CONTENTS

Preface xvii

OPENING SESSION—OVERVIEW OF GLAST

Overview of the GLAST Mission and Opportunities 3
S Ritz on behalf of the GLAST Mission Team

The Large Area Telescope 8
P F Michelson on behalf of the GLAST LAT Collaboration

The GLAST Burst Monitor 13

AGN, EBL, AND RELATED TOPICS

Gamma-ray Emitting AGN and GLAST 19
P Padovani

Probing the Extragalactic Background with GLAST 24
D H Hartmann

Observations of AGNs with the MAGIC Telescope 26
D Mazin on behalf of the MAGIC Collaboration

The FIRST Flat Spectrum Sample 29
G Fossati

Blazar Surveys with WMAP and Swift 32
P Giommi, M Capalbi, E Cavazzuti, S Colafrancesco, S Cutini, D Gasparini, E Massaro, P Padovani, M Pern, and S Puccetti

SURVEYS, POPULATIONS, NEW SOURCES

Unidentified γ-ray Sources: New Source Classes with GLAST 37
D F Torres

The High Energy Sky with INTEGRAL 42
P Ubertini, A Bazzano, A De Rosa, and M T Fiocchi on behalf of INTEGRAL Survey Team

GALACTIC COMPACT OBJECTS AND THEIR ENVIRONMENTS

Pulsar Physics and GLAST 49
A K Harding

Finding (or not) New Gamma-ray Pulsars with GLAST 54
S M Ransom

Supernova Remnants and GLAST 57
P Slane

The Magnetic Bootstrap 62
R Blandford and S Funk

Binaries and GLAST 65
G Dubus

Highlights of MAGIC Observations of Galactic Sources 70
D F Torres and J Cortina on behalf of the MAGIC Collaboration
FACILITIES

Gamma-ray Astrophysics with AGILE

F Longo, M Tavani, G Barbiellini, A Argan, M Bassani, F Boschetti, A Bulgarelli, P Caraveo,
P Cattaneo, A Chen, E Costa, E Del Monte, G Di Cocco, G Di Persio, I Donnarumma, M Feroci,
M Fioni, L Foggetta, T Fruscione, M Frutti, F Fusco-Femiano, L Galli, F Granot, A Gruzi, 
C Labanti, I Lapshov, F Lazzarotto, F Liello, P Lipari, M Marisaldi, M Mastropietro, E Mattioni,
F Mauen, S Mereghetti, E Morelli, A Morselli, L Paci, A Pellegrini, F Perotti, F Piccozza,
Pittori, C Pontoni, G Porrovecchio, M Prest, M Rapisarda, E Rossi, A Rubini, P Soffitta, A Traci,
M Trifoglio, A Troisi, E Vallazza, S Vercellone, and D Zanello

Status of the VERITAS Gamma-ray Observatory

D B Kieda on behalf of the VERITAS Collaboration

The Large Millimeter Telescope in the GLAST Era

A Carramiñana

GLAST Large Area Telescope Multiwavelength Opportunities

D J Thompson

Suzaku Observations of AGN and Synergy with GLAST

J Kataoka, T Takahashi, and G Madejski

GAMMA RAY BURSTS AND SOLAR PHYSICS

Combining Swift and GLAST to Explore GRBs

N Gehrels and J K Cannizzo

The Build-up of Opacity in Impulsive Relativistic Sources

J Granot, J Cohen-Tanugi, and E do Couto e Silva

Swift Late GRB Emission and GLAST

N Butler

Suzaku HXD-WAM Observations of Gamma-ray Prompt Emission and Collaboration with GLAST

Y Fukazawa, M Ohno, T Takahashi, T Asano, T Uehara, K Yamaoka, S Sugita, Y Terada,
T Tamagawa, M Suzuki, M Takeshi, Y Urata, K Abe, K Oda, M Suzuki, E Sonoda, G Sato,
T Enoto, K Makishima, T Takahashi, H Kubo, and K Nakazawa on behalf of the HXD Team

GLAST Solar System Science

G H Share and R J Murphy

DIFFUSE AND SPATIALLY EXTENDED EMISSIONS

Galactic Diffuse Emissions

S W Digel

The Extragalactic $\gamma$ Ray Background

C D Dermer

Discovery of TeV Gamma Rays from the Cygnus Region with Milagro Using a New Background Rejection Technique

A A Abdo on behalf of the Milagro Collaboration

Soft Gamma-ray Galactic Ridge Emission as Unveiled by SPI Aboard INTEGRAL

J Knodlseder, V Lonjou, G Weidenspointner, P Jean, A Strong, R Diehl, B Cordier, S Schanne, and
C Winkler

DARK MATTER AND NEW PHYSICS WINDOWS

GLAST and Dark Matter Substructure in the Milky Way

M Kuhlen, J Diemand, and P Madau

GLAST LAT Searches for Particle Dark Matter: An Experimental Point of View

L L Wai on behalf of the GLAST LAT Collaboration

Detecting the Dark Matter via the Proper Motion of $\gamma$-rays from Microhalos

S M Koushappas
PARALLEL SESSION 1

AGN, EBL AND RELATED TOPICS

Discovery of Fast Variability of the TeV γ-ray Flux from the Giant Radio Galaxy M 87 with H.E.S.S. 147

The Effect of Expansion on High-energy Emission from AGN Jets 150
M. Pohl and A. Marshall

Study of the Flux and Spectral Variations in the VHE Emission from the Blazar Markarian 501, with the MAGIC Telescope 153
D. Paneque on behalf of the MAGIC Collaboration

GLAST Answers about High-energy Peaked BL Lacs: Double-humped γ-ray Peak and Extreme Accelerators? 157
L. Costamante, F. Aharonian, and D. Khangulyan

The Blazar Spectral Sequence and GLAST 160
L. Maraschi, G. Ghisellin, and F. Tavecchio

The Spectral Index Distribution of EGRET Blazars: Prospects for GLAST 163
T. M. Venters and V. Pavlidou

PARALLEL SESSION 2

DIFFUSE AND EXTENDED SOURCES, DARK MATTER, AND NEW PHYSICS WINDOWS

Gamma-rays Produced in Cosmic-ray Interactions and the TeV-band Spectrum of RX J1713.7-3946 169
C.-Y. Huang, S.-E. Park, M. Pohl, and C. D. Daniels

Survey of the Galactic Plane with Milagro and the Discovery of MGRO J1908+06 and MGRO J2031+41 172
C. P. Lansdell and P. Huntemeyer for the Milagro Collaboration

Guaranteed Unresolved Point Source Emission and the Gamma-ray Background 175

Will GLAST Identify Dark Matter? 178
J. E. Taylor, E. A. Baltz, and L. L. Wai

WIMP Gamma Rays from the Galactic Center with GLAST and Accelerator Comparison 181
A. Morselli, A. Lionetto, and E. Nuss

PARALLEL SESSION 3

FACILITIES, TECHNIQUES, AND CALIBRATIONS

Studies of EGRET Sources with a Novel Image Restoration Technique 187

Preliminary Results of the LAT Calibration Unit Beam Tests 190
Three Advantages of the KANATA 1.5-m Telescope as a Powerful Partner for GLAST

The Advanced Compton Telescope

S E Boggs on behalf of the ACT Team

Jets, Blazars and the EBL in the GLAST-EXIST Era

J E Grundlay on behalf of the EXIST Team

PARALLEL SESSION 4

GALACTIC COMPACT OBJECTS AND THEIR ENVIRONMENTS

Massive Stars in Colliding Wind Systems: The GLAST Perspective

A Reimer and O Reimer

HESS J1023-575: Non-thermal Particle Acceleration Associated with a Young Stellar Cluster

O Reimer, J Hinton, W Hofmann, S Hoppe, C Masterson, and M Raue on behalf of the HESS Collaboration

Discovery of a Pulsar Candidate Associated with the TeV Gamma-ray Source HESS J1813-178

E V Gotthelf and D J Helfand

Population Synthesis of Radio and Gamma-ray Millisecond Pulsars from the Galactic Disk

S A Story, P L Gonthier, and A K Harding

Monitoring Accreting X-ray Pulsars with the GLAST Burst Monitor

How to Reveal the Mysteries of the Most Obscured High-energy Sources of our Galaxy, discovered by INTEGRAL?

S Chaty

PARALLEL SESSION 5

AGN, EBL AND RELATED TOPICS

Digging for the Truth: Photon Archeology with GLAST

F W Stecker

New Limits on the Density of the Extragalactic Background Light from TeV Blazars

D Mazin and M Raue

Exploring First Stars Era with GLAST

A Kashlinsky and D Band

A Figure of Merit for Blazar-like Source Identification in the Gamma-ray Energy Band

E Cavazzuti, C Pitton, P Giommi and S Colafrancesco

Simultaneous Radio to (Sub-) mm-Monitoring of Variability and Spectral Shape Evolution of Potential GLAST Blazars

L Fuhrmann, J A Zensus, T P Krichbaum, E Angelakis, and A C S Readhead

X-raying the MOJAVE Sample of Compact Extragalactic Radio Jets

M Kadler, G Sato, J Tueller, R M Sambruna, C B Markwardt, P Giommi, and N Gehrels

A Plan for the GLAST-LAT Blazars Multiwavelength Campaigns in 2008

G Tosti

PARALLEL SESSION 6

GAMMA-RAY BURSTS

Gamma-ray Burst Science with GLAST

B Zhang
Relativistic Interaction of a High Intensity Photon Beam with a Plasma: A Possible GRB Emission Mechanism

GeV Afterglow Emission from GRB
A Galli and L Piro

High-energy Gamma-rays from GRB X-ray Flares
X Y Wang, Z Li, and P Mészáros

GLAST Observation of High-redshift GRBs
E Bissaldi, F Longo, F Calura, F Matteucci, G Barbiellini, and N Omodei on behalf of the GLAST/LAT Collaboration

GRB Spectra in the MeV Range: Hints from INTEGRAL
T Bulik, M Denis, R Mareinkowski, P Goldom, P Laurent, and L Osuch

Comparison of VSB from BATSE, KONUS and SWIFT
D B Cline, C Matthey, and S Otwinowski

Adding the GLAST Burst Monitor to the 3rd Interplanetary Network
K Hurley

PARALLEL SESSION 7
SURVEYS AND POPULATION STUDIES

A Comprehensive Approach to $\gamma$-ray Source Identification in the GLAST-LAT Era
P A Caraveo and O Reimer

Constraints on Galactic Populations from the Unidentified EGRET Sources
J M Siegal-Gaskins, V Pavlidou, A V Olinto, C Brown, and B D Fields

Hard X-ray Sources Detected by INTEGRAL and Implications for GLAST
J A Tomsick

The Radio to Gamma-ray Connection of EGRET Blazars: Correlation, Regression and Monte Carlo Analysis
S D Bloom

X-ray Observations of Unidentified H.E.S.S. $\gamma$-ray Sources
S Funk on behalf the HESS Collaboration

PARALLEL SESSION 8
ASTROSTATISTICS

Modern Statistical Methods for GLAST Event Analysis
R D Morns and J Cohen-Tanugi

Source and Transient Detection Using Data Segmentation
J D Scargle and J P Norris

SYMPOSIUM SUMMARY
Summary
R Blandford

POSTERS

ROXA: A New Multi-frequency Selected Large Sample of Blazars with SDSS and 2dF Optical Spectroscopy
E Cavazzuti, S Turnzian, and P Giommi

Compton X-ray and $\gamma$-ray Emission from Extended Radio Galaxies
C C Cheung

S Cipriani, C M Raiten, N Rizzi, I Agudo, L Foschini, M Fiorucci, L O Takalo, M Villata, A Sillanpaa, M Valtonen, L Ostorero, G Tosti, and S J Wagner on behalf of the Campaign Collaboration

Swift Follow-up of the Gigantic TeV Outburst of PKS 2155-304 in 2006

L Foschini, G Ghisellini, F Tavecchio, A Treves, L Maraschi, M Ghisotti, C M Raiten, M Villata, E Pan, G Tagliaferri, G Tosti, R M Sambruna, G Malaguti, G Di Cocco, and P Giommi

Breaking the Enigma of the X-ray Quasar Jets with GLAST

M Georganopoulos, E S Perlman, D Kazanas, and J McEnery

High Energy Variability of Synchrotron-Self Compton Emitting Sources: Why One-zone Models Do Not Work and How We Can Fit It

P B Graff, M Georganopoulos, E S Perlman, and D Kazanas

Broad Line Radio Galaxies: Jet Contribution to the Nuclear X-γ-ray Continuum

P Grandi and G G Palumbo

Kinematics of Jets in Gamma-ray Blazars

S G Jorstad and A P Marscher

Blazar Monitoring with the Whipple 10 m Gamma-ray Telescope

J Kildea on behalf of the Whipple 10 m Telescope’s Blazar Monitoring Program

Gamma-ray Emission Mechanism in Blazar 3C 279

E J Lindfors, E Valtaoja, M Turler, L Takalo, A Sillanpaa, A Lahteenmaki, and M Tornikoski

Electromagnetic Models of Extragalactic Jets

M Lisanti and R Blandford

Blazar Demographics with MOJAVE and GLAST

M L Lister

Studying Gamma-ray Blazars with the GLAST-LAT

B Lott, J Carson, S Cipriani, C D Dermer, P Giommi, G Madejski, V Longo, and A Reimer on behalf of the GLAST-LAT Science Working Group on Blazars and other AGNs

A Multifrequency Blazar Catalog (Roma-BZCAT)

E Massaro, P Giommi, S Scanni, M Pern, S Piranomonte, C Leto, and A Maselli

Relativistic MHD Simulations of Relativistic Jets with RAISHIN

Y Mizuno, K-I Nishikawa, P Hardee, and G J Fishman

Does the Blazar Gamma-ray Spectrum Harden with Increasing Flux?—What We Learned from EGRET

G Nandikotkur, K M Jahoda, R C Hartman, R Mukherjee, P Sreekumar, M Böttcher, R M Sambruna, and J H Swank

Simulation Study of Magnetic Fields Generated by the Electromagnetic Filamentation Instability

K-I Nishikawa, P Hardee, C B Hededal, Y Mizuno, and G J Fishman

GeV Photon Absorption in Cosmologically Evolving Quasar Environments

A Reimer

Detecting the EBL Attenuation of Blazars with GLAST

L C Reyes

Automatic Quenching of High Energy γ-ray Sources by Synchrotron Photons

L Stawarz and J G Kirk

Direct and Reprocessed γ-ray Emission of kpc-scale Jets in FR I Radio Galaxies

L Stawarz, T M Kneiske, and J Kataoka

Multi-wavelength Observations of Galactic Microquasars

H Takahashi, H Yoshida, H Katagiri, T Mizuno, Y Fukazawa, T Ohsugi, and M Uemura

Radio to Gamma-ray Connection in Blazars

M Tornikoski, A Lahteenmaki, T Hovatta, E Valtaoja, E Lindfors, T Savolainen, and K Wink

The Giant X-ray Flares of Mrk 421 in Spring-Summer 2006

A Tramacere, P Giommi, A Maselli, F Massaro, and M Pern

INTEGRAL and Multiwavelength Observations of the Blazar Mrk 421 during an Active Phase

G G Lichti, E Bottacini, P Charlot, W Collmar, D Horan, V von Kienlin, A Lahteenmaki, K Nilsson, D Petry, A Sillanpaa, M Tornikoski, and T Weekes
Searching for the First Blazars with LMT and GLAST
G M Rodriguez-Linán and A Carramiñana

Probing AGN Broad Line Regions with LAT Observations of FSRQs
J E Carson, J Chang, and M Böttcher

Use of Multiwaveband Polarization and Light Curves to Identify Sites of Gamma-ray Emission in Blazar Jets
A P Marscher and S G Jorstad

GLAST and Ground-based γ-ray Astronomy
S Funk, J E Carson, B Grebels, F Longo, J E McEnery, D Paneque, O Reimer, and L C Reyes on behalf of the GLAST-LAT Collaboration

Source Identification with GLAST
V Lonjou and J Knödlseder on behalf of the GLAST-LAT Collaboration

A Milagro Survey of the TeV Gamma-ray Sky
G P Walker on behalf of the Milagro Collaboration

What Will Be the Brightest GLAST Sources in the Galaxy?
M S E Roberts

Population Studies of Gamma Ray Sources Using Stacking Analysis at Low Galactic Latitudes
A N Cilhis, O Reimer, and D F Torres

Prospects for Observations of Microquasars with GLAST
R Dubois

Simultaneous Observation of the Gamma-ray Binary LS I+61 303 with GLAST and Suzaku
T Tanaka, Y Fukazawa, T Mizuno, H Katagiri, H Takahashi, K S Kawabata, O Nage, and T Ohsugi

Future GLAST Observations of SNRs and PWNe
S Funk on behalf of the GLAST-LAT Collaboration

Preparing GLAST LAT Studies of the Millisecond Pulsar PSR J0218+4232 and the Blazar 3C 66A
L Guillenmot, V Lonjou, D Dumora, M Lemoine-Goumard, D Parent, T Reposeur, D A Smith, and N Webb

GLAST Simulation Study of an Extended TeV-emitting Supernova Remnant for the Origin of Cosmic-ray Nuclei
H Katagiri, H Yoshida, T Mizuno, H Takahashi, Y Fukazawa, and T Ohsugi

High Energy Emission from Pulsar Outer Magnetospheres
K Hirotani

Simulation of Cosmic Ray Acceleration, Propagation, and Interaction in SNR Environment
S H Lee, T Kame, and D C Ellison

Morphological and Spectral Studies of the Shell-type SNRs RX J1713.7-3946 and RX J0852.0-4622 with H.E.S.S.
D Berge, S Funk, and M Lemoine-Goumard on behalf of the HESS Collaboration

Magnetic Turbulence Production by Streaming Cosmic Rays Upstream of SNR Shocks
J Niemiec and M Pohl

Pulsar Observations with the MAGIC Telescope
M Lopez, N Otte, E Alu, W Bednarek, J L Contreras, K Hirotani, and M Russi on behalf of the MAGIC Collaboration

Search for PSR B1951+32 with the GLAST LAT
D Parent, D Dumora, L Guillenmot, M Lemoine-Goumard, T Reposeur, and D A Smith on behalf of the GLAST LAT Collaboration

Very High Energy Gamma Rays from Supernova Remnants and Constraints on the Galactic Interstellar Radiation Field
T A Porter, I V Moskalenko, and A W Strong

GLAST LAT and Pulsars: What Do We Learn from Simulations?
M Razzano and A K Harding

A Search for Short-lived Transient Phenomenon in LS I+61 303
C R Shadr and S Stumer

Gamma-ray Emission from X-ray Binaries
C R Shrader

Fully Resolved Optical Polarization of the Crab Pulsar
A Słowikowska, G Kanbach, and A Stefanescu
INTEGRAL Observations of the Pulsar PSR J1846-0258 421
   S J Sturmer and C R Shrader
A Three-dimensional Model for the High-energy Emissions from the Crab Pulsar 423
   J Takata, H -K Chang, and K S Cheng
Early Pulsar Observations and GLAST LAT Performance 425
   T Reposeur, D Dumora, L Guillenot, M Lemoine-Goumard, D Parent, and D Smith
Implications of the VHE γ-ray Spectral Variability of LS 5039 427
   M Bottcher
An Extended Radio Counterpart of TeV J2032+4130? 429
   Y M Butt, J A Combi, J Drake, J P Finley, A Konopelko, M Lister, J Rodriguez, and D Shepherd
Population Statistics of Normal, Radio and Gamma-ray Pulsars from the Galactic Disk 431
   P L Gonthier, S A Story, B D Clow, A K Harding, and I A Grenier
A Blind Search for Pulsars in EGRET Data Using a Time Differencing Technique 433
   M Ziegler, R P Johnson, B M Baughman, W B Atwood, and G A Caiandro
A Fast Photon Counting Camera for γ-ray Pulsar Astronomy 436
   B Orozco, A Carraminana, R Michel, S Zazueta, and J L A Fordham
HAWC (High Altitude Water Cherenkov) Observatory for Surveying the TeV Sky 438
   B L Dingus on behalf of the HAWC Collaboration
High Sensitivity All Sky X-ray Monitor and Survey with MAXI 440
   N Isobe, T Mihara, M Kohama, M Suzuki, M Matsuoka, S Ueno, H Tomida, N Kawai, J Kataoka,
   A Yoshida, K Yamaoka, H Takei, M Nagaya, and M Mott
Capability of EAS Arrays for Gamma-ray Astronomy 442
   A Smith on behalf of the HAWC Collaboration
WEBT Multifrequency Support to the GLAST Mission 444
   M Vilaita, C M Taiten, and G Tosti on behalf of the WEBT Collaboration
The Synergy between the LAT and GBM in GLAST’s Study of Gamma-ray Bursts 446
   D L Band
MAGIC Upper Limits on the Very High Energy Emission from GRBs 448
   D Bashore, N Galante, M Gaug, M Garzareczyk, F Longo, S Mizobuchi, V Scarpi, and A Stamerra
   on behalf of the MAGIC Collaboration
GLAST Burst Monitor On-board Triggering, Locations, and Event Classification 450
   M S Briggs, V Connaughton, W Paciesas, R Preece, C A Meegan, G Fishman, C Kouveliotou,
   C Wilson-Hodge, R Diehl, J Grenier, A von Kienlin, G Lichti, H Steinle, and R M Kippen
GeV Flares Observations with MAGIC LAT 452
   A Gallo, F Longo, N Omodei, and L Pro on behalf of the GLAST LAT GRB Group
Detecting High-energy Photons from Gamma-ray Bursts 454
   N Gupta and B Zhang
Luminosity Distribution of GRB Afterglows: A Theoretical Study 456
   G Johannesson, G Bjornsson, and E H Gudmundsson
The ”Supercritical Pile” GRB Model: Light Curves and GRB, XRF Unification 458
   D Kazanas, A Mastichiadis, and M Georganopoulos
Performance of the GLAST/LAT for the Observation of GRB Spectra 460
   N Konin and F Piron on behalf of the GLAST/LAT GRB Science Working Group
Gamma-ray Bursts in the Swift and GLAST Era 462
   T Le and C D Dermer
Gamma-ray Burst Observations with GLAST and TeV Observatories 464
   F Longo, J McEnery, N Omodei, B Basteri, and F Piron on behalf of the GLAST LAT Collaboration
LAT and Solar Neutrons: Preliminary Estimates 466
   F Longo on behalf of the GLAST LAT Collaboration
GLAST Measurements of Pion-Decay and Neutron Emission in Solar Flares 468
   R J Murphy and C D Dermer
Search for Very High Energy Emission from Gamma-ray Bursts Using Milagro 470
   P M Saz Parkinson on behalf of the Milagro Collaboration
LAT Observation of GRBs: Simulations and Sensitivity Studies 472
   N Omodei and J Norns on behalf of the GLAST LAT Collaboration
A Program to Search for Transient Microwave Emission from GRBs and Other High-energy 474
   Sources Using Archival WMAP Datasets
   J G Stacy, G L Case, D R Hart, P D Jackson, and C Winkler
Search for GeV Emission from Gamma-ray Bursts Using Milagro Scaler Data
D A Williams on behalf of the Milagro Collaboration

Simulation of Prompt Emission from GRBs with a Photospheric Component and Its Detectability by GLAST
M Battelino, F Ryde, N Omodei, and D L Band

Contribution to the Extragalactic Gamma-ray Background from Discrete Sources
D Bhattacharya, P Sreekumar, and R Mukherjee

Effects of the Gas Content on the Gamma-ray Emission from the Galactic Bulge
W Gillard, V Loniou, K Ferriere, P Jean, I V Moskalenko, and A Strong

GRBs from the First Stars
F Iocco

Simulation of Gamma Rays from Proton Interaction in Local Galaxies
N Karlsson, J Cohen-Tanugi, T Kamae, and H Tajima

Suzaku Observations of Non-thermal X-ray Emission from Galaxy Clusters
N Kawano, Y Fukazawa, and K Nakazawa

Developing the Galactic Diffuse Emission Model for the GLAST Large Area Telescope
I V Moskalenko, A W Strong, S W Digel, and T A Porter on behalf of the GLAST LAT Collaboration

GLAST Detectability of Gamma-ray Emission from Photon Fields of Luminous Stars
E Orlando and A Strong

Cosmic Ray Electron Science with GLAST
J F Ormes and A Moiseev

The 3D-distribution of Gas in the Milky Way Galaxy
M Pohl

What Can We Learn from the Large Magellanic Cloud with GLAST?
G Weidenspointner, V Loniou, and J Knödlseder

LAT Perspectives in Detection of High-energy Cosmic Ray Electrons
A Moiseev, J F Ormes, and S Funk on behalf of the LAT Collaboration

Extended Solar Emission—An Analysis of the EGRET Data
E Orlando, D Petry, and A Strong

GLAST Sensitivity to Cosmological Dark Matter Annihilations into γ-rays
L Bergström, J Conrad, J Edsjö, and A Sellerholm

GLAST Sensitivity to Point Sources of Dark Matter Annihilation
A Morselli, G Bertone, G Busetto, R Rando, and TBringmann

Identifying Dark Matter Burners in the Galactic Center
I V Moskalenko and L L Wai

Dark Matter Annihilation in Draco: New Considerations of the Expected Gamma Flux
M A Sanchez-Conde

Search for Millisecond Flares in INTEGRAL and RHESSI
GRBs—Towards Probing Quantum Gravity with GRBs
C B Wunderer, E Bellm, S E Boggs, and K Hurley

Estimate for GLAST LAT Milky Way Dark Matter WIMP Line Sensitivity
Y Edmonds, E Balz, E Bloom, J Cohen-Tanugi, G Godfrey, L Wai, P Wang, J Scargle, and J Conrad
on behalf of the GLAST LAT Collaboration

Explore Physics Beyond the Standard Model with GLAST
A M Lionetto

On Detecting Strange Quark Matter with GLAST-LAT
P Carlson and J Conrad

The GLAST Guest Investigator Program
D L Band on behalf of the GLAST SSC

Energy Calibration of Cherenkov Telescopes Using GLAST Data
D Bastier, G Busetto, A De Angelis, F Longo, G Piano, R Rando, and A Saggion

GLAST Burst Monitor Signal Processing System

The GLAST Large Area Telescope Detector Performance Monitoring
A W Borgland and E Charles on behalf of the GLAST Large Area Telescope Instrument Science Operations Center (ISOC)
Event-by-Event Energy Estimation and Spectral Determination with Milagro
B T Allen and G B Yodh on behalf of the Milagro Collaboration

Localization of Gamma-ray Point Sources with the GLAST LAT
T H Burnett on behalf of the GLAST LAT Collaboration

Application of HEALpix Pixelization to Gamma-ray Data
T H Burnett, B Lesmick, and M Roth

The GLAST LAT Instrument Science Operations Center
R A Cameron on behalf of the GLAST LAT Instrument Science Operations Center

A MST Algorithm for Source Detection in γ-ray Images
R Campana, E Massaro, D Gasparini, S Cutini, and A Tramacere

Monitoring the Low-energy Gamma-ray Sky using Earth Occultation with GLAST GBM
G L Case, C A Wilson-Hodge, M L Cherry, R M Kippen, J C Ling, R G Radoinski, and W A Wheaton

Study of the LAT PSF of the Gamma-ray Large Area Telescope
C Cecchi, S Germani, M Pepe, E Bonamente, S Ciprini, P Lubrano, and G Tosti

Large Area Telescope On-orbit Calibration and Configuration
E Charles and A Borgland

Automated Science Processing for GLAST LAT Data
J Chang, J Carson, and W Focke

1D, 2D, 3D Wavelet Methods for Gamma-ray Source Analysis
S Ciprini, G Tosti, F Marcucci, C Cecchi, G Discepolo, E Bonamente, S Germani, D Impiombato, P Lubrano, and M Pepe

The Use of Weighting in Periodicity Searches in All-sky Monitor Data: Applications to the GLAST LAT
R Corbet and R Dubois

The Calorimeter for the GLAST Large Area Telescope

Validation of the GLAST Burst Monitor Instrument Response Simulation Software

The GLAST LAT Silicon Strip Tracker Converter
R P Johnson on behalf of the LAT Tracker Team

LAT Onboard Science: Gamma-ray Burst Identification
F Kuehn, J Bonnell, R Hughes, J Norris, S Ritz, J Russell, P Smith, and B Winer

A Set of Tools for Determining the LAT Performance in Specific Applications
B Lott, J Ballet, J Chang, V Lonjou, and S Funk

The GLAST Background Model
J F Ormes, W Atwood, T Burnett, E Grove, F Longo, J McEnery, T Mizuno, and S Ritz on behalf of the GLAST Mission Team

Novel Technique for Monitoring the Performance of the LAT Instrument Onboard the GLAST Satellite
D Paneque, A Borgland, A Bovier, E Bloom, Y Edmonds, S Funk, G Godfrey, R Rando, L Lai, and P Wang on behalf of the GLAST LAT Collaboration

Control, Monitoring and Analysis Software for the VERITAS Array
J S Perkins on behalf of the VERITAS Collaboration

Developing Gamma-ray Pulsar Simulation Tools for GLAST
M Razzano on behalf of the GLAST LAT Collaboration

The Trigger and Onboard Filter of the GLAST Large Area Telescope
R Hughes, J E Grove, M Kocian, S Ritz, J J Russell, E Siskind, P Smith, T Usher, and B Winer on behalf of the LAT Collaboration

Analysis Methods for Milky Way Dark Matter Halo Detection
A Sander, L Lai, B Winer, R Hughes, and I V Moskalenko
