Humans in Outer Space — Interdisciplinary Perspectives

SpringerWienNewYork
Table of contents

Prefaces
Frank De Winne, Milena Zic-Fuchs and Jean-Pierre Swings ............... v

Introduction: from “odysseys” to “perspectives” – towards new interdisciplinary approaches to humans in outer space. Ulrike Landfester, Nina-Louisa Remuss, Kai-Uwe Schrogl and Jean-Claude Worms .................................. xvii

Humans in outer space – interdisciplinary odysseys .................. xviii
Humans in outer space – from odysseys to perspectives ............ xx
Humans in outer space – interdisciplinary perspectives ............ xxii
Humans in outer space – moving beyond ................................. xxiii

CHAPTER 1 Politics and society

1.1 The political context for human space exploration. 
Kai-Uwe Schrogl ................................................. 3

1.1.1 Do humans in outer space solve any problem(s) on Earth? – An unfair, but politically relevant, question ..................... 3
1.1.2 How to justify space activities – and what role do humans in outer space and exploration play? ........................ 4
1.1.3 What is, or could be, specifically European with regard to humans in outer space? .............................................. 6
1.1.4 So what would be the (political) benefits from humans in outer space? .......................................................... 10
1.1.5 Policy lessons for Europe ........................................... 11
1.1.6 Epilogue: and don’t forget, even “serious” philosophers can’t escape the big vision ........................................... 12
1.2 Who will own outer space? Governance over space resources in the age of human space exploration. Kurt Mills

1.2.1 Introduction ................................................. 15
1.2.2 Sovereignty and law in outer space ......................... 15
1.2.3 Space as a commons? .................................... 17
1.2.4 Territorial claims? ...................................... 18
1.2.5 Problematic sovereignty .................................. 19
1.2.6 Changing sovereignty claims ............................. 22
1.2.7 Can sovereignty be exported to space? .................. 23

1.3 Managing space, organising the sublime.
Martin Parker .............................. 28

1.3.1 Beginnings ................................................. 28
1.3.2 Means .................................................... 29
1.3.3 Ends ..................................................... 34

1.4 Astronauts: from envoys of mankind to combatants.
Nina-Louisa Remuss ....................... 39

1.4.1 The setting ................................................ 39
1.4.2 Legal considerations .................................... 40
1.4.3 Astronauts: envoys of mankind or combatants .......... 41
1.4.4 Conclusions and recommendations ..................... 53

1.5 Space inclusiveness and empowerment, or how The Frontier becomes a mirror.
Adrian Belu ................................................. 57

1.5.1 The current values of inclusiveness and empowerment in political and organisational endeavours ............................ 57
1.5.2 The mirror of space: The Common mirror ................ 58
1.5.3 Second payoffs of taking the risk to share exoplanet science ............................. 62
# Table of contents

## 1.6  A school curriculum for the children of space settlers. Alan Britton

- 1.6.1 Introduction ....................................................... 65
- 1.6.2 What is “curriculum”? .............................................. 66
- 1.6.3 Education, curriculum and the future ............................. 67
- 1.6.4 Education and space ............................................... 69
- 1.6.5 A curriculum for the children of space settlers .................... 70
- 1.6.6 The Apollo programme ............................................. 76

## 1.7  Ethics and extraterrestrial life. Charles Cockell

- 1.7.1 Introduction ....................................................... 80
- 1.7.2 The instrumental value of extraterrestrial microscopic organisms ............................................... 81
- 1.7.3 The intrinsic value of extraterrestrial microscopic organisms ....................................................... 82
- 1.7.4 Teloempathy ....................................................... 85
- 1.7.5 Planetary protection ............................................... 88
- 1.7.6 “Originism” ....................................................... 90
- 1.7.7 Highest moral relevance ............................................ 95
- 1.7.8 “Originism” as an obligation to extraterrestrial life ............... 96
- 1.7.9 Conclusion ....................................................... 97

## 1.8  Encounters among the stars – exosociological considerations. Michael T. Schetsche

- 1.8.1 Science rather than fiction .............................................. 102
- 1.8.2 Good reasons for the scientific study of the topic “first contact” ....................................................... 103
- 1.8.3 Cultural consequences of the first contact ....................................................... 104
- 1.8.4 Conclusions ....................................................... 111

## CHAPTER 2  History and religion

### 2.1  Astrocognition: Prolegomena to a future cognitive history of exploration. David Dunér

- 2.1.1 The astrocognitive question .............................................. 117
- 2.1.2 The astrocognitive premise .............................................. 119
2.1.3 Astrocognitive theory ............................................... 121
2.1.4 How can we get empirical data? ............................... 125
2.1.5 Historical questions of astrocognition ...................... 127
2.1.6 The history of exploration ......................................... 128
2.1.7 Astrocognitive hypotheses ......................................... 134
2.1.8 Conclusions .......................................................... 136

2.2 Looking back to Earth. S. J. Gustav Schörghofer ............ 141

2.2.1 The Jesuit church in Vienna ..................................... 141
2.2.2 The “Jesuitenkosmos” – Cosmos of the Jesuits ............. 141
2.2.3 Ignatius of Loyola and his “spiritual exercises” .......... 144

2.3 Alien life: Remarks on the exobiological perspective in recent terrestrial biology. Thomas Brandstetter ...... 146

2.3.1 Aliens in the fossil record ......................................... 147
2.3.2 Looking back, seeing things .................................... 151
2.3.3 Conclusions .......................................................... 153

CHAPTER 3 Culture and psychology

3.1 Laokoon in Outer Space? Towards a transformative hermeneutics of Art. Ulrike Landfester ..................... 159

3.1.1 The space of Art: The Laokoon paradigm .................. 160
3.1.2 Anthropomorphism revisited: The alienness of Art ...... 163
3.1.3 Unearthing Art: The “environment factor” ............... 165
3.1.4 “Theatre level”: Art and space technology ............... 167

3.2 Music and the outer space – the means of universal communication or a form of art? Anna G. Piotrowska ...... 171

3.2.1 Music as an artistic expression in outer space .......... 171
3.2.2 Music as a means of communication in outer space? .... 174
3.2.3 Conclusions .......................................................... 180

CHAPTER 4  Annex

4.1  Useful web-addresses related to human exploration .......................... 241

4.2  The Vienna Vision on Humans in Outer Space .............................. 242

4.3.1  Current programmes ............................................................. 244
4.3.2  Capability for launch to low-Earth orbit and exploration beyond .................. 248
4.3.3  Future destinations for exploration ............................................. 251
4.3.4  Integrated programme options .................................................. 252
4.3.5  Organizational and programmatic issues ........................................ 255
4.3.6  Summary of key findings .......................................................... 256

4.5  Overview of Europe's contribution to the ISS .............................. 282

4.5.1  The European Space Policy on the International Space Station (ISS) and Exploration of the Solar System ........................................ 282
4.5.2  The Green Paper on European Space Policy and “manned space flight” .................. 282
4.5.3  ISS Intergovernmental Agreement ................................................. 283
4.5.4  ISS current configuration ............................................................ 285
4.5.5  ISS and Europe’s major contributions ............................................ 286

4.6  SETI's Declaration of Principles Concerning Activities Following the Detection of Extraterrestrial Intelligence .......................... 291
