Prediction and Discovery

AMS-IMS-SIAM Joint Summer Research Conference
Machine and Statistical Learning: Prediction and Discovery
June 25–29, 2006
Snowbird, Utah

Joseph Stephen Verducci
Xiaotong Shen
John Lafferty
Editors
Contents

Introduction 1

On transductive support vector machines
   Junhui Wang, Xiaotong Shen, and Wei Pan 7

A note on robust kernel principal component analysis
   Xinwei Deng, Ming Yuan, and Agus Sudijanto 21

The Lq support vector machine
   Yufeng Liu, Hao Helen Zhang, Cheolwoo Park, and Jeongyoun Ahn 35

On multicategory truncated-hinge-loss support vector machines
   Yichao Wu and Yufeng Liu 49

A robust hybrid of lasso and ridge regression
   Art B. Owen 59

A gradient descent algorithm for LASSO
   Yongdai Kim, Yuwon Kim, and Jinseog Kim 73

Additive regression trees and smoothing splines - predictive modeling and
   interpretation in data mining
   Bin Li and Prem K. Goel 83

Estimation of atom prevalence for optimal prediction
   Ernest Parfait Fokoué 103

Precise statements of convergence for AdaBoost and arc-gv
   Cynthia Rudin, Robert E. Schapire, and Ingrid Daubechies 131

Ensemble-learning by model-based spatial averaging
   Keith Marsolo, Srinivasan Parthasarathy, Michael Twa,
   and Mark Bullimore 147

Automatic bias correction methods in semi-supervised learning
   Hui Zou, Ji Zhu, Saharon Rosset, and Trevor Hastie 165

Variable selection for model-based high-dimensional clustering
   Sijian Wang and Ji Zhu 177

Semi-supervised learning via constraints
   Wei Pan and Xiaotong Shen 193
Objective measures for association pattern analysis
MICHAEL STEINBACH, PANG-NING TAN, HUI XIONG, AND VIPIN KUMAR
