The Beltrami Equation

Tadeusz Iwaniec
Gaven Martin
## Contents

Chapter 1. Introduction 1

Chapter 2. Quasiconformal Mappings 5
  2.1. Analytic Definition of Quasiconformality 5
  2.2. The Beltrami Equation 6
  2.3. Radial Stretchings 7
  2.4. Classical Regularity Theory 8

Chapter 3. Partial Differential Equations 11
  3.1. The Transformation Formula 11
  3.2. A Fundamental Example 12
  3.3. The Construction 13
  3.4. Cavitation and Riemann Surfaces 15

Chapter 4. Mappings of Finite Distortion 17
  4.1. Orlicz-Sobolev Spaces 18
  4.2. Monotonicity 21
  4.3. A Class of Orlicz Functions 22
  4.4. The Monotonicity Theorem 23
  4.5. Modulus of Continuity 24

Chapter 5. Hardy Spaces and BMO 27
  5.1. Mollifiers 27
  5.2. Hardy-Orlicz Spaces 28
  5.3. BMO 29
  5.4. $L \log L$-Integrability 30
  5.5. Liouville Type Theorems 30

Chapter 6. The Principal Solution 33
  6.1. Solutions 33
  6.2. Uniqueness of Principal Solutions 34
  6.3. Stoilow Factorization 35

Chapter 7. Solutions for Integrable Distortion 39
  7.1. Distortion in the Exponential Class 41
  7.2. An Example 42
  7.3. Results 43
  7.4. Distortion in the Subexponential Class 45
  7.5. An Example 45
  7.6. Further Generalities 47
  7.7. Existence Theory 48
7.8. Global Solutions 60
7.9. Holomorphic Dependence 64
7.10. Examples and Non-Uniqueness 67
7.11. Equations in the Plane 73
7.12. Compactness 77
7.13. Removable Singularities 79
7.14. Final Comments 80

Chapter 8. Some Technical Results 81
8.1. The Divergence Condition 81
8.2. Integration by Parts 84
8.3. Higher Integrability 86

Bibliography 89
