<b>CD-ROM Contents .....</b>	vii
<b>Dedication .....</b>	ix
<b>Preface .....</b>	xi
W. Brent Garry and Jacob E. Bleacher	
<b>Part I. Mission Training</b>	
1. <i>Motives, methods, and essential preparation for planetary field geology on the Moon and Mars</i> .....	1
H.H. Schmitt, A.W. Snock, M.A. Helper, J.M. Hurtado, K.V. Hodges, and J.W. Rice, Jr.	
2. <i>A new paradigm for advanced planetary field geology developed through analog experiments on Earth</i> .....	17
K.V. Hodges and H.H. Schmitt	
3. <i>Geologic field training of the Apollo astronauts and implications for future manned exploration</i> .....	33
G.E. Lofgren, F. Horz, and D. Eppler	
4. <i>Training Apollo astronauts in lunar orbital observations and photography</i> .....	49
F. El-Baz	
5. <i>Training astronauts to observe Earth from the space shuttle and International Space Station</i> ..	67
C.A. Evans, M.J. Wilkinson, W.L. Stefanov, and K. Willis	
6. <i>Analysis of Antarctic logistics and operations data: Results from the Antarctic Search for Meteorites (ANSMET), austral summer season, 2002–2003, with implications for planetary surface operations</i> .....	75
D.B. Eppler	
7. <i>A historical overview of the Pavilion Lake Research Project—Analog science and exploration in an underwater environment</i> .....	85
D.S.S. Lim, A.L. Brady, and PLRP Team (A.F. Abercromby, D.T. Andersen, M. Andersen, R.R. Arnold, J.S. Bird, H.R. Bohm, L. Booth, S.L. Cady, Z. Cardman, A.M. Chan, O. Chan, C. Chénard, B.R. Cowie, A. Davila, M.C. Deans, W. Dearing, M. Delaney, M. Downs, T. Fong, A. Forrest, M.L. Gernhardt, J.R. Gutsche, C. Hadfield, A. Hamilton, J. Hansen, I. Hawes, J. Heaton, Y. Imam, B.L. Laval, D. Lees, L. Leoni, C. Looper, S. Love, M.M. Marinova, D. McCombs, C.P. McKay, B. Mireau, G. Mullins, S.H. Nebel, P. Nuytten, R. Pendery, W. Pike, S.B. Pointing, J. Pollack, N. Raineault, M. Reay, D. Reid, T. Sallstedt, D. Schulze-Makuch, M. Seibert, R. Shepard, G.F. Slater, J. Stonehouse, D.Y. Sumner, C.A. Suttle, A. Trembanis, C. Turse, M. Wilhelm, N. Wilkinson, D. Williams, D.M. Winget, and C. Winter)	

<b>8. Robotic recon for human exploration: Method, assessment, and lessons learned . . . . .</b>	117
M.G. Bualat, A. Abercromby, M. Allan, X. Bouyssounouse, M.C. Deans, T. Fong, L. Flückiger, K.V. Hodges, J. Hurtado, Jr., L. Keely, L. Kobayashi, R. Landis, P.C. Lee, S.Y. Lee, D. Lees, E. Pacis, E. Park, L. Pedersen, D. Schreckenghost, T. Smith, V. To, and H. Utz	
<b>9. Habitat dust contamination at a Mars analog . . . . .</b>	137
B.J. Bos, D.J. Scott, and S.M. Metzger	
<b>10. The NASA Spaceward Bound field training curriculum . . . . .</b>	157
J. Rask, J. Heldmann, H. Smith, M. Battler, and C. McKay	
<b>Part II. Geologic Analogs</b>	
<b>11. Terrestrial gullies and debris-flow tracks on Svalbard as planetary analogs for Mars . . . . .</b>	165
D. Reiss, E. Hauber, H. Hiesinger, R. Jaumann, F. Trauthan, F. Preusker, M. Zanetti, M. Ulrich, A. Johnsson, L. Johansson, M. Olvmo, E. Carlsson, H.A.B. Johansson, and S. McDaniel	
<b>12. Periglacial landscapes on Svalbard: Terrestrial analogs for cold-climate landforms on Mars . . . . .</b>	177
E. Hauber, D. Reiss, M. Ulrich, F. Preusker, F. Trauthan, M. Zanetti, H. Hiesinger, R. Jaumann, L. Johansson, A. Johnsson, M. Olvmo, E. Carlsson, H.A.B. Johansson, and S. McDaniel	
<b>13. The Tuktoyaktuk Coastlands of northern Canada: A possible “wet” periglacial analog of Utopia Planitia, Mars . . . . .</b>	203
R.J. Soare, A. Séjourné, G. Pearce, F. Costard, and G.R. Osinski	
<b>14. The Todilto Formation as an analog of short-lived Martian flood evaporites . . . . .</b>	219
D. Vaniman, S. Chipera, K. Brownholland, and D. Bish	
<b>15. Travertine and tufa from Dalhousie Springs (Australia)—Implications for recognizing Martian springs . . . . .</b>	231
J.D.A. Clarke and M.C. Bourke	
<b>16. Comparative geological studies of volcanic terrain on Mars: Examples from the Isachsen Formation, Axel Heiberg Island, Canadian High Arctic . . . . .</b>	249
M.-C. Williamson, H.R. Smyth, R.C. Peterson, and D. Lavoie	
<b>17. Theo’s Flow, Ontario, Canada: A terrestrial analog for the Martian nakhlite meteorites . . . . .</b>	263
R.C.F. Lentz, T.J. McCoy, L.E. Collins, C.M. Corrigan, G.K. Benedix, G.J. Taylor, and R.P. Harvey	
<b>18. Cerro Negro volcano, Nicaragua: An assessment of geological and potential biological systems on early Mars . . . . .</b>	279
B.M. Hynek, T.M. McCollom, and K.L. Rogers	
<b>19. The marine-target Wetumpka impact structure examined in the field and by shallow core-hole drilling . . . . .</b>	287
D.T. King Jr. and J. Ormö	
<b>20. A Mars-oriented image database of hand lens-scale features and textures: The 1996 Skeiðarársandur jökulhlaup example . . . . .</b>	301
R.A. Yingst, M.E. Schmidt, R.C.F. Lentz, J.L. Janzen, and K.R. Kuhlman	

<b>21. An inventory of potentially habitable environments on Mars: Geological and biological perspectives</b> . . . . .	317
J.M. Dohm, H. Miyamoto, G.G. Ōri, A.G. Fairén, A.F. Davila, G. Komatsu, W.C. Mahaney, J.-P. Williams, S.B. Joye, G. Di Achille, D.Z. Oehler, G.A. Marzo, D. Schulze-Makuch, V. Acocella, M. Glamoclija, M. Pondrelli, P. Boston, K.M. Hart, R.C. Anderson, V.R. Baker, W. Fink, B.P. Kelleher, R. Furfaro, C. Gross, T.M. Hare, A.R. Frazer, F. Ip, C.C.R. Allen, K.J. Kim, S. Maruyama, P.C. McGuire, D. Netoff, J. Parnell, L. Wendt, S.J. Wheelock, A. Steele, R.G.V. Hancock, R.A. Havics, P. Costa, and D. Krinsley	
<b>22. Utah's geologic and geomorphic analogs to Mars—An overview for planetary exploration</b> . . . . .	349
M.A. Chan, K. Nicoll, J. Ormö, C. Okubo, and G. Komatsu	
<b>Part III. Field Guides</b>	
<b>23. The “Holey Tour” planetary geology field trip, Arizona</b> . . . . .	377
R. Greeley	
<b>24. Warford Ranch volcano, Arizona, field exercise</b> . . . . .	393
R. Greeley and S. Cave	
<b>25. NASA volcanology field workshops on Hawai‘i: Part 1. Description and history</b> . . . . .	401
S.K. Rowland, P.J. Mouginitis-Mark, and S.A. Fagents	
<b>26. NASA volcanology field workshops on Hawai‘i: Part 2. Understanding lava flow morphology and flow field emplacement</b> . . . . .	435
P.J. Mouginitis-Mark, S.A. Fagents, and S.K. Rowland	
<b>27. Field exercises in the Pinacate volcanic field, Mexico: An analog for planetary volcanism</b> . . . . .	449
D.A. Williams, S.A. Fagents, R. Greeley, and J.F. McHone	
<b>28. Terrestrial analogs in the Mojave Desert of the southwestern United States for volcanic, sedimentary, and tectonic processes on other planets</b> . . . . .	465
N.P. Lang, C.M. Fedo, and S.C. Whisner	
<b>29. Field guide to exhumed paleochannels near Green River, Utah: Terrestrial analogs for sinuous ridges on Mars</b> . . . . .	483
R.M.E. Williams, R.P. Irwin III, J.R. Zimbelman, T.C. Chidsey Jr., and D.E. Eby	
<b>Part IV. Lunar Mission Scenarios</b>	
<b>30. Human exploration of the Gruithuisen Domes</b> . . . . .	507
S.E. Braden and M.S. Robinson	
<b>31. Plan for a human expedition to Marius Hills and its implications for viable surface exploration architecture</b> . . . . .	519
P.E. Clark, J. Bleacher, N. Petro, and S. Mest	
<b>32. A sortie mission to Schrödinger Basin as reconnaissance for future exploration</b> . . . . .	533
M.K. Bunte, S. Porter, and M.S. Robinson	
<b>33. Advanced regional-scale scenarios for lunar surface exploration</b> . . . . .	547
P.E. Clark, S. Mest, J. Bleacher, and N. Petro
