Small Water and Wastewater Systems VII

Selected Papers from the 7th IWA International Specialty Conference on Small Water and Wastewater Systems, held in Mexico City on 7–10 March 2006

Issue Editor: S. Gonzalez Martinez

National University of Mexico, Institute of Engineering, 04510 Mexico DF, Mexico
Contents

vii Preface

1 Low technology systems for wastewater treatment: perspectives F. Brissaud

11 Membrane technology revolutionizes water treatment P.A. Wilderer and S. Paris

21 Biological risks to food crops fertilized with Ecosan sludge B. Jiménez, A. Austin, E. Cloete, C. Phasha and N. Beltran

31 Performance of very small wastewater treatment plants with pronounced load variations J. Kegebein, E. Hoffmann and H.H. Hahn

39 Treatment of lower load graywater by using a controlled soil natural treatment system M.A. López-Zavala

55 Characterization of the activated sludge and of the operating conditions of six SBR treating dairy effluent and operated at industrial scale Joseph V. Thanikal, M. Torrijos, Ph. Sousbie and J.Ph. Delgenes

65 Potential of filter-vermicomposter for household wastewater pre-treatment and sludge sanitisation on site D. Gajurel, S. Deegener, M. Shalabi and R. Otterpohl

71 Optimization of subsurface vertical flow constructed wetlands for wastewater treatment G. Langergraber, Ch. Prandtstetten, A. Pressl, R. Rohrhofer and R. Haberl

79 Anaerobic membrane bioreactor for treatment of synthetic municipal wastewater at ambient temperature J.H. Ho, S.K. Khanal and S. Sung

87 Using molecular tools to assess biofilms in onsite systems T.G. Flapper, A. McKay, S. Hall and P. Hill

95 Development of an empirical mathematical model for describing and optimizing the hygiene potential of a thermophilic anaerobic bioreactor treating faeces M. Lübben, M. Wichern, F. Biacho, S. Prechtel and H. Horn

103 Waste stabilization ponds and rock filters: solutions for small communities D.D. Mara and M.L. Johnson

109 Comparison of the nutrient removal efficiency of onsite wastewater treatments systems: applications of conventional sand filters and sequencing batch reactors (SBR) R. Vilpas and E. Santala

119 Modification of submerged membrane bioreactors (MBRs) by inserting baffles: pilot scale study K. Kimura, M. Enomoto and Y. Watanabe

127 Vertical flow constructed wetland for textile effluent treatment L.C. Davies, A. Vacas, J.M. Novais, F.G. Freire and S. Martíne-Dias

135 Biological nutrient removal by applying SBR technology in small wastewater treatment plants: carbon source and C/N/P ratio effects S. Puig, Ll. Corominas, M.D. Balaguer and J. Colprim

143 Wastewater reclamation through a combination of natural systems (infiltration-percolation and constructed wetlands): a solution for small communities E. Huertas, M. Folch and M. Salgot

149 Wastewater reclamation systems in small communities L. Alcalde, M. Folch, J.C. Tapias, E. Huertas, A. Torrens and M. Salgot

155 Integrated constructed wetland systems: design, operation, and performance of low-cost decentralized wastewater treatment systems L.L. Behrends, E. Bailey, P. Jansen, L. Houke and S. Smith
Design and operation of SBR processes for small plants based on simulations  L. Larrea, J. Albizuri, I. Irizar and J.M. Hernández

Grey water treatment in UASB reactor at ambient temperature  T.A. Elmitwalli, M. Shalabi, C. Wendland and R. Otterpohl

Experimental study on nitrogen components during composting process of feces  S. Hotta, T. Noguchi and N. Funamizu

Anaerobic digestion of blackwater from vacuum toilets and kitchen refuse in a continuous stirred tank reactor (CSTR)  C. Wendland, S. Deegener, J. Behrendt, P. Toshev and R. Otterpohl

Wastewater treatment with activated pre-clarifier and planted soil filters  C. Lindenblatt, M. Wichern and H. Horn

Use of real-time PCR to examine the relationship between ammonia oxidizing bacterial populations and nitrogen removal efficiency in a small decentralized treatment system 'Johkasou'  G. Nakagawa, Y. Ebie, S. Tsuneda, M. Matsumura and Y. Inamori

Toxicity of domestic wastewater pH to key species within an innovative decentralised vermifiltration system  R.J. Hughes, J. Nair, K. Mathew and G. Ho

Tertiary filtration in small wastewater treatment plants  V. Naddeo and V. Belgiorno

Wastewater infiltration percolation for water reuse and receiving body protection: thirteen years' experience in Spain  F. Brissaud, M. Salgot, M. Folch, M. Auset, E. Huertas and A. Torrens

Treatment of organic synthesis wastewater using anaerobic packed bed and aerobic suspended growth bioreactors  P. Mijaylova-Nacheva, E. Ramirez-Camperos and S. Cuevas-Velasco

Biological nitrogen removal with three different SBBR  A. Valdivia, S. González-Martinez and P.A. Wilderer

Biological aerated filtration of municipal wastewater using a low-cost filtration media  S. González-Martinez, T. Millán and O. González-Barceló
