

DIPMETER AND BOREHOLE IMAGE LOG TECHNOLOGY

AAPG Memoir 92

Edited by M. Pöppelreiter, C. García-Carballido,
and M. Kraaijveld

TABLE OF CONTENTS

Foreword	iii
About the Editors	iv
Acknowledgments	vi
Chapter 1	1
Borehole Image Log Technology: Application Across the Exploration and Production Life Cycle <i>M. Pöppelreiter, C. García-Carballido, and M. Kraaijeveld</i>	
Chapter 2	15
Borehole Image Tool Design, Value of Information, and Tool Selection <i>J. O. Lagraba P., S. M. Hansen, M. Spalburg, and M. Helmy</i>	
Chapter 3	39
Data Management and Quality Control of Dipmeter and Borehole Image Log Data <i>C. García-Carballido, J. Boon, and N. Tso</i>	
Chapter 4	51
Making Interpretable Images from Image Logs <i>B. Hansen and J. Buczak</i>	
Chapter 5	67
Applications of Dipmeter and Borehole Image Data in Static Models <i>M. Pöppelreiter, R. A. Crookbain, A. K. Sapru, and M. J. F. Lawrence</i>	
Chapter 6	81
Geomechanical Wellbore Imaging: Key to Managing the Asset Life Cycle <i>C. Barton and D. Moos</i>	
Chapter 7	113
Reduction of Gross Rock Volume Uncertainty in a Salt Flank Structure Using Dipmeter and Image Log Data <i>C. García-Carballido, A. Styles, and M. Pöppelreiter</i>	
Chapter 8	129
Applications of Oil-base Mud Earth Imager for a High-temperature and High-pressure Exploration Well <i>R. Maddock and R. Ravnas</i>	
Chapter 9	145
The Application of Borehole Image Logs to Fluvial Facies Interpretation <i>M. E. Donselaar and J. M. Schmidt</i>	
Chapter 10	167
Calibrating Borehole Image and Dipmeter Logs with Outcrops and Behind-outcrop Cores: Case Studies and Applications to Deep-water Deposits <i>R. M. Slatt and R. J. Davis</i>	

Chapter 11	195
Turbidite Channel Architecture: Recognizing and Quantifying the Distribution of Channel-base Drapes Using Core and Dipmeter Data	
<i>M. Barton, C. O'Byrne, C. Pirmez, B. Prather, F. van der Vlugt, F. O. Alpak, and Z. Sylvester</i>	
Chapter 12	211
A 3-D Fracture Model of the Kuyumba Oil Field (Eastern Siberia) Reflecting the Clay and Bed Thickness-related Fracture-density Variations of its Dolomite Reservoir	
<i>L. Mattioni, A. Chauveau, O. Fonta, V. Ryabchenko, E. Sokolov, R. Mukhametzyanov, S. Shlionkin, V. Zereninov, and I. Bobb</i>	
Chapter 13	229
High-resolution Electrical Borehole Images While Drilling	
<i>J. Lofts and S. Morris</i>	
Chapter 14	253
Borehole Image Three-dimensional Visualization and Interpretation in SVS Fracture Solutions	
<i>P. Richard and L. de Pieri</i>	
Chapter 15	259
Stress, Fracture, and Fluid-flow Analysis Using Acoustic and Electrical Image Logs in Hot Fractured Granites of the Coso Geothermal Field, California, U.S.A.	
<i>N. C. Davatzes and S. H. Hickman</i>	
Chapter 16	295
Application of a Modern Electrical Borehole Imager and a New Image Interpretation Technique to Evaluate the Porosity and Permeability in Carbonate Reservoirs: A Case History from the Permian Basin, United States	
<i>V. D. Chitale, C. Johnson, D. Entzminger, and L. Canter</i>	
Chapter 17	309
Porosity Partitioning and Permeability Quantification in Vuggy Carbonates, Permian Basin, West Texas, U.S.A.	
<i>C. Xu</i>	
Chapter 18	321
Borehole Image and Production Logging Drives Well Interventions in Horizontal Gas-oil Gravity Drainage Wells in a Giant Middle Eastern Carbonate Field	
<i>E. Follows, A. Beck, A. Farmer, S. Al Salmi, G. de Bruijn, L. de Pieri, and R. Welling</i>	
Chapter 19	343
Interpretation and Application of Borehole Image Logs in a New Generation of Reservoir Models for a Cluster of Fields in Southern Oman	
<i>A. Samantray, M. Kraaijeveld, W. Bulushi, and L. Spring</i>
