Contents

Preface	1
Introduction	3
1 From a Gap in the Literature to the Systematic Political behavior of the Argentinean Central Bank: The Literature on the Actors	9
1.1 The Literature's First Argument: Central Bank Independence and the Government as Ruler	13
1.2 The Literature's Second Argument: Argentinean Confessions and the Narrative of the Protagonists	18
1.3 The Literature's Third Argument: Strategic Behavior	22
2 Evaluation of the Literature's Relevance	25
2.1 Closing the Gap in Strategic Political Behavior	27
3 The Puzzle of Delegating Monetary Policy	31
3.1 The Main Argument: From Systematic Supporting to Defeating .	32
3.2 The Plausibility of the Argument	35
3.3 Assumptions of the Argumentation	40
3.3.1 Assumptions about the Theoretical Model	40
3.3.2 Assumptions about the Research Object	42
3.3.3 Methodological Assumptions	43
3.4 Justification of the main causal argument	45
4 Signaling Games and the "Inter-temporal Conflict of Interest"	49
4.1 Establishing the Model	49
4.2 Analysis of the Equilibria	59
5 The Spatial Model of the "Inter-temporal Conflict of Interest"	63

6	From signaling games to testable hypotheses	69
7	Closing the gap in the theory	77
8	Testing the Causal Arguments	81
9	Justification of the Case Selection	85
9.1	Relevance of the Argentinean Central Bank	85
9.2	Selection of the Legal Framework	86
9.3	Justification of the Time Period Researched	87
10	Justifying the Choice of Variables	89
10.1	Dependent Variables	89
10.2	Argumentation and Independent Variables	90
10.3	Ageing Process and the Interactions between the Political and Bureaucratic Role	93
11	Justification of the Variables' Operationalization; Decisions and Form of the Data Source	95
11.1	Nomination and Dismissal	99
12	Recollecting Data	101
12.1	The Transparency of the Circular System	103
12.2	Construction of the Databases	103
12.3	Advantages and Disadvantages	107
13	First Look at the Data - Descriptive Statistics	109
13.1	The Composition of the Dependent Variable	109
13.2	The Composition of the Independent Variables	110
13.2.1	Variables Related to the Main Argument	110
13.2.2	Variables Related to the Control Argument	114
13.2.3	First Look at Ageing and Interaction Variables	117
14	Justification of the Quantitative Method	119
14.1	Various Methodological Approaches	120
14.2	The Meta-theory of Actor Centered Institutionalism	126
14.3	Other Ruling Groups	129
15	Choice of Method and the Spirits of Biometrical Statistics	131
15.1	On Event History Analysis and Causality	131

16 Presentation of the Results	135
16.1 Modeling the Empirical Framework	136
16.2 Defeating Based on Presidential Periods	140
16.3 Defeating Based on Ministerial Periods	142
16.4 Main Argument: Systematic Supporting and Defeating	143
16.5 Control Argument	147
16.6 Ageing	150
16.7 The Interaction Variables	153
16.8 Test of Proportionality	156
17 Faire Evaluation of the Results' Quality	159
17.1 The Robustness of the Main Argument and the Consistence of the Control Argument	159
17.2 The Ageing and the Linear Influence of Time and Interaction Effects	161
17.3 The Effect of the Veto Players' Model	162
17.4 Categorical Variables and Modeling Situations	162
17.5 A model of Veto Players	162
18 Association of the Results and Theory	165
18.1 Central Bank Independence and Political Role with Sincere Cen- tral Bank	165
18.2 Critical Literature	167
18.3 Argentinean Confessions	168
18.4 Systematic Behavior's Literature	170
18.5 Recommendation of New Research	171
19 Conclusions	175
Appendix I	189
