AT THE EDGE OF THE UNIVERSE:
LATEST RESULTS FROM THE DEEPEST
ASTRONOMICAL SURVEYS

Proceedings of a meeting held at
Sintra, Portugal
9-13 October 2006

Edited by

José Afonso
Observatório Astronómico de Lisboa, Faculdade de Ciências,
Universidade de Lisboa, Lisboa, Portugal

Henry C. Ferguson
Space Telescope Science Institute, Baltimore, Maryland, USA

Bahram Mobasher
Department of Physics and Astronomy, University of California, Riverside,
California, USA

and

Ray Norris
CSIRO Australia Telescope National Facility, Sydney, Australia
Contents

Preface xiii

Acknowledgements xiv

Participants xvi

Session I.

Large-scale Radiative Transfer Simulations of Reionization Models and Observability 3
I T Iliev, G Mellema, P R Shapiro, P McDonald, and U-L Pen

The End of the Reionization Epoch Probed by Lyα Emitters at z = 6 5 11
N Kashikawa

Galaxy Formation the First 10⁹ Years 17
J Silk

Star Forming Galaxies at z ≈ 6 and Reionization 27
A Bunker, E Stanway, R Ellis, R McMahon, L Eyles, M Lacy, D Stark, and K Chu

The Stellar Masses and Star Formation Histories of Galaxies at z ~ 6
Constraints from Spitzer GOODS Observations 35
H Yan, M Dickinson, M Giavalisco, D Stern, P R M Eisenhardt, and H C Ferguson

Evolution of the Rest-frame UV LF from z ~ 8 to z ~ 4 41
R J Bouwens and G D Illingworth

Lyman Break Galaxies in the VLT/FORS2 Spectroscopic Campaign in the GOODS-S Field 45
E Vanzella, S Cristiani, M Dickinson, M Giavalisco, K Lee, M Nonino, P Rosati, and the GOODS team

The Evolution of Galaxies from Optical and Near-infrared Surveys 51
A Cimatti

An Ongoing Multi-wavelength Survey of Lyα Emitters at Redshifts z = 2 – 8 61
K K Nilsson, J P U Fynbo, P Møller, and A Orsi
News from $z \sim 6$–10 Galaxy Candidates Found Behind Gravitational Lensing Clusters

D Schaerer, R Pello, E Egami, A Hempel, J Richard, J -F Le Borgne, J -P Kneib, M Wise, F Boone, and F Combes

Young Galaxies in the Early Universe The Physical Properties of Luminous $z \sim 5$ LBGs Derived from Their Rest-frame UV to Visible SEDs

A Verma, M Lehnert, N Forster-Schreiber, M Bremer, and L Douglas

Spitzer Constraints on the Stellar Population of Ly$\alpha$ Emitting Galaxies at $z \sim 5.7$

K Lai, J-S Huang, G Fazio, L L Cowie, E M Hu, and Y Kakazu

The Star Formation Density at $z \sim 7$

F Mannucci

Building the Bridge Survey The Luminosity Function of Ly$\alpha$ Emitters at $z \sim 3$

L F Olsen, M Limousin, J P U Fynbo, C Ledoux, K K Nilsson, and P Møller

Ly-$\alpha$ Line Profile Modeling of $z \sim 3$ LBG with a 3D Radiation Transfer Code

A Verhamme, D Schaerer, H Atek, and C Tapken

Session II

At the Edge of the X-ray Universe Results from the Deepest Extragalactic Surveys

W N Brandt

The Obscured Quasar Population from Optical, Mid-infrared, and X-ray Surveys

C Vigna-J, A Comastri, and D M Alexander

Detecting Obscured AGN in the Distant Universe with Spitzer

J L Donley, G H Rieke, P G Pérez-González, J R Rigby, and A Alonso-Herrero

Results from the Subaru/XMM-Newton Deep Field

C Simpson, S Rawlings, A Martínez-Sansigre, R Ivison, and the SXDF Team

The Luminosity Function of High-redshift QSOs

F Fontanot, S Cristiani, P Monaco, E Vanzella, M Nonino, W N Brandt, A Grazian, and J Mao

Exploring the Evolutionary Status of $z \approx 2$ SCUBA Galaxies Hosting Active Galactic Nuclei

D M Alexander

Charting the Obscured AGN Population in the Deepest XMM-Newton Surveys

T Dwelly, M Page, I McHardy, D Moss, N Seymour, and N Loaring
Contents

Multi-wavelength Study of Obscured AGN in the Chandra Deep Field South

V Mainieri, P Tozzi, R Gilli, P Rosati, R-R Chary, and M Dickinson 151

The Environment of X-ray AGN at \( z \approx 1 \)

A Georgakakis, K Nandra, M C Cooper, and the AEGIS collaboration 157

Application of Maximum Likelihood Method to the Swift/BAT Hard X-ray Survey Preliminary Results

M Ajello, J Greiner, A Rau, G Kanbach, A W Strong, J Tueller, C B Markwardt, R F Mushotzky, S D Barthelmy, and N Gehrels 163

The Power of Stacking X-ray Spectroscopy in Deep Chandra Fields

M Brusa, F Civano, A Comastri, and R Gilli 167

X-ray Source Counts in the XMM-COSMOS Survey

The 3D Soft X-ray Cluster-AGN Cross-correlation Function in the ROSAT NEP Survey

N Cappelluti, H Bohringer, P Schuecker, E Pierpaoli, C R Mulis, I M Gioia, and J P Henry 175

Beyond the Limit of Deep X-ray Surveys Galaxies or AGN?

R E Griffiths, T Miyaji, and A Knudson 179

Searching for Normal Galaxies in the Serendipitous XMM-Newton Catalogue (1XMM)

E Rovilos, I Georgantopoulos, A Georgakakis, and C Goudis 183

Session III.

Deep Radio Surveys

J J Condon 189

The Statistical Properties of the Very Weak Radio Source Population in the GOODS/ACS HDF-N Region

T W B Muxlow, R J Beswick, H Thrall, A M S Richards, S T Garrington, and A Pedlar 199

The micro-Jy Radio Source Population the VLA-CDFS View

P Padovani, V Mainieri, P Tozzi, K I Kellermann, E B Fomalont, N Miller, P Rosati, and P Shaver 205

Radio SEDs of High-redshift Radio Galaxies

I J Klamer, R D Ekers, and R W Hunstead 213

Proto-clusters and High-\( z \) Radio Galaxies

L Pentericci, G K Miley, and B P Venemans 219

ATLAS Deep Radio Observations of Six Square Degrees

R P Norris, E Middelberg, and B J Boyle 229
Results from GMRT 150 MHz Radio Observations Search for Steep Spectrum Radio Sources 237
   C H Ishwara-Chandra and R Marathe

Deep ATCA and GMRT Observations of the CDFS 243
   J Afonso, H Messias, B Mobasher, A Koekemoer, R P Norris,
   L Cram, N Kanekar, D Farrah, and J Chengalur

Science with the Next Generation of Radio Surveys from LOFAR to the SKA 251
   M J Jarvis

On the SEDs of Jets at Redshifts between 0 01 and 3 8 257
   S Antón, I Browne, A Caccianiga, and M Marcha

The Evolution of Radio Galaxies Their Infancy 261
   P Augusto

Sub-arcsecond, microJansky Radio Properties of Spitzer Identified Mid-infrared Sources in the HDF-N/GOODS-N Field 265
   R J Beswick, T W B Muxlow, H Thrall, and A M S Richards

Cosmological Evolution of Radio Galaxies 271
   M Jamrozy

Disentangling AGN/Starbursts in Deep Radio Surveys - Radio Spectral Properties 275
   D Moss, N Seymour, I M M Hard, T Dwelly, M J Page, and N S Loaring

High-z Radio Starbursts Host Obscured X-ray AGN 279
   A M S Richards, R Beswick, S T Garrington, T W B Muxlow,
   H Thrall, M A Garrett, M Kettens, H J van Langevelde,
   E Gonzalez-Solarez, N A Walton, and M G Allen

Radio Observations of the Chandra Deep Field South 283
   E Rovilos, I Georgantopoulos, A Georgakakis, J Afonso, B Mobasher
   and A Koekemoer

The Star-formation History of the Universe as Revealed from Deep Radio Observations of the 13H XMM-Newton/Chandra Deep Field 287
   N Seymour, T Dwelly, D Moss, I M M Hard, M Page, N Loaring, and
   G Reieke

High Resolution Observations of a Selection of Faint 1 4GHz Radio Counterparts to Optical Sources in the HDF-N 291
   H Thrall, T W B Muxlow, R J Beswick, and A M S Richards

Session IV.

The First Massive Galaxies 297
   E van Kampen and M Crawford

Session V

Insights into Galaxy Evolution from Mid-infrared Wavelengths

R-R Chary

Infrared Spectral Energy Distributions of Submillimetre Galaxies

A Pope, R-R Chary, M Dickinson, and D Scott

Spitzer Observations of High Redshift Radio Galaxies

N Seymour, D Stern, and C De Breuck

Ultraluminous Infrared Galaxies at $1.5 < z < 3$ Occupy Dark Matter Haloes of Mass $\sim 6 \times 10^{13} M_\odot$

D Farrah, C J Lonsdale, C Borys, F Fang, I Waddington, S Oliver, M Rowan-Robinson, T Babbedge, D Shupe, M Polletta, H E Smith, and J Surace

Tracing the Life Cycle of Massive Red Galaxies

M Doherty, A J Bunker, R S Ellis, and P J McCarthy

The Spatial Clustering of Mid-IR Selected Sources in the GOODS Fields

R Gilh, E Daddi, and the GOODS team

Unveiling Hidden Connection between High-$z$ Starbursts and Present Spheroids with Multi-wavelength Studies

H Hanami, T Takagi, N Fujishiro, and K Nakamshi

A Mid-infrared Spectroscopic Study of Submillimeter Galaxies

E Valiante, D Lutz, E Sturm, R Genzel, L J Tacconi, M D Lehnert, and A J Baker

Session VI.

The Star Formation History of the Universe

A M Hopkins

The Long Faint Tail of the High-redshift Galaxy Population

M Sawicki, I Iwata, K Ohta, D Thompson, N Tamura, M Akiyama, K Aoki, M Ando, and G Kiuchi

Do We See the Same Universe in Far Infrared and in Far Ultraviolet?

V Buat, D Burgarella, T T Takeuchi, J Iglesias-Páramo, D Marcillac, E le Floc'h, G Rieke, and C K Xu

Lyman Break Galaxies and Luminous IR Galaxies at $z \sim 1$

D Burgarella, E Le Floc'h, T T Takeuchi, V Buat, J S Huang, G H Rieke, and K D Tyler

Neutral Gas and Metals from $z = 4$ to $z = 0.5$

C Péroux

The Chemical Composition of Damped Lyman-alpha Galaxies

V P Kulkarni
The Evolution of Galaxy Dust Properties for $1 < z < 2.5$
S Noll, D Pierini, M Pannella, and S Savaglio

The Evolution of the Galaxy Merger Rate at $z < 1$
J M Lotz

The Stellar Mass Tully-Fisher Relation to $z = 1.2$
S A Kassin, B J Weiner, S M Faber, D C Koo, J M Lotz, and the AEGIS Collaboration

The Luminosity-size Relation of Galaxies to $z = 1.8$
E Cameron and S P Driver

Morphological Diversities among the High Redshift Galaxies in GOODS
S Ravindranath

The Evolution of the Near-IR Galaxy Luminosity Function and Colour Bimodality up to $z \simeq 2$
M Cirasuolo, R J McLure, J S Dunlop, O Almaini, S Foucaud, I Small, K Sekiguchi, and C Simpson

Detecting Galaxy Clusters at $0.1 < z < 2.0$
L Clewley, C van Breukelen, and D Bonfield

SWAN Galaxy Morphology and Evolution from Adaptive Optics Imaging
G Cresci, R I Davies, A J Baker, F Mannucci, and M D Lehnert

Spitzer Observations of Galaxy Clusters
D Fadda, A Biviano, F Marleau, L Storrie-Lombardi, and F Durret

2D Study of a Representative Sample of Low-z (U)LIRGs Using Integral Field Spectroscopy
M García-Marín, L Colina, S Arribas, A Alonso-Herrero, and A Monreal-Ibero

Stellar Metallicity of Star-forming Galaxies at Redshift $z \sim 2$
C Halliday and A Cimatti

Morphology of $z \sim 1$ Galaxies from Deep K-band AO Imaging in the COSMOS Field
M Huertas-Company, D Rouan, G Soucail, O Le Fèvre, and L Tasca

Mass and Kinematics of Late-type Galaxies ($1.3 < z < 3.3$) from the VVDS
M Lemoine-Busserolle, T Contini, O Le Fèvre, M Kissler-Patig, and the VVDS Consortium

Galaxy-Galaxy Lensing with the CFHT Legacy Survey
L Parker
The VIRMOS-VLT Deep Survey the Last 10 Billion Years of Evolution of Galaxy Clustering  
A Pollo, L Guzzo, O Le Fevre, B Meneux, A Cappi, H J McCracken,  
A Iovino, C Marconi, D Bottini, B Garilli, V Le Brun, D Maccagni,  
J P Picat, R Scaramella, M Scodeggo, L Tresse, G Vettolani,  
A Zanichelli, C Adamo, S Arnouts, S Bardelli, M Bolzonella,  
S Charlot, P Ciliegi, T Contini, S Foucaud, P Franzetti, I Gavagnaud,  
O Ilbert, B Marano, A Mazzure, R Merighi, S Paltani, R Pellò,  
L Pozzetti, M Radovich, G Zamorani, E Zucca, M Bondi,  
A Bongiorno, J Brinchmann, O Cucciati, S de la Torre, F Lamareille,  
Y Melier, P Merluzzi, S Temporin, D Vergani, and C J Walcher

Star Formation in Galaxies vs Galaxy Environment from the Joint GALEX - CFHTLS - VVDS - SWIRE Data  
A Pollo, S Arnouts, S Heinis, B Milhard, the GALEX team, and the VVDS team

Unravelling the Morphologies of Luminous Compact Galaxies Using the HST/ACS GOODS Survey  
A Rawat, A K Kembhavi, F Hammer, H Flores, and S Barway

Evolution of the Red Sequence in Simulated Galaxy Groups  
A D Romeo, N R Napolitano, G Covone, and J Sommer-Larsen

The GOODS-MUSIC Sample Evolution of the Luminosity Function of Red and Blue Galaxies  
S Sahmben, E Giallongo, and A Grazian

Exploring the Edge of the Stellar Universe with Gamma-ray Observations  
F W Stecker

The Evolution of the Visible and Hidden Star Formation in the Universe Implication from the Luminosity Functions in the FUV and FIR  
T T Takeuchi, V Buat, and D Burgarella

SMBH Mass Function from Velocity Dispersion and Luminosity  
E Tundo, M Bernardi, R K Sheth, J B Hyde, and A Pizzella

The VIMOS VLT Deep Survey A Census of Active and Passive Galaxies to Redshift 1.3  
D Vergani, on behalf of the VVDS collaboration

Diffraction-limited Integral Field Spectroscopy of High Redshift Star Forming Galaxies  
S A Wright and J E Larkin
