Exploring the Nature of Management

Proceedings of the Third International Conference on Monitoring and Management of Visitor Flows in Recreational and Protected Areas

Rapperswil, Switzerland
13-17 September 2006
Contents

Introduction ........................................................................................................................................ 13

Keynote Addresses ............................................................................................................................ 15

North American Idols: Personal Observations on Visitor Management Frameworks and Recreation Research
Wolfgang Haider .................................................................................................................................. 16

Trends in Alpine Tourism: The Mountaineers’ Perspective and Consequences for Tourism Strategies
Andreas Muhar, Thomas Schauppenlehner & Christiane Brandenburg .............................................. 23

People, Pixels and Parks: Forest Conservation in the Tropics
Harini Nagendra .................................................................................................................................. 28

The New Paradigm for Protected Areas: Implications for Managing Visitors in Protected Areas
David Sheppard .................................................................................................................................... 33

New Parks of National Importance in Switzerland
Bruno Stephan Walder ........................................................................................................................ 46

The Significance of Visitor Monitoring Data for Management, Planning and Policy
Arne Arnberger, Joel Erkkonen, Tuija Sievänén & Odd Inge Vistad .................................................. 49

Monitoring Public Reactions to the U.S. Forest Service Recreation Fee Program
James D. Absher, Alan R. Graefe & Robert C. Burns ......................................................................... 50

Outdoor Recreationists in Oregon and Washington: A Comparison of Recreationists’ Perceptions of Experience Satisfaction across Two US Pacific Northwest States
Robert C. Burns & Alan R. Graefe ...................................................................................................... 52

Monitoring the Value of Visitors to Protected Areas: The Australian Approach
Jack Carlsen & David Wood ................................................................................................................ 54

Monitoring Sustainable Nature Tourism in Practice – Experiences From Pyhät-Luosto National Park, Finland
Joel Erkkonen & Pertti J. Itkonen ........................................................................................................ 56

Using Visitor Monitoring to Reduce Ecological Impacts Due to Picnicking and Grilling in Urban Forests in the Vicinity of Basle, Switzerland
Tessa K. Hegetschweiler, Hans-Peter Rusterholz & Bruno Baur .......................................................... 58

The Influence of Motorized Access on Hiker’s Route Selection at Mt. Tsukuba
Taiichi Ito & Mariko Ryugo ................................................................................................................. 60

Visitor and Environmental Impact Monitoring as Basis for Sustainable Nature Tourism in Estonian Recreational Areas
Marge Rammo, Kaidi Maran, Anu Almik & Kalle Karoles .................................................................. 62

Simon J. Melville ..................................................................................................................................... 64

Visitor Counting with Acoustic Slab Sensors in the Swiss National Park
Reto Rupf-Haller, Michael Wernli & Flurin Filli .................................................................................. 72

National Park Characteristics, Regional Setting and Visitor Flows
Jenni Puustinen, Eija Pouta, Marjo Neuvonen & Tuija Sievänén .......................................................... 78

Visitor Monitoring in Norwegian National Parks? If so: How Will it Find a Position in the Present Situation with Low Funding, Biological Hegemony, Expanding User Interests and Indistinct Management Priorities?
Odd Inge Vistad .................................................................................................................................. 80

Recreation Ecology and Visitor Impact Research: Past, Present and Future
Christopher Monz & Yu-Fai Leung (Chairs) ....................................................................................... 83

Recent Recreation Ecology Research in Australia
Ralf Buckley, Catherine Pickering, Guy Castley & Andrew Growcock ............................................. 84
