ADVANCES IN HELLENIC ASTRONOMY DURING THE IYA09: 9th INTERNATIONAL CONFERENCE OF THE HELLENIC ASTRONOMICAL SOCIETY

Proceedings of a conference held at
University of Athens, Athens, Greece
20–24 September 2009

Edited by

Kanaris Tsinganos
University of Athens, Department of Physics, Section of Astrophysics, Astronomy & Mechanics, Panepistimiopolis, Zografos, Greece

Despina Hatzidimitriou
University of Athens, Department of Physics, Section of Astrophysics, Astronomy & Mechanics, Panepistimiopolis, Zografos, Greece

Titos Matsakos
University of Athens, Department of Physics, Section of Astrophysics, Astronomy & Mechanics, Panepistimiopolis, Zografos, Greece
Contents

Preface ................................................................. xii

Participants .......................................................... xvi

Conference Photograph .............................................. xxii

Part I. Sun, Planets, and the Interplanetary Medium

Flux Emergence and Associated Dynamic Events in the Sun ........... 3
V. Archontis

Towards a New Formation Flying Solar Coronagraph .................. 15
P. Lamy et al.

Study of a Solar Active Region Jet .................................. 19
C. Gontikakis, V. Archontis, and K. Tsinganos

Heating Distribution Along Coronal Loops in two Active Regions Using
a Simple Electrodynamic Calculation .................................. 25
C. Gontikakis et al.

Simulating Flaring Events via an Intelligent Cellular Automata Mechanism .... 28
M. Dimitropoulou et al.

Comparative Analysis of Oscillations of a Solar Quiet Region Using
Multi-Wavelength Observations ....................................... 31
I. Kontogiannis et al.

VSAA: A Method for Analysis and Prediction of Quasi-Periodic Phenomena .... 35
S. Tsantilas et al.

Fluctuations of CMEs Characteristics during the Declining Phase of the Last
Solar Cycle ............................................................. 37
M. Gerontidou et al.

CME on CME Interaction on January 17, 2005 ........................ 39
C. Bouratzis et al.

Metric Radio Bursts and Fine Structures Observed on January 20, 2005 .... 41
C. Bouratzis et al.

Estimating Fluxes of SEPs by Unfolding ESA/SREM Data .......... 43
I. Sandberg et al.

Solar Origin of Solar Particle Events Detected by the Standard Radiation
Environment Monitor of ESA ......................................... 47
K. Tziotziou et al.
Contents

Solar Energetic Particle Observations and Propagation in the 3-D Heliosphere in December 2006 .............................................. 51
O. E. Malandraki

CIR-Accelerated Energetic Particles during 2008: Multi-Point Observations by STEREO and ACE .............................................. 53
O. E. Malandraki et al.

Tracing Magnetic Connectivity and Solar Injection by means of Energetic Particles in the Inner Heliosphere ...................................... 55
O. E. Malandraki et al.

Dynamical Complexity in $D_{st}$ Time Series Using Entropy Concepts ................................................................. 57
G. Balasis et al.

Temporal Evolution of Energetic Electron Precipitation as a Promising Tool for Earthquake Prediction Research:
Analysis of IDP / DEMETER Observations ................................................................. 67
G. Anagnostopoulos et al.

Establishing and Using the Real-Time Neutron Monitor Database (NMDB) ............................................................... 75
H. Mavromichalaki et al.

Anomalous Forbush Effects Associated both with Remote Western and Eastern Sources .............................................................. 81
A. Papaioannou et al.

Mapping of the Cosmic Ray Events Related to the Solar Activity for the Period 2003-2005 .............................................. 83
A. Papaioannou et al.

Space Weathering on Near-Earth Objects ................................................................. 85
C. Plainaki et al.

Analysis of Geomagnetic Disturbances and Cosmic Ray Intensity Variations in Relation to Medical Data from Rome .............................................. 88
E. Giannaropoulou et al.

Jupiter's Hot Spots: Assessment of the Retrieval Capabilities of Future IR Spectro-Imagers ......................................................... 90
D. Grassi et al.

Identification of Nonlinear Space Weather Models of the Van Allen Radiation Belts Using Volterra Networks .............................................. 92
M. Taylor et al.

Towards a Unified Source-Propagation Model of Cosmic Rays ................................................................. 98
M. Taylor and M. Molla

SWAP: An EUV Imager for Solar Monitoring on Board of the PROBA2 Micro-Satellite ......................................................... 104
A. C. Katsiyannis et al.

Mathematical Formula for the Finding of Relative Distances of Orbits of Planets and Satellites,
Generalization of the Law of Titius-Bode ................................................................. 108
P. Karagkiozidis
Part II. Our Galaxy: Stars, Exoplanets and the Interstellar Medium

The Physical Properties of Neutron Stars ............................. 113
  J. Triimper

The 3D Structure of the Pulsar Magnetosphere .......................... 128
  I. Contopoulos and C. Kalapotharakos

Pulsed Thermal Emission from the Accreting Pulsar
  *XMMU J054134.7−682550* .................................................. 138
  A. Manousakis, R. Walter, and M. Audar

Velocity Asymmetries in the Bipolar Flows of YSO Jets .................. 143
  T. Matsakos et al.

The Molecular and Atomic Components of the HH211-mm Outflow Observed
  with Spitzer ................................................................. 149
  O. Dionatos

On the Generation of Entropy in Jet-Launching Disks ........................ 155
  P. Tzeferacos et al.

The Formation of Low-Mass Stars and Brown Dwarfs ........................ 159
  D. Stamatellos and A. Whitworth

A Multi-Wavelength Study of the W3 Giant Molecular Cloud .................. 165
  D. Polychroni, T. J. T. Moore, and J. Allsopp

Suzaku Analysis of Galactic Supernova Remnants G27.4+0.0 and G12.0-0.1 .... 171
  A. Sezer et al.

New Candidate Supernova Remnants in Sagittarius ............................ 177
  J. Alikakos et al.

XMM-Newton Analysis of SNR G156.2+5.7 .................................... 179
  M. Hudaverdi et al.

Statistical Analysis of PNe in the Galactic Bulge Region ..................... 183
  S. Akras and P. Boumis

Long Trails of Optical Emission behind PNe and LBVs .......................... 185
  P. Boumis and J. Meaburn

A New Approach of the GR Model ............................................ 187
  A. Antoniou et al.

Transient High Frequency Optical Oscillations of the Red Dwarf AD Leonis .... 189
  M. E. Contadakis, S. J. Avgoloupis, and J. H. Seiradakis

Inverse Semi-Detached Binaries: A New Type of Binary Systems? ............... 192
  S. Tsantilas and H. Rovithis-Livaniou

Light Curve Analysis of the ES Uma Binary ................................ 198
  S. Kleidis, S. Tsantilas, and H. Rovithis-Livaniou

GSC 2805-0766: a New Binary in the Andromeda Constellation ................. 201
  S. Kleidis et al.

The Contact System V566 Ophiuchi Revisited ................................ 204
  A. Liakos, S. Varrias, and P. Niarchos
Contents

Preliminary Results for the Triple System AV CMi .......................... 208
A. Liakos and P. Niarchos

Photometric Monitoring of GSC 2696-2622 Variability ....................... 212
N. Nanouris and E. Antonopoulou

Monitoring of the Cataclysmic Variable TW Tri ............................. 216
C. Papadimitriou, O. Giannakis, and V. Kolokotronis

ThReT: A New Survey for Extrasolar Planetary Transits at Mt. Holomon, Greece 218
J. Antoniadis et al.

Part III. Extragalactic Astrophysics and Cosmology

New X–ray and Optical SNRs in Six Nearby Galaxies ....................... 223
I. Leonidaki, A. Zezas, and P. Boumis

Small Magellanic Cloud: Star-Formation History and
X-Ray Binary Populations .................................................. 230
V. Antoniou et al.

The SMC RR-Lyrae Variables and their Metal Abundances .................. 233
E. Kapakos et al.

Density Profiles of Star Clusters in the Magellanic Clouds ................ 236
G. Nikolov et al.

Star Complexes and Stellar Populations in NGC 6822 ...................... 240
A. Karampelas et al.

Dwarf Spheroidals in the M81 Galaxy Group ................................ 242
S. Lianou, E. Grebel, and A. Koch

Modeling the Distribution of Various Objects in the Magellanic Clouds for Gaia 244
M. Belcheva et al.

Typical Galaxy Synthetic Spectra for Gaia at High and Low Resolution 249
E. Livanou et al.

Towards an Optimized Library of Synthetic Galaxy Spectra
for the Gaia Mission ......................................................... 252
A. Karampelas et al.

Unresolved Galaxy Classifier for ESA's Gaia Mission ..................... 256
I. Bellas-Velidis et al.

Modeling the Bar Component in Dusty Spiral Galaxies ..................... 261
S. Akras et al.

Molecular Gas Properties in Luminous Infrared Galaxies: Stepping up the CO
J-Ladder Towards the Star Forming Phase ................................ 266
E. M. Xilouris et al.

Star Formation in Galaxies from Molecular Cloud to kpc Scales ............. 268
K. Tassis

The Lockman Hole Multi-Wavelength Survey ................................ 271
M. Rovilos et al.
