Preface XV
Organization XVII
Acknowledgements XIX

## Field investigation and instrumentation

- Stress field characteristics and prediction of rockburst in the tunnel area from Make river to Keke river in the west line of SNWDP
  - M.F. Cai, X.O. Xia, H. Peng & X.M. Ma

- Identification of geological interfaces from drilling process monitoring in ground investigation
  - W. Gao, J. Chen & Z.Q. Yue

- Surface movement monitoring and analysis based on GIS
  - C.L. Li & X.L. Li

- In situ stress state in engineering area of Dali-Lijiang railway and its impact on the railway project
  - X.M. Ma, H. Peng & J.S. Li

- In situ stress monitoring network along Qinghai-Tibet railway
  - H. Peng, Z.H. Wu & X.M. Ma

- Stress monitoring for tunnel using distributed optical fiber BOTDR sensors
  - H.T. Qiu, C. Li, H.L. Cui, D. Zhang & Y. Ding

- Study on ground stress distribution law in Longkou sea area
  - B. Wang, Y.F. Gao, J.Y. Jia, F. Xing & Y.F. Zhang

- A comparison of evaluation of rock mass deformation modulus from in-situ method and indirect one (empirical method) in Parsian dam site
  - N.S. Zadeh

## Rock properties and mechanical behavior

- Stress and scale effects of the hydraulic properties of fractured rocks
  - L. Jing & A. Baghbanan

- Experimental study on deformation of deep unsaturated-saturated Tuff in Lancang lead-deposit
  - G.Z. Cao, Y. Qiang & F. Li

- Detection of thin weak zone in weathered rocks from automatic monitoring of pneumatic rotary-percussive drilling
  - J. Chen, W. Gao & Z.Q. Yue

- Study on porosity changes of Longyou sandstone under chemical corrosion

- A thermomechanical damage approach of constitutive models and its application in geomaterials
  - X. Guo, D.J. Yuan, M.S. Wang & C.G. Zhao

- Numerical lower bound analysis of stability problems of rock and soil masses
  - C.Q. Jia, Q.W. Huang & M.S. Huang
Dynamic response to incident body waves of cylindrical cavities in a porous medium half-space  
L.F. Jiang, Y.Y. Jiao & X.L. Zhang  
Elasto-plastic analysis of jointed rock masses using the numerical manifold method  
J. Jiao & C.S. Qiao  
Rock masses rating for crushed, dressed and ornament stones  
E.E. Kheirelseed, T.H. Ming & S.B. Abdalla  
Research on rock mechanics parameters by using comprehensive evaluation method of rock quality grade-oriented  
SEM microstructure and SEM mechanical tests of swelling red sandstone in Guangzhou metro engineering  
B. Liu, L.G. Tao, T. Li, G.G. Qiao, J. Chen & J.H. Yan  
Application of laser real-time HI to investigation of mesomechanical behaviors of rock  
D.M. Liu & Y.B. Zhou  
The effect of meso-structure on temperature distribution in shale subject to freeze-thaw conditions  
H. Liu & G.S. Yang  
The installation method and test of rock deformation in deep borehole by fiber bragg grating  
Numerical study on size effect of ring specimen under Brazilian test  
W.B. Liu, B.G. Liu & K.Y. Liu  
Laboratory comparative tests for geomaterial strengths with drilling process monitoring technique  
W.J. Lu, T.Y. Lau & Z.Q. Yue  
Experimental investigation on multidirectional loading under different initial stress states in clay  
M.T. Luan, Y. Nie, X.W. Tang, B.X. Liu, J.Y. Li & J.B. Fu  
Investigation of rock resistance coefficient in rocks around tunnel based on unified strength theory  
Q. Ma, J.H. Zhao & X.Y. Wei  
Elimination of end friction in biaxial testing of cubic rock samples  
H.S. Mitri, X.Y. Yun & X.L. Yang  
Study on the dominant factors for primary fissure form in the process of hydraulic fracturing in coal rock  
X.M. Ni, Y.B. Wang, B.Z. Yan & Q.H. Hu  
Real-time CT testing of meso-damage evolution law of frozen cracked sandstone under uniaxial compression conditions  
J.X. Ren & H. Liu  
Study of similarity recognition of drilling parameters in weathered granite formations  
Z.Y. Tan, M.F. Cai & S.J. Wang  
Stress solutions for an inhomogeneous plane strain transversely isotropic rock subjected to horizontal and vertical line loads  
C.D. Wang & J.Y. Hou  
Precision analysis of discontinuity orientation obtained with DCRP  
F.Y. Wang, J.P. Chen & B.F. Shi  
Numerical simulation of rock fracture process under tension  
L.G. Wang, N. Zhao, L.L. Zhang & Y.F. Zhao  
Experimental study on dynamic behavior of unsaturated silty clay  
M. Wang, Q. Yang, G.Q. Kong & M.T. Luan

</table>
Asymmetrical bolt-mesh support technique of deep soft-rock roadway under complex conditions
M.L. Huang, W. Lu, F. Wang & T. Xu

Design computation in shaft lining in thick overlay soil strata
B.S. Jiang & J.G. Wang

Predictive analysis of dynamic instability for Large-Scale-Mined-out-Area (LSMA)
based on field hybrid monitoring in western strong seismic region
X.P. Lai, M.F. Cai, F.H. Ren & S.J. Miao

Research on the variation rule of working face support pressure beneath igneous strata
W. Li, H.G. Ji, J.A. Wang & S.J. Cai

Prediction on subsidence area developing situation of steep inclined coal seem
W. Li, J.A. Wang & T.J. Xu

Research on mining subsidence prediction based on GIS
X.L. Li & C.L. Li

Infiltration mechanism of mine water from abandoned mines through coal rock mass
X.L. Li, L. Liu, L.G. Wang & T.G. Deng

Numerical simulation of splitting failure of Pubugou hydropower station based on energy method
N. Liu, W.S. Zhu, X.J. Li & X.L. Xin

Stability of coal mine roadway intersection in great depth of cover
T.K. Lu & X. Chen

Rapid excavation by blasting technique for hard rock roadways in high gas coal mine
Q.Y. Ma & S.J. Miao

Construction of Chongwenmen station passing under existing subway with underground
excavation method
S.Z. Ma & C.S. Qiao

Effects of geometrical characteristic on cavern integrity for the underground gas storage
J. Mo, W.G. Liang & Y.S. Zhao

Numerical analysis of the capability of water-resisting key strata to prevent water seepage
in mined rock mass
H. Pu & X.X. Miao

Modeling study of roadway stability in Xishimen iron mine based on yielding approach index
L. Qiao, S.Y. Li, W. Gao & L.Y. Zhu

Time series analysis of ground surface displacement induced by tunnel excavation
S.W. Qin, J.P. Chen, Y.H. Xiao & J.S. Que

Discrete element modeling of coal mine waste
P. Sheng, G.Y. Yu & Y.Y. Duan

Analysis and evaluation aspects on stability of water-sealed underground petroleum
storage caverns in rock
H.B. Shi & B.G. Liu

Study on the application of discrete wavelet on the risk diagnose of surrounding rock
stability of gold Mine
B. Song, J.S. Pan & P.F. Wang

Visco-elasto-plastic simulations for coal pillar stability affected by mining
Y.L. Tan, C.J. Sun, Z.K. Wu & Y.J. Chen

Optimization of gas drainage parameters by LBM
G.R. Teng, Y.L. Tan & M. Gao
Mechanical and experimental study on the failure law of massive igneous rock in the upper of the stope
X.W. Wei, H.G. Ji, J.A. Wang, L. Qiao & X.W. Wei

The unloading model of the rock masses and its application on numerical analysis of underground power plant
X.L. Wen & X.M. Guo

Stability analysis on pillars near backfilled goafs
H.W. Wu, S.J. Miao & H.T. Ma

Excavation of No.2 ventilation shaft of Qinling highway tunnel

Three-dimensional strain softening modeling of sublevel open stope method layouts
G.T. Yang, X.B. Li, Q.S. Wang, X.L. Liu & H.J. Chen

Mechanism of mining-induced horizontal fractures in overburden strata

Rock heat-transfer model of high-temperature stopes and its solving process
F.L. Zhan & M.F. Cai

Grid computing for large-scale underground cavern group based on Krylov subspace methods
L. Zhang & H.D. Jiang

Study on the silting mechanism of reinforcing extraordinary cracked coal body using polyurethane
S.T. Zhang, R.J. Si, Y.H. Zou & Z.H. Yang

Influence of cavern space on stability of large cavern groups under earthquakes
B.Y. Zhao, Z.Y. Ma, W. Xu, C.Y. Jin & Z.G. Yang

Study on the evolution of stress in shaft-lining during stratum-grouting

Rock slopes and landslides

Case study of slope stabilization using compression anchor and reinforced concrete beam
G.Z. Chen & J.Q. Jia

Reliability assessment of an open-pit slope using finite element strength reduction method and response surface method
J. Deng, Z. Peng & D.S. Gu

Designing, constructing and monitoring of slopes in rock mass in Croatia
M. Grošić, S. Dugonjić & D. Udović

Analysis of rock slope stability by using the strength reduction method
M. He, N. Li, Q. Liu & J.G. Hao

Application of accelerating genetic algorithm combined with golden section in slope stability analysis
H. Hu, L. Yao & M. Dong

The reliability analysis of Nantong coal gangue slope based on the modified ‘JC’ method
D.S. Li & D.Y. Liu

Stability analysis of cutting slope by using 3D dynamic numerical simulation
K.G. Li, K.P. Hou & Y. Cheng

Different failure mode of gravel and soft clay slopes
S. Li, S.Q. Wang & S.L. Liu

Stability of slope and stope of transition from opencast mining to underground mining
Rock slope stability analysis with nonlinear finite element method
Y.R. Liu, Q. Yang, L.J. Xue & W.Y. Zhou

Vector analysis method of slope stability against sliding
Y.Z. Liu, X.R. Ge, C.G. Li & S.H. Wang

Combination of probabilistic and deterministic methods for three-dimensional assessment of landslide hazard in a large mountainous area
C. Qiu, M. Xie, T. Esaki & Y. Mitani

Strength characteristic of loess with different structure and its application to analyzing earth pressure of loess tunnel
S.J. Shao & G.H. Deng

Influence of underground water on the stability of jointed slopes
W.H. Tan, S.J. Miao & F.H. Ren

Analysis of the formation mechanism of Xiamen subsea tunnel fault
J.S. Wang, Y. Li, L. Wang, Z.G. Cao, Y.X. Zhang & Z.F. Li

Evaluation on country rock quality of tunnel based on set pair analysis
Q.S. Wang, G.X. Wang & X.B. Li

Evaluation of effect for high slope K211 at Ganyue freeway
X.B. Xiong, M.X. Zheng, P. Lin, Y.F. Du & B. Wang

Application of GPS technology to sliding slope deformation monitoring
M.L. Xu & F.Y. Yang

Study on the stability of pusiluogou engineering slope in right bank
P.H. Xu, J.P. Chen, R.Q. Huang, M. Yan, M.F. Gong & J.P. Zhou

Applying catastrophe theory to slope reliability analysis
K. Yang, C. Shi & J.F. Wang

Study on remote monitoring for slope stability of expressway
Z.J. Yang, M.F. Cai, S.J. Miao & Y. Liu

Artificial neural network based predicting model for evaluating stability of landslide
B. Zeng & W. Xiang

Model test of talus slope stability in mountain area
H. Zhang, Z.X. Zhang, H.W. Huang & J.K. Zhou

Deformation and reinforcement of a rock slope in the anticline center
L. Zhang, L.J. Tao & G.Y. Wei

Chaotic particle swarm optimization for non-circular critical slip surface identification in slope stability analysis
H.B. Zhao, Z.S. Zou & Z.L. Ru

In-situ test and study of the internal force features of prestress anchor lattice beam
D.P. Zhu, Y.Z. Xu, E.C. Yan & W. Xiao

Tunnels and foundations

Research on IBATSRD and engineering practice
H.M. Chen & F.X. Sun

Calculation and analysis of plastic zone and ground settlement for shield tunnel
Y. Chen & Q.H. Zhang

Experimental study on mechanical behavior of shield tunnel
Z.Y. Fan, H.W. Huang & D.M. Zhang
Probabilistic determination of the principal parameters controlling the ground settlement curve due to deep excavation
L.Y. Gu, H.W. Huang & W. Chen

Influence of the distribution of a concealed fault on stability of tunnel
P. Jia & C.A. Tang

Application of neutral point theory on designing free segment length of pre-stressed bolts for rock tunnelling
A.B. Jin, Y.T. Gao & S.C. Wu

Uplift capacity of single piles embedded in clay: Prediction and application
G.Q. Kong, Q. Yang, M. Wang & M.T. Luan

Numerical analysis for a strain softening behavior of a shallow NATM tunnels

Deformation analysis by artificial neural networks and FEM database for design and construction of NATM tunnels

Effect of measurement error on the accuracy of the predicted value of the three-point method
L. Li & W.D. Liu

Field instrumentation and 3-D numerical modeling on two adjacent metro shield tunnels beneath tall buildings
T. Li, B. Liu, Y.S. Jiang & L.G. Tao

Influence of intermediate principal stress on seismic stability of rock-fill dams
Y.L. Lin & H.L. Liu

Study on deformation control technique in deep foundation pit engineering
H. Liu & M.F. Cai

Study on the GA-ANIFIS intelligence model for nonlinear displacement time series analysis of long and large tunnel construction
KY. Liu, C.S. Qiao & S.D. Wang

Dynamic testing study of the precast assembled electrical manhole

Experimental study on buoyancy acting on deep foundation in clay
L.H. Song, L. Mei, G.X. Mei & J.M. Zai

Parameter equivalent for Mohr-Coulomb and Hoek-Brown criteria in the case of rock tunneling
X.J. Tang, Y.H. Wang & Y. Wang

Theoretical and experimental study on bearing characteristics of super-long rock-socketed pile groups
H.Z. Wang, R. Cao, Y.W. Zeng & B. Zhu

3-D stability analysis of tunnel structures based on geometric stochastic blocks theory
S.H. Wang, Y.B. Zhang, N. Zhang & S. Wang

Research on stability of the mined-up region for prebuilding steelworks
S.R. Wang, C.F. Wu, Y. Li & Z.F. Li

Calculation of permeability tensor of fractured rock mass based on statistics and its application in the fissured water around the tunnel
T.H. Wang, J.P. Chen, Q. Wang & Y. Li

Tunnel invert heave and the principles of its control: A study from Yunling tunnel
Y. Wang, Y.H. Wang & X.J. Tang
Prediction of surrounding rock pressure of Maanshan tunnel by the method of support vector machine

Free vibration analysis of thick plates on pasternak foundations
D.S. Xu, Y. Wang & R.C. Xiao

Study on the key techniques of tunneling across underground river in Karst areas

Torsional dynamic analysis of a rigid foundation on a non homo-geneous saturated stratum
Y.F. Yang & D.Z. Wu

A new method for vibration response of beam on foundation under moving load
Y.Z. Yang & X.R. Ge

Dynamic superposition of tri-anchor support technology at tunnel junction under complex rock strata
H.Q. Zhang, Y.N. He, L.J. Han, B.S. Jiang, M.L. Zhang, J.G. Wang, L.H. Li & Y.J. Lin

Research on the settlement prediction models of combined piles composite foundations
L.H. Zhang & S.F. Zhao

Model test and numerical simulation of tunnel in country rocks with faults
N. Zhang, S.H. Wang, B. Yang & W.H. Liu

Freezing damage prevention and forecast to roads on congealed ground
X.D. Zhang, Y. Pan & Y.B. Gong

Mining of coal seam under mined out space and foundation stability of transmission tower
Y. Zhang, M.F. Cai, Y.Y. Zhao & P. Luo

Application of synthesized methods for stability analysis of rock cavern foundation
Y.X. Zhang, T.Q. Zhou & G.L. Wang

Mechanism of interaction between tunnel and slopes in Portal construction
X. Zhao, C.C. Xia & C.B. Xu

FBG-based health monitoring for the secondary lining of Bainijing tunnel No.3 in Kunming, China
X.G. Zhao, H.T. Qiu, C. Li & J.P. Liu

Self-adaptable end-bearing composite pile foundation and its application in situ
F. Zhou, J.M. Zai & G.X. Mei

Investigation of coupled stress and seepage of a reservoir completely covered by geomembrane

Application of transient electromagnetic method in colliery hydraulic channels
W. Zuo & J.A. Wang

Dynamics and blasting

Extensional method of rockburst and its application in Huangdao water sealed underground oil tank
X. Chen, X.B. Qi, J.Z. Sun & J.K. Zhang

Study on electromagnetic radiation forecast for rock burst with hard roof
B. Du, J.M. Yao & F.L. He

Numerical simulation on penetrating rock by linear shaped charge jet with uneven thickness cover
A.P. Fei & L.J. Guo

Effects of soil characteristics on seismic-induced pore water pressure around a buried pipeline in a porous seabed
M.T. Luan & X.L. Zhang
Numerical study of the effect of ground stress on coal bursting potential
Research on rockburst prediction with fuzzy comprehensive evaluations based on rough set
D.H. Qiu, J.P. Chen, Q. Wang & J. Zhang
Dynamical destabilization experimental analysis on deep-seated, steep and heavy thick coal
seam in Huating Mine
F.H. Ren, L.J. Zhang & X.P. Lai
Analysis of 3-D seismic response of subway station structures in Wuhan
G.B. Wang, W.P. Xie & X.F. Ma
Study on blasting seismic safety criterion based on wavelet packets equivalent energy technique
X.Z. Wu, K. Zhao & M.F. Cai
Investigation of comprehensive rockburst prediction during deep mining
M.G. Xu, G.H. Yao, Z.H. Ouyang & Z.J. Du
Countermeasure research on preventing rock burst with hard roof by energy mechanism
J.M. Yao & F.L. He
Study on the influence of surrounding rock to the tunnel excavation by numerical simulation
Y.Q. Yu, X.L. Yang, W.M. Liang & M.Y. Hu
Seismic response of QINGDAO sub-sea tunnel considering transversely isotropic
X. Zhang, S.C. Li & X.L. Ding
Microcosmic mechanism analysis and experimental study of rock burst fracture based on SEM
Y.B. Zhang, Y.B. Zhang, Z.Q. Kang & F.P. Li

New techniques and methods
Study on intelligent prediction system of deep pit deformation
J. Guo, Y.H. Wang & Y. Miao
Study on soft rock strata movement with catastrophe theory
C.H. Huang, X.G. Xie, D.H. Xie & T. Feng
Some potentials of discontinuous deformation analysis method
Study on the ecological protection techniques of steep rock slope in high-cold area
T.B. Li, H. Xu, R.B. Zhang & X.H. Zhou
A splitting failure criterion of surrounding rock mass in depth of high in situ stress region and
its engineering application
X.J. Li, W.S. Zhu, W.M. Yang & Y. Li
Development of a new type of steel structure rack apparatus for 3D geomechanical model
tests and structural integrity assessment
Y. Li, W.S. Zhu, Q.Y. Zhang, H.P. Wang, W.T. Wang & J. Han
DEM simulation of shear bands using a meshfree strain calculation method
Y. Liu, S.C. Wu, F. Li & X.Q. Chai
Deformation prediction research based on improved Saito’s method with Verhulst grey model
Electromagnetic emission characteristics and mechanism of the deformation and fracture of coal
B.S. Nie, X.Q. He, WX. Chen & F.B. Liu
A research about the feasibility of cement grouting to reinforce petty crack rock
W.G. Qiao, Y.Q. Zhang, V.V. Perchine & A.V. Ouglianitsa
