Introduction 1
Pilar Guerrero Medina

Part I. Theoretically-oriented approaches to the issue of morphosyntactic alternations

1. Alternations as a heuristic to verb meaning and the semantics of constructions 11
Kristin Davidse

2. The study of alternations in a dialogic Functional Discourse Grammar 38
J. Lachlan Mackenzie

3. Constraints on syntactic alternation: Lexical-constructional subsumption in the Lexical-Constructional Model 62
Francisco J. Ruiz de Mendoza and Ricardo Mairal Usón

4. Alternation and Participant Role: A contribution from a Systemic Functional Grammar 83
Amy C. Neale

Part II. Studies of specific alternations

II.1 Transitivity alternations involving a change in the configuration of semantic roles

5. The causative/inchoative alternation in Functional Discourse Grammar 115
Daniel García Velasco

6. Spontaneous and facilitative events revisited 137
Juana I. Marín-Arrese
The semantics of English middles and pseudo-middles
Casilda García de la Maza

An antipassive interpretation of the English “conative alternation”: Semantic and discourse-pragmatic dimensions
Pilar Guerrero Medina

II.2 Alternations involving a change in the morphosyntactic expression and/or placement of arguments

A frame-semantic approach to syntactic alternations: The case of build verbs
Hans C. Boas

Acquiring particle placement in English: A corpus-based perspective
Stefan Th. Gries

Looks, appearances and judgements: Towards a unified constructionist analysis of predicative complement alternations in English and Spanish
Francisco González-García

Metonymy-motivated morphosyntactic alternations
Antonio Barcelona Sánchez

A Functional Discourse Grammar approach to the Swarm-alternation as a case of conversion
Carmen Portero Muñoz

Morphological relatedness and zero alternation in Old English
Javier Martín Arista
