## Contents

1 Introduction

1.1 Examples  
1.2 Basic definitions and the filtering equation  
1.3 An overview

2 Brownian motion and martingales

2.1 Martingales  
2.2 Doob–Meyer decomposition  
2.3 Meyer's processes  
2.4 Brownian motion

3 Stochastic integrals and Itô's formula

3.1 Predictable processes  
3.2 Stochastic integral  
3.3 Itô's formula  
3.4 Martingale representation in terms of Brownian motion  
3.5 Change of measures  
3.6 Stratonovich integral

4 Stochastic differential equations

4.1 Basic definitions  
4.2 Existence and uniqueness of a solution  
4.3 Martingale problem  
4.4 A stochastic flow  
4.5 Markov property
5 Filtering model and Kallianpur–Striebel formula

5.1 The filtering model 82
5.2 The optimal filter 83
5.3 Filtering equation 86
5.4 Particle-system representation 93
5.5 Notes 95

6 Uniqueness of the solution for Zakai’s equation 96

6.1 Hilbert space 96
6.2 Transformation to a Hilbert space 98
6.3 Some useful inequalities 103
6.4 Uniqueness for Zakai’s equation 109
6.5 A duality representation 111
6.6 Notes 120

7 Uniqueness of the solution for the filtering equation 121

7.1 An interacting particle system 121
7.2 The uniqueness of the system 124
7.3 Uniqueness for the filtering equation 129
7.4 Notes 131

8 Numerical methods 132

8.1 Monte-Carlo method 132
8.2 A branching particle system 137
8.3 Convergence of $V^n_t$ 143
8.4 Convergence of $V^n$ 149
8.5 Notes 155

9 Linear filtering 157

9.1 Gaussian system 157
9.2 Kalman–Bucy filtering 160
9.3 Discrete-time approximation of the Kalman–Bucy filtering 164
9.4 Some basic facts for a related deterministic control problem 165
