of secondary metabolism in fungi
M. ROHLFS, M. ALBERT, N.P. KELLER, F. KEMPKEN 

Effects of root herbivory on aboveground multitrophic insect interactions: A field study
S.V. SCHAPER, R. SOLER, J.A. HARVEY, T.S. HOFFMEISTER 

Symposium 03: Cognitive Ecology 

Cognitive ecology of finding ones way and getting at resources
Y. WINTER 

Bat Time Stories - Foraging on spatio-temporally predictable resources
U. TÖLCH, Y. WINTER
Male orchid bees as master perfumers: How to put together species-specific fragrance bouquets from unpredictable sources?
T. ELTZ ........................................................................................................ 72

Cognitive ecology: how territorial songbirds gather information about each other
M. NAGUIB ..................................................................................................... 73

A closer look at searching behavior on patches – why do animals leave when they leave?
C. DIECKHOFF, T. S. HOFFMEISTER ............................................................ 74

Contrasting signals: How parasitoids deal with conflicting environmental information
T. MEINERS, A. WERKHAUSEN ................................................................. 75

Long-term effect of decision-making on male bumblebees (Bombus terrestris)
T. SEIFAN, Y. KAREEV, U. MOTRO .......................................................... 76

The evolution of learning ability in Drosophila melanogaster – a double selection experiment
M. KOLSS, T. J. KAWECKI ........................................................................... 77

Ecological memory: Potential adaptations of memory formation to host distribution in parasitic wasps
J. L. M. STEIDLE, J. COLLATZ, D. SCHURMANN ....................................... 78

Foraging in risk-homogeneous landscapes
J. ECCARD, T. LIESENJOHANN .................................................................... 79

Selective information use in parasitoid wasps
A. THIEL, T. S. HOFFMEISTER ................................................................. 80

Patch quality assessment from a distance – the response of Venturia canescens to patch odours
Y. LIU, A. THIEL, T. S. HOFFMEISTER .................................................... 81

The decision to help – a question of gender? Altruism in humans
K. M. HALLER, B. DÖRR, N. FISCHER, S. HARDENBERG, T. S. HOFFMEISTER 82

Symposium 04: Gene Ecology and Risk Analysis ....................................... 83

Biotechnology in agriculture - it may not be popular but we may need it in Europe
B. R. JOHNSON ................................................................................................ 84

How modelling of crop-to-crop gene flow in Maize can help to manage co-existence
K. LIPSUS, M. LANGHOF, R. WILHELM, G. RÜHL, K. SCHMALSTIEG, O. RICHTER 85

Standardisation of GMO pollen monitoring
F. HOFMANN .................................................................................................. 86

Effects of Bt-corn on the soil macro- and mesofauna
L. HÖNEMANN, W. NENTWIG .................................................................... 87

Uptake, ingestion and excretion of Bt-toxin by earthworms (Lumbricus terrestris) and slugs (Arion lusitanicus, Deroceras reticulatum)
C. ZURBRÜGG, W. NENTWIG ...................................................................... 88

Stepping stones for gene flow from cultivated oilseed rape (Brassica napus L.)
B. ELLING, W. BLEEKER, B. NEUFFER .................................................... 89

Genetic tradeoff as a model for parapatric speciation
O. JAKOBY, P. A. WHIGHAM ....................................................................... 90

The risk of introgression of foreign genes in Populus spec. – Differences in the flowering phenology of P. nigra and P. x canadensis
M. NIGGEMANN, G. RATHMACHER, R. BIAŁOŻYŻ .................................. 91

The development of a genetic hybrid poplar register
G. RATHMACHER, M. NIGGEMANN, B. ZIEGENHAGEN, R. BIAŁOŻYŻ ........... 92
Genetic diversity and colony densities of the Common Carder Bee *Bombus pascuorum* in differentially structured landscapes

F. Herrmann, C. Westphal, R.F.A. Moritz, I. Steffan-Dewenter

Conservation of domestic poultry breeds in Georgia and creation of gene banks

K. Nadiradze, L. Djikia

---

Symposium 05: Habitat Fragmentation

Effects of the past on forest plant species diversity & composition in the context of a history of fragmentation

M. Hermy

Habitat size and landscape diversity affect wild bee communities in fragmented calcareous grasslands

B. Meyer, I. Steffan-Dewenter

No evidence of a plant extinction debt in highly fragmented calcareous grasslands in Belgium

D. Adriaens, O. Honnay, M. Hermy

Human impact, seed dispersal, seed predation and regeneration of a tropical rainforest in Kenya

N. Farwig, K. Böhning-Gaese

Fragments of woodland habitats as remnants of natural biodiversity in the urban areas of the city of Bremen - structural diversity as a key factor

K. Nüssel, P. Schaffer, D. Zacharias

Short term transfiguration of matrix into hospitable habitat facilitates gene flow and circumvents fragmentation

N. Blaum, M. Wichmann, E. Rossmanith

Comparison of wind and external animal dispersal for species with fragmented habitats

H. Will, O. Tackenberg

Edge effects dominate hydrological processes in fragmented woodlands

M. Herbst, J.M. Roberts, D.J. Gowing

Habitat size, isolation, and quality determine the distribution of a monophagous leaf beetle and its egg parasitoid in a fragmented landscape

A. Heisswolf, S. Reichmann, E. Obermaier, B. Schröder, H.J. Poethke

Habitat fragmentation in an urban environment - ecological consequences for epigeic beetle communities

R. Deichsel

Adaptive immune gene variability determines population health

Y. Meyer-Lucht, S. Sommer

Are ancient forests ecologically fragmented by surrounding semi-natural spruce stands?

M. Manegold, A. Bogenrieder

Comparing species diversity in urban and rural protected areas in a Central German landscape

S. Knapp, I. Kühn, V. Mosbrugger, S. Klotz

Genetic structure of peripheral and central populations of three endangered floodplain violets

R.L. Eckstein, A. Otte

Do seed and germination traits determine distribution patterns of floodplain pioneer species?

S. Pross, I. Leyer
Plant-insect-interactions in the two rare heathland species *Genista anglica* L. and *G. pilosa* L.: Balancing habitat fragmentation effects

M. TSALKI, M. DIEKMANN .......................................................... 111

Changes in population size of four endangered river corridor plants in relation to habitat fragmentation and habitat quality

C. WINTER, M. DIEKMANN .......................................................... 112

Factors influencing the spatial distribution of forest plant species in hedgerows of North-western Germany

S. WEHLING, M. DIEKMANN ......................................................... 113

Arrangement of two subpopulations of *Chorthippus parallelus* in an intensively used agricultural landscape

A. WERZNER, S. HOLZHAUER, A.-C. SANDER, V. WOLTERS .................. 114

Dispersal and genetic diversity of *Vallonia excentrica* (Gastropoda; Stylommatophora) in two differing agricultural landscapes

M. PRETZSCH, A.-C. SANDER, V. WOLTERS ..................................... 115

The impact of local spatial resistance (LSR, 'Raumwiderstand') on the dispersal of *Tenebrio molitor* L.

F. JOPP ..................................................................................... 116

Symposium 06: Biodiversity on Different Spatial Scales ...................... 117

Patterns of alpha- and beta-diversity along the pH gradient in semi-natural woodlands of NW-Germany

C. PEPPLER-LISBACH ................................................................ 118

Plant community response to interacting disturbances

K. SCHIFFERS, F. JELTSCH, K. TIELBÖRGER .................................. 119

Coexistence in highly diverse shrublands – the potential role of plant species regeneration

E. MOSNER, N. ENRIGHT, F. JELTSCH ............................................. 120

Relationship between herb layer and tree layer diversity in deciduous forests

A. MÖLDER, W. SCHMIDT ............................................................ 121

Effects of local and landscape factors on plant species richness in contrasting grassland management regimes

S. KLIMEK, L. MARINI ET AL ........................................................ 122

Scale dependence of bioindicators: Patterns of vegetation and hydrology within springs

C. ZANG, V. AUDORFF, C. BEERKUHNLEIN .................................... 123

Factors influencing relative abundance distributions

M. OLLIK, W. ULRICH ................................................................ 124

Arctic coastal biodiversity: A multi-scale challenge at the terrestrial-marine interface

C.B. COGAN .............................................................................. 125

Niche partitioning of sympatric cheirogaleid lemurs in the littoral rainforest of southeast Madagascar

P. LAHANN .............................................................................. 126

Spatio-temporal patterns and their drivers in the vegetation of a transitional ecosystem - issues of distance and scale

G. JURASINSKI, C. BEERKUHNLEIN ............................................ 127

Performance of forest plant species beyond their range edges: an experimental approach

S. VAN DER VLEKEN, K. VERHEYEN, M. HERMY .............................. 128

Dispersal limitation of plant diversity in grassland ecosystems and its consequences for productivity
Effects of land-use changes on biodiversity in the Eastern Alps

Habitat-specific dependence of local grasshopper diversity on surrounding landscape patterns

Impact of landscape matrix on spider diversity in oilseed rape fields at different spatial scales

Relative importance of landscape effects on biodiversity in different habitat types

Biodiversity of fungus growing termites: a molecular approach

Efficacy of different methods to assess pollinator diversity and density

Biodiversity-productivity patterns - What are the best traits to describe trophical gradients?

Shallow soil and low nutrient availability increase yield effects in mixtures of four common grassland species

Effects of plant species diversity on individual plant performance

Effects of tree species diversity on soil properties in a Central-European deciduous forest

Population genetics of the spring-dwelling caddis fly Agapetus fuscipes (Trichoptera: Glossosomatidae) on a regional scale

Geographic variation within and between populations of the termite Macrotermes michaelseni

Linking spatial population models of selected species to a large-scale vegetation model for the southern Kalahari

Diversity of specialist and generalist beetles in grasslands: comparing factors at local, landscape and regional scales

Small scale diversity in isolated grasslands enclosed in forest

Vegetation-environment relationships in a heavy metal-dry grassland complex

Extensive grazing influences diversity: How do heterogeneity and vegetation structure affect composition of spider communities?

Influence of sown wildflower areas on spiders in wheat: from local to landscape scale
Effect of small-scale disturbances on grassland community dynamics along a productivity gradient - molehills as a case study
M. Seifan, D. Schloz-Murer, K. Tielbörger

The role of plant pathogens for the relationship between plant species diversity and ecosystem processes
T. Rottstock, A. Schmidtke, V. Kummer, M. Fischer

Dependence of productivity and nutrient relations on composition of forest canopy
M. Brauns, F.M. Thomas

Trends in biodiversity, biotic interactions and biogeochemical cycles due to tree species diversity in a Central-European deciduous forest

Structure and diversity of understorey vegetation in deciduous forests with contrasting tree species diversity
A. Mølder, W. Schmidt

Tree species richness as a driver for arthropod diversity in the canopy of a temperate deciduous forest
S. Sobek, I. Steffan-Dewenter, T. Tscharntke

The fine root system of deciduous forests with contrasting tree species diversity in the Hainich National Park (Thuringia)
C. Meinen, D. Hertel, C. Leuschner

Fine root identification at species level in Central European mixed forests
C. Meinen, B. Rewald, D. Hertel, C. Leuschner

Is diversity of mycorrhizal communities related to the diversity of tree species?
C. Lang, A. Polle

FTIR – a new tool to identify ectomycorrhizal species
R. Pena, A. Naumann, C. Lang, A. Polle

Scales crossing dependency of ectomycorrhizal distribution pattern
J. Wöllecke, S. Gebhardt, R.F. Hützl

Plant species richness of the central European landscape on different spatial scales measured with a new approach
J. Dengler, M.-A. Allers

Relations between diversity and realized niches of trees – a comparison between Europe and Eastern North America
M. Manthey

Exploring biodiversity patterns in tropical montane forest vegetation data by nonlinear dimensionality reduction
M. Mahecha, A. Martínez, G. Lischeid, E. Beck

Tidal marshes in the Elbe estuary – diversity and productivity shifts along a salinity gradient
J.G. Engels, K. Jensen

Testing competition and (co-)existence of plant functional types: ranking of life history strategies by modelling
A. Esther, J. Groeneveld, F. Jeltsch, N. Enright, B.P. Miller, B. Lamont

Home field advantage or benefit from being different? Invasion processes in a biodiversity experiment
J.S. Petermann, A.J. Ferguson, B. Schmidt
Spatial diversity revisited – a terminological concept
V. RETZER ................................................................. 165
Factors generating the shape of species – area relationships
M. MICHALAK, W. ULRICH ........................................ 166
Evolution of the agro-ecosystem mosaic in the Emilia-Romagna lowland
M. GENGHINI, L. BONAVIRI ........................................ 167
Parasite communities in the bivalve Cerastoderma edule along a latitudinal coastal gradient in Europe

Symposium 07: Long-term Studies in Ecology ........................................ 169
Long-term ecosystem dynamics in the Serengeti: lessons for conservation and human welfare
A.R.E. SINCLAIR .......................................................... 170
Gap dynamics in natural spruce forests – a long-term study using aerial photographs
S. KAMMERMEIER, H. BRUELHEIDE ................................ 171
Differential changes (1967 – 2005) in soil acidity and understory community driven by forest management
H. VAN CALSTER, K. VERHEYEN, A. DE SCHRIJVER, L. BAETEN, L. DEKEERSMAEKER, M. HERMY ................................................................. 172
Long-term vegetation changes in a south Swedish deciduous forest
G. VON OHEIMB, J. BRUNET ........................................ 173
Nitrogen cycling in a N-saturated forest ecosystem (Höglwald). Results of monitoring and experimental manipulations since 1984
C. HUBER, W. WEIS, A. GÖTTLIN ...................................... 174
Long-term development of macrozoobenthic communities in the German Bight (North Sea): Climatic forcing and anthropogenic impacts
A. SCHROEDER, E. RACHOR ........................................... 175
Phytoplankton in the Darß-Zingst bodden chain – 13 years of remesotrophication
R. SCHUMANN, U. KARSTEN ........................................... 176
Long-term monitoring of grassland ecosystems in SW Germany. Influence of succession, mowing and mulching on nutrient dynamics
U.B. FREISINGER, H.-J. BRAUCKMANN, G. BROLL, K.-F. SCHREIBER ........................................... 177
Thirty-six years of old field succession: from arable fields to forest
M. DOLLE, W. SCHMIDT ................................................ 178
Long-term research, a must for soil ecology
H. KOEHLER, V. MELECIS ............................................. 179
Cycling dynamics of a high arctic vertebrate community as assessed by a long term study in North-East Greenland
B. SITTLER, O. GILG .................................................. 180
Plant species and biotopes of salt marshes at the upper part of the brackish water of the River Elbe – long term study over 12 years
C. HÖR, D. ZACHARIAS ................................................ 181
Loss of phytodiversity by eutrophication – a long-year study in deciduous forests of the Weser-Ems region (NW Germany)
R. BUCHWALD, D. GIGANTE, J. PÖHLKER, G. SCHMIDT ................................................ 182
Long-term investigations of soil microbial eco-physiological quotients (C_mic-to-C-org ratio, qCO_2) of forest stands in Lower Saxony
T.-H. ANDERSON .......................................................................................................................... 183

Linking aboveground biodiversity with belowground processes

Ökologische Differenzierung und Wandel der Wiesengesellschaften Westkretas
S. ABRAHAMCZYK, E. BERGMEIER ........................................................................................................ 185

Wachsende Systeme als Ursache von Umweltproblemen
K. ALBRECHT ......................................................................................................................................... 186

Long-term development and inter-annual variability of zooplankton in a coastal lagoon
M. FEIKE, R. HEERKLOSS, F.M. HILKER ............................................................................................. 187

Symposium 08: Miscellaneous ............................................................................................................... 188

Chances and risks of nanoparticles
M. SCHAEFER ........................................................................................................................................ 189

Positive effects of nanosilica on two species of Graminaceae
E.G. DUDEL ET AL ................................................................................................................................... 190

Assessment of biomarker responses in demersal fish from the northern Iberian shelf:
Case of the Prestige oil spill
C. MARTÍNEZ-GÓMEZ, J. BENEDICTO, J.A. CAMPILLO, B. FERNÁNDEZ, J. VALDÉS, I. GARCÍA, F. SÁNCHEZ ............................................................................................................................................. 191

Relationship between fungal community structure and water geochemistry based on a
methodologically combined approach
M. SOLÉ, I. FETZER, R. WENNRICH, K.R. SRIDHAR, G. KRAUSS ................................................................ 192

A new method for studying homoranges in scavenging birds
S. RÓSNER, N. SELVA ................................................................................................................................. 193

Influence of antibiotics from pig slurry on the microbial N transformation in agricultural soils
A. KOTZERKE, S. SHARMA, B.-M. WILK, M. SCHLOTER ............................................................................. 194

Biodiagnostic techniques on blue mussels (Mytilus edulis) as site-selection criteria for
offshore farming
M. BRENNER, A. KÖHLER, B.H. BUCK ..................................................................................................... 195

Lysosomal changes in digestive gland of caged North Sea blue mussel (Mytilus edulis)
as a biomarker to assess the water quality along an offshore inshore gradient
J. BRESSLING, A. KOEHLER ..................................................................................................................... 196

The role of parasite diversity in ecosystem functioning - macroparasites in molluscs of the
European Wadden Sea
D.W. THIELTGES ...................................................................................................................................... 197

Isolation and structural characterization of haptoglobin from harbour seals (Phoca vitulina) for the evaluation of its potential as indicator of marine mammal health
V. HELLWIG, B. ERSLOH, U. SIEBERT, A. PRANGE .................................................................................. 198

Seed germination of Bothriospora corymbosa after gut passage in Triportheus angulatus in Central Amazonian floodplains
P. PAROLIN, L.A. MAIA, L.M. DOS SANTOS ............................................................................................ 199

Group living benefits growth under stress in bacteria
H. PEITZ, G. VELICER .............................................................................................................................. 200

Towards dissecting the roles of endo- and ectomycorrhizal fungi for P- and N-
acquisition in Douglas fir
T. Ducic, D. Berthold, F. Beese, A. Polle .................................................. 201
Alternative approaches for the protection of oilseed rape from slug herbivory
T. Frank, M. Barone, N. Escher, J. Friedli, F. Oberholzer ..................... 202
Gone with the wind: Ballooning propensity of spiders from dynamic and stable habitats
K. Stämpfli, M.H. Schmidt ................................................................. 203
Seasonal and regional variation in the diet of the Lesser Horseshoe Bat (*Rhinolophus hipposideros*)
N. Mitschunas, M. Wagner ............................................................... 204
Extinction and recolonisation of the Raven (*Corvus corax*) in Middle Europe
S. Rosner, D. Cimatti, J. Meyer, R. Brandl ...................................... 205
Young modellers in ecology (*YoMo*)
B. Tietjen et al ................................................................. 206
Lipofuscin accumulation and protein carbonyl content in the tissue of the ocean quahog *Arctica islandica*
J. Straihl, D. Abele, T. Brey, A. Köhler-Günther, E. Philipp ............. 207
The effects of anthropogenic toxins on reproductive processes in the sea urchin *Psammechinus miliaris*
S. Schäfer, A. Köhler .......................................................... 208

**Symposium 09: Modelling** ..................................................... 209
Predicting habitat availability of floodplain forest species after dyke relocation
T. Anastasiades, B. Wawra, C. Reudenbach, R. Bialozyt, I. Leyer ........ 210
How could future climate and land use change affect the distribution of mountain meadow plant species in Saxony?
O. Purschke, C.F. Dormann, D. Haase, S. Tischew ......................... 211
Modelling effects of land use on spatial ecology, energy budgets and population viability in the ladybeetle *Coccinella septempunctata*
F.J.J.A. Bianchi, W. van der Werf, A. Honěk ..................................... 212
Correcting the bias of randomization algorithms

Landscape modification and crop cultivation evidences of two different environments in Colombia
J.C. Berrío ........................................................................... 267

Late Quaternary vegetation, biodiversity and fire dynamics on the southern Brazilian highland and their implication for conservation and management of modern Araucaria forest and grassland ecosystems
H. Behling, V. DePatta Pillar ................................................................. 268

Long-term vegetation dynamics at the grassland-savanna ecotone, South Africa
E. Breman ........................................................................ 269

Vegetation development and human impact during the late Quaternary in the Loja region of the southeastern Ecuadorian Andes
H. Niemann, H. Behling ................................................................. 270

Current and past plant communities in small mountain basins of NW-Italy outlined by their pollen assemblages
C. Molinari, M.A. Guido, S. Placereani, C. Montanari .................................... 271

Holocene stability and dynamics of forest vegetation in Val d’Aveto (Liguria, NW-Italy)
B.I. Menozzi, C. Bellini, C. Gagliardi, M.A. Guido, S. Placereani, C. Montanari ................................................................. 272

Palaeoecology as a tool to estimate biodiversity change of a forest stand in southwestern Norway
C. Molinari, R.H.W. Bradshaw, M. Ohlson ................................................................. 273

Subfossil pine woodland and trackways in Campemoor – dendrochronological data on the history of woodland, mire and climate
H.H. Leuschner ................................................................. 274

Palaeogenetics – DNA from ancient wood remains
S. Liepert, C. Sperisen, M. Spencer, B. Ziegenhagen ........................................ 275

Recent pollen deposition as a tool to interpret pollen assemblages
B.I. Menozzi, M.A. Guido, C. Montanari ................................................................. 276
Symposium 13: Biodiversity Conservation in Marginal Regions

The effects of management on seed bank diversity in grasslands of a changing marginal landscape
C. WELLSTEIN, A. OTTE, R. WALDHARDT

Effects of farm size and animal density on management intensity polarization on
grassland farms
I. WEVERMANN, B. MOSIMANN, G. A. HARTMANN, A. LÜSCHER

Nutrient-poor grasslands are still biodiversity hotspots in the Swiss Alps
M. PETER, A. GIGON, P. EDWARDS, A. LÜSCHER

Effects of landscape structure and fragmentation on genetic diversity of carabid beetles
in agricultural regions
A.-C. SANDER, V. WOLTERS, J. DAUBER

Large-scale distribution of hover flies depends on availability of larval feeding habitats
F. JAUKER, V. WOLTERS

A new strategy for management of springs in Switzerland
B. BALTES

Ant communities in grasslands: management vs. abiotic and biotic conditions
H. DAHMS, V. WOLTERS, J. DAUBER

From biodiversity to ecosystem functions? The Ecosystem Millennium Assessment as
an indicator for an innovation process in environmental research and policy
K. JAX, C. GÖRG, C. HAAK

Symposium 14: Alpine and Arctic Biodiversity and Ecology

Diversity - stability relationships of an alpine plant community under simulated
environmental change
K. KLANDERUD, Ø. TOTLAND

Is climate change affecting alpine plants? An Assessment of the Impacts of Climate
Change on the Alpine Herbfields on the Bogong High Plains, Victoria, Australia
F.C. JARRAD, M.A. BURGMAN, R.J. WILLIAMS

Impact of climate change on the carbon balance of high arctic forbs
E.J. COOPER

Identification of phylogeographic break zones in multiple alpine plant species
C. THIEL-EGENTER, N. ALVAREZ, A. TRIBSCH, R. HOLDEREGERGER, F. GUGERLI,
INTRA-BIODIV-CONSORTIUM

Mountain birch regeneration and seedling root systems in the treeline ecotone, Finnish
Lapland
K. ANSCHLAG, G. BROLL, F.-K. HOLTMEIER

Nitrogen fixation, denitrification and ecosystem nitrogen pools in relation to vegetation
development in the Subarctic
P.L. SORENSEN, S. JONASSON, A. MICHELSN

Lichen vegetation as hot spots of diversity in arctic and alpine areas
H. BÖLTMANN, F. J.A. DANIÈLS

The alpine timberline: a hotspot of spider diversity?
P. MUFF, M. SCHMIDT, W. NENTWIG, C. KROFF

Microhabitat preferences of the burnet moths Zygaena anthyllidis and Z. exulans in the
Spanish Pyrenees
P. DIEKER, T. FARTMANN
Population density and habitat use of alpine rock ptarmigan in consideration of human impacts
M. ZOHMANN, M. WOESS ................................................................. 296
Spatial and temporal dynamics of Muskoxen (*Ovibos moschatus*) at Zackenberg, Northeast Greenland
D.K. HENDRICHSEN, M.C. FORCHHAMMER ........................................... 297
Altitudinal zonation of vegetation in continental West Greenland with special reference to low Arctic steppe vegetation
B. DREES, B. SIEG, F.J.A. DANIELS ........................................ 298
Influence of temperature and light intensity on the photosynthesis of *Usnea aurantiaco-atra* from the maritime Antarctic
M. VESTE, B. SCHROETER, J. HERMANN, T. FEUERER, J.-P. FRAHM, T.G.A. GREEN, L. SANCHO ........................................ 299
Permafrost-affected soils and ecosystem monitoring in Auyuittuq National Park in the Canadian Arctic
G. BROLL, C. TARNOCAI, J. GOULD .......................................................... 300
Diversity of spiders and ground beetles in alpine habitats of the Central Scandes, Norway
O.-D. FINCH ........................................................................................................... 301
Seasonality in Arctic under-ice amphipods (Crustacea)
I. WERNER, H. AUEL ...................................................................................... 302

Symposium 15: Dynamics and Diversity of Chemical Ecological Interactions in Aquatic Ecosystems ................................................................. 303
Allelochemical interactions of marine protists
U. TILLMANN .......................................................... 304
Revealing the allelochemical potential of *Alexandrium ostenfeldii*, a marine dinoflagellate
B. KROCK .......................................................... 305
Waterborne allelochemicals of marine macroalgae affect bacterial diversity and abundance in close proximity
T. HARDER, C. LAM .......................................................... 306
2,4-Dibromophenol and 2,4,6-tribromophenol disturb cellular calcium signalling and constitute an olfactory signal to shrimps
U. BICKMEYER, T. HASSENKLÖVER, K. WALTHER, K. ANGER ........................................ 307
Bacteria associated with the basiphyte trigger spore release in a red algal epiphyte
F. WEINBERGER, J.A. CORREA, G. POHNERT, N. KUMAR, P. STEINBERG, P. POTIN ... 308
From chemical communication to biogeochemistry: Enhanced mineralization in freshwater sediments by exposure of zoobenthos to predator odour
F. HÖLKER, P. STIEF .......................................................... 309
Specific variations of *Aplysina aerophoba*
A. KLÖPPEL, A. PUTZ, M. PFANNKUCHEN, F. BRÜMMER, P. PROKSCH ........................................ 310
Peculiar characters of a spongillid sponge species in Lake Constance caused by mussels?
M. PFANNKUCHEN, F. BRÜMMER, S. SCHLESINGER, G.B. FRITZ, R.O. SCHILL, M. MEINNER ... 311
Arsenic resistant microflora associated with *Lemna* sp. in abandoned uranium mine in eastern Germany
Evidence that 3-decanol in hermit crab blood signals shell availability to conspecifics
G. Schmidt, D. Rittschof, T. Harder

Symposium 16: Ecological Impacts of Neobiota

Invasion of Pacific oysters (Crassostrea gigas) in the Wadden Sea (North Sea): competitive advantage over native mussels
S. Diedrich

Invasion of Pacific Oyster (Crassostrea gigas) in the Wadden Sea - does it matter?
A. Schmidt, P. May, A. Markert, P. Schieck, A. Wehrmann, N. Dubilier, S. Dittmann

Niche overlap and separation of closely related alien and native plants
R. Lösch, G. Dericks, U. Schmitz, W. Bleeker

Human activities support natural range expansion of the marine isopod Idotea metallica
L. Gutow

Introduced evergreen broad-leaved species expand northward in Europe
S. Berger, G. Sohlke, G.-R. Walther

Non-indigenous aquatic species – combining scientific interest and public awareness: the NEOBIOTA project
G.B. Fritz, R.O. Schill, F. Brümmer

Does the enemy release hypothesis apply to invading seaweeds?
S. Wikström, M.B. Steinarsdóttir, L. Kautsky, H. Pavia

Fast evolution in introduced species?
K. Vrielings, J. Joshi

Predicting patterns of invasion by Black cherry (Prunus serotina Ehrh.) in Flanders (Belgium) and its impact on the forest understory community
K. Verheyen, M. Vanhellemont, T. Stock, M. Hermy

Genetic homogenization within the flora of Germany
M. Winter, I. Kühn, S. Klotz

How many neophytes hybridize with native plant species?
W. Bleeker, U. Schmitz, M. Ristow, A. Mühlhausen, B. Elling

Comparative demography of invasive plants in their native and introduced range: Lythrum salicaria as a case study

Dispersal patterns of escaped ornamental woody plants in urban-industrial forest ecosystems of the Ruhrgebiet?
P. Gausmann, P. Keil, G.H. Loos

Distribution and abundance of Heracleum mantegazzianum: local versus regional factors
J. Thiele, A. Otte

Does climate change increase the success of neophytes in Germany?
G. Sohlke, J. Lübbert, G.-R. Walther

Traits of successful plant invaders in Germany
E. Köster, I. Kühn, S. Klotz

Craspedacusta sowerbii, Lankester 1880 – a review and new perspective
G.B. Fritz, R.O. Schill, F. Brümmer

ANEBO – Interreg-Project Aquatic Neobiota in Lake Constance and its tributaries
The common cord-grass *Spartina anglica*: An invasive alien species in the Wadden Sea National Park

S. Neiring, K.-J. Hesse

Neobiota as hosts in parasitic life cycles – trematodes in intertidal mollusces of the North Sea

M. Krakau, D.W. Thieltges, K. Reise

The good and the bad of introduced species - the case of the American slipper limpet *Crepidula fornicata* in European coastal waters

D.W. Thieltges

Invaders welcome? Anthropogenically-induced species losses are counterbalanced by increased diversity in the vicinity of an introduced seaweed

C. Buschbaum, A.S. Chapman, B. Saier

New oyster reefs in the East Frisian Wadden Sea: analysis of community structure

A. Markert

Symposium 17: Managed Ecosystems

Deficits of participative Biosphere Reserve management in Chile, Indonesia, and Madagascar

J. Barkmann, S. Stoll-Kleemann, C.L. Cerda, N. Fritz-Vieta, S. Umar

Namibia’s Communal Conservancies: Challenges for a sustainable use of natural resources
