

Franz Kneer, Klaus G. Puschmann,  
and Axel D. Wittmann (Ed.)

Modern Solar Facilities –  
Advanced Solar Science

Proceedings of a Workshop held at  
Göttingen September 27-29, 2006

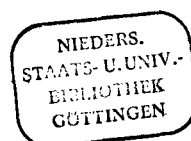

Universitätsverlag Göttingen  
2007

## Contents

Summary of the workshop <i>F. Kneer, K. G. Puschmann, and A. D. Wittmann</i>	11
<b>1 Telescopes and instrumentation</b>	
Future solar space missions (invited) <i>B. Fleck</i>	17
LYRA - a solar UV radiometer using diamond detectors <i>A. Theissen, A. BenMoussa, U. Schühle, J.-F. Hochedez, and W. Schmutz</i>	27
Ground-based solar facilities in the U.S.A. (invited) <i>C. Denker, D. E. Gary, and T. R. Rimmele</i>	31
New high resolution solar telescope GREGOR (invited) <i>R. Volkmer, O. von der Lühse, F. Kneer, J. Staude, H. Balthasar, T. Berkefeld, P. Caligari, M. Collados, C. Halbgewachs, F. Heidecke, A. Hofmann, M. Klvaňa, M. Sobotka, H. Nicklas, E. Popow, K. G. Puschmann, W. Schmidt, D. Soltau, K. Strassmeier, and A. D. Wittmann</i>	39
From the “Göttingen” Fabry-Perot Interferometer to the GREGOR FPI <i>K. G. Puschmann, F. Kneer, H. Nicklas, and A. D. Wittmann</i>	45
Gregor@Night. A concept for a night-time spectrograph for the 1.5m solar telescope GREGOR <i>K. G. Strassmeier, M. Woche, T. Granzer, M. I. Andersen, W. Schmidt, and P. Koubsky</i>	51
Multi-wavelength observations at the German VTT on Tenerife – Possible combinations of post-focus instruments <i>C. Beck, K. Mikurda, L. R. Bellot Rubio, T. Kentischer, and M. Collados</i>	55
Instrumental developments at the Gregory Coudé Telescope (GCT) at IRSOL <i>M. Bianda, R. Ramelli, A. Feller, J. O. Stenflo, and G. Küveler</i>	59
Imaging polarimetry with a tunable narrow-band filter <i>A. Feller, M. Bianda, and J. O. Stenflo</i>	63
Methods in high-resolution solar spectroscopy <i>F. Kneer</i>	67

SUNRISE: High resolution UV/VIS observations of the Sun from the stratosphere (invited) <i>A. M. Gandorfer, S. K. Solanki, P. Barthol, V. Martínez Pillet, W. Schmidt, A. M. Title, M. Knölker, and the SUNRISE team</i>	69
ZERODUR mirror substrates for solar telescopes <i>T. Döhring, R. Jedamzik, and P. Hartmann</i>	77
<b>2 High-resolution and high-precision observations</b>	
Future missions for helioseismology (invited) <i>M. Roth</i>	85
Helioseismology at MPS <i>L. Gizon, R. Cameron, J. Jackiewicz, M. Roth, H. Schunker, and T. Stahn</i>	89
Structure and evolution of supergranulation from local helioseismology <i>J. Hirzberger, L. Gizon, S. K. Solanki, and T. L. Duvall, Jr.</i>	103
Solar adaptive optics (invited) <i>T. Berkefeld</i>	107
Anisoplanatic optical transfer functions for solar adaptive optics from simulation using wave front sensor data <i>M. Sailer and O. von der Lühe</i>	115
Solar image restoration (invited) <i>M. G. Löfdahl, M. J. van Noort, and C. Denker</i>	119
Probabilistic suppression of astronomical image degradations <i>M. Haindl and S. Šimberová</i>	127
Advances, challenges and limitations of speckle reconstruction and deconvolution <i>K. Mikurda, O. von der Lühe, F. Wöger, and W. Schmidt</i>	131
Reversed granulation in Fe I 7090.4 Å <i>K. Janssen and G. Cauzzi</i>	135
The height dependence of temperature – velocity correlation in the solar photosphere <i>J. Koza, A. Kučera, J. Rybák, and H. Wöhl</i>	139
Polarimetry in the visible and near infrared (invited) <i>M. Collados</i>	143
Dynamics of the quiet photosphere and its magnetic field under high spatial resolution <i>K. G. Puschmann, F. Kneer, and I. Domínguez Cerdeña</i>	151
Internetwork magnetic fields <i>M. J. Martínez González, M. Collados, and B. Ruiz Cobo</i>	157
High-resolution CN spectroscopy of small-scale solar magnetic features <i>V. V. Zakharov, A. Gandorfer, and S. K. Solanki</i>	161

Contents	7
Magnetic properties of G-band bright points <i>C. Beck, K. Mikurda, L. R. Bellot Rubio, R. Schlichenmaier, and P. Sütterlin</i>	165
Photospheric magnetic field and chromospheric emission <i>R. Rezaei, R. Schlichenmaier, C. Beck, and W. Schmidt</i>	169
Velocity distribution of chromospheric downflows <i>R. Aznar Cuadrado, S. K. Solanki, and A. Lagg</i>	173
Off-limb spectroscopy of the He I 10830 Å multiplet: observations vs. modelling <i>B. Sánchez-Andrade Nuño, R. Centeno, K. G. Puschmann, J. Trujillo Bueno, and F. Kneer</i>	177
Study of polar faculae with north pole coverage of the Sun <i>J. Blanco Rodríguez, O. Okunev, K. G. Puschmann, and F. Kneer</i>	181
Effects of the “false” magnetic-field imbalance in solar active regions <i>I. V. Oreshina and B. V. Somov</i>	185
Magnetic source of the solar cycle variation of the Mn I 539.4 nm line <i>S. Danilovic, S. K. Solanki, W. Livingston, N. Krivova, and I. Vince</i>	189
Reconstruction of irradiance from 2D magnetograms and modification of the $1/\mu$ -correction paradigm <i>A. Reiners, G. Basri, K. Soto, F. Ramos Stierle, and T. Lewis</i>	193
Variations in solar indices during the 23 <sup>rd</sup> solar cycle <i>N. Oklay</i>	197
Structure and flattening of the solar corona <i>M. T. Özkan, A. Ökten, N. Oklay, A. Gültekin, M. Kara, Z. F. Bostancı, M. Başal, and N. Al Erdoğan</i>	201
Fine structure in a dark umbra <i>M. Sobotka and K. G. Puschmann</i>	205
Dynamics of a solar pore with light bridge <i>S. Giordano, F. Berrilli, D. Del Moro, and V. Penza</i>	209
Ca II H line wing images of sunspot penumbrae recorded with the Swedish 1-m Solar Telescope <i>G. Narayan, M. J. van Noort, and G. Scharmer</i>	213
Temporal evolution of intensity, velocity and magnetic field of sunspots at high spatial resolution <i>N. Bello González, F. Kneer, and K. G. Puschmann</i>	217
Magnetic vector field above a sunspot <i>P. Gömöry and H. Balthasar</i>	221

The observational counterpart of the rising flux tube model? <i>J. Jurčák and M. Sobotka</i>	225
Simultaneous polarimetric observations with VTT and THEMIS <i>H. Balthasar and V. Bommier</i>	229
On the inhomogeneities of the sunspot penumbra <i>R. Schlichenmaier, D. A. N. Müller, and C. Beck</i>	233
Modified $p$ -modes in penumbral filaments <i>D. S. Bloomfield, A. Lagg, S. K. Solanki, and J. M. Borrero</i>	241
Wave propagation and shock formation in diverse magnetic structures <i>R. Centeno, M. Collados, and J. Trujillo Bueno</i>	245
Evolution of coronal hole boundaries seen in EIT 195 Å and TRACE 171 Å images <i>M. S. Madjarska and T. Wiegelmann</i>	249
Magnetic field structure and dynamics in coronal hole - active region interface zone <i>I. A. Bilenko</i>	253
Evolution of the photospheric magnetic field in the source regions of coronal mass ejections <i>V. Bothmer and D. Tripathi</i>	257
Two-dimensional imaging of the He D <sub>3</sub> /H $\beta$ emission ratio in quiescent solar prominences <i>E. Wiehr, G. Stellmacher, and J. Hirzberger</i>	261
Wavelet-based method for coronal loop oscillations analysis <i>D. Tothova, D. E. Innes, and S. K. Solanki</i>	265
Magnetic stereoscopy of coronal loops in NOAA 8891 <i>L. Feng, T. Wiegelmann, and B. Inhester</i>	269
Observations of a flaring active region in H $\alpha$ <i>B. Sánchez-Andrade Nuño, K. G. Puschmann, and F. Kneer</i>	273
On the thermal and non-thermal excitation effects as studied in the H $\alpha$ , H $\beta$ and Ca II 8542 Å line profiles in a solar flare <i>P. Kotrč and L. K. Kashapova</i>	277
Solar HXR- and $\gamma$ -ray emission measurements in 2005 by SONG/CORONAS-F near minimum of the last activity cycle <i>I. N. Myagkova, S. N. Kuznetsov, E. A. Muravieva, and L. I. Starostin</i>	281
<b>3 Theory and interpretation</b>	
Inversion techniques: From observations to atmospheres (invited) <i>B. Ruiz Cobo</i>	287
Stokes profile inversion in Meso-Structured Magnetic Atmospheres <i>T. A. Carroll</i>	297

Line ratio method applied to inter-network magnetic fields <i>E. Khomenko and M. Collados</i>	303
The Ba II $\lambda 4554$ resonance line and solar granulation <i>V. L. Olshevsky and N. G. Shchukina</i>	307
Magnetic mappers of the quiet solar atmosphere <i>J. Trujillo Bueno</i>	311
Molecular Hanle effect in the Paschen-Back regime: theory and application <i>A. I. Shapiro, S. V. Berdyugina, D. M. Fluri, and J. O. Stenflo</i>	317
Recent progresses in the simulation of small-scale magnetic fields (invited) <i>O. Steiner</i>	321
Solar mesogranulation as a cellular automaton effect <i>L. Matloch, R. Cameron, D. Schmitt, and M. Schüssler</i>	339
Sunspot models with bright rings <i>L. L. Kitchatinov and G. Rüdiger</i>	343
Numerical modeling of MHD wave propagation in sunspots: a 3D case <i>V. Olshevsky, E. Khomenko, and M. Collados</i>	347
Seismology of sunspot atmosphere: from chromospheric resonance to nonlinear antireflection <i>Y. D. Zhugzhda</i>	351
Ray tracing of ion-cyclotron waves in a coronal funnel <i>R. Mecheri and E. Marsch</i>	355
Nanoflare model of emission line radiance distributions in active region coronae <i>H. Safari, D. E. Innes, S. K. Solanki, and A. Pauluhn</i>	359
Modeling large-scale coronal structures <i>P. Ruan, T. Wiegmann, and B. Inhester</i>	363
Magnetic flux transport and the lifetimes of spots on active cool stars <i>E. Işık, M. Schüssler, and S. K. Solanki</i>	367
Mass loss rates and wind ram pressures of cool stars <i>V. Holzwarth and M. Jardine</i>	371
List of participants	375
