Contents

List of contributors xiv

1. Introduction: why a new methods book on primate ecology and conservation? 1
   Eleanor J. Sterling, Nora Bynum, and Mary E. Blair
   1.1 Organization of the book 2
   1.2 Getting started: key points of advice for planning a research project 4
   1.3 Primate ecology and conservation in a changing world 8

2. Primate census and survey techniques 10
   Andrew J. Plumptre, Eleanor J. Sterling, and Stephen T. Buckland
   2.1 Introduction 10
   2.2 History of primate surveying 11
   2.3 Total count methods 12
   2.4 Genetic methods of surveying 13
   2.5 Line transect methods 13
   2.6 Using group calls to survey primates 18
   2.7 Measurements of relative abundance and occupancy 20
   2.8 Nocturnal primates 21
   2.9 Tools that can help with primate surveys 23
   2.10 Monitoring primates for conservation 24
   2.11 Conclusion 25

3. Darting, anesthesia, and handling 27
   Kenneth E. Glander
   3.1 Introduction—the role of capture in primate field studies 27
   3.2 Permits, licenses, and approvals 29
   3.3 Public relations 30
   3.4 Trapping vs. darting 30
   3.5 Darting methods and equipment 31
   3.6 Drug type and dose 34
   3.7 Safety considerations while handling a captured animal 36
   3.8 Recovery 37
x | Contents

3.9 Release 38
3.10 Safety concerns for researchers 38
3.11 Accountability 39
3.12 Conclusion 39

4. Health assessment and epidemiology 40
Michael P. Muehlenbein and Cari M. Lewis
4.1 Introduction 40
4.2 Primate zoonoses and anthropozoonoses 40
4.3 Methods for collection and analyses 42
4.4 Some modest advice 50
4.5 Going beyond basic health monitoring 54

5. Behavior within groups 58
Beth A. Kaplin and Apollinaire William
5.1 Introduction 58
5.2 What is a primate group? 59
5.3 The habituation process 61
5.4 Techniques and approaches in sampling behavior within primate groups 63
5.5 What kinds of questions are asked about behavior within groups? 66
5.6 Geographic Information Systems (GIS) and within-group behavior 72
5.7 Social network theory and network analysis 74
5.8 Conclusion 77

6. Habitat assessment and species niche modeling 79
E. Johanna Rode, Carrie J. Stengel, and K. Anne-Isola Nekaris
6.1 Introduction 79
6.2 Habitat assessment 79
6.3 Species niche modeling 93
6.4 Concluding remarks 101

7. Characterization of primate environments through assessment of plant phenology 103
Andrew J. Marshall and Serge Wich
7.1 Introduction 103
7.2 Field methods 104
7.3 Data considerations 122
7.4 Conclusion 125
# Methods in Ethnoprimateology: Exploring the Human-Non-Human Primate Interface

Erin P. Riley and Amanda L. Ellwanger

<table>

12. Physiology and energetics
   Jutta Schmid
   12.1 Introduction 213
   12.2 Methods of measuring energy expenditure 214
   12.3 Measuring body temperature 220
   12.4 Ethical implications and legal aspects 223

13. Primate behavioral endocrinology
   Nga Nguyen
   13.1 Major historical and theoretical developments in wild primate behavioral endocrinology 224
   13.2 Applications of non-invasive techniques for monitoring hormones in wild primates 228
   13.3 Methodological considerations for field primate behavioral endocrinology 233
   13.4 Future directions in the behavioral endocrinology of wild primates 237

14. Population genetics, molecular phylogenetics, and phylogeography
   Mary E. Blair and Alba L. Morales-Jimenez
   14.1 Introduction 238
   14.2 Obtaining samples for genetic analysis 239
   14.3 In the laboratory 240
   14.4 Data analysis at the species-level 246
   14.5 Data analysis at the population-level 248
   14.6 Other research questions 256

15. Demography, life histories, and population dynamics
   Olga L. Montenegro
   15.1 Introduction 257
   15.2 Determination of demographic parameters 257
   15.3 Life history characteristics 265
   15.4 Population dynamics 267
   15.5 Modeling extinction risk 275
   15.6 Conclusion 277
16. Determining conservation status and contributing to in situ conservation action
Mary E. Blair, Nora Bynum, and Eleanor J. Sterling

16.1 Introduction
16.2 Overview of national and global conventions and lists that include primates
16.3 Determining conservation status
16.4 Conservation action
16.5 Conclusion

17. Captive breeding and ex situ conservation
Dean Gibson and Colleen McCann

17.1 Introduction
17.2 Primate population data sets and sustainability
17.3 Recreation, education, and conservation
17.4 Research
17.5 Re-introduction
17.6 Case studies
17.7 Conclusion

18. Primates in trade
Joshua M. S. Linder, Sarah C. Sawyer, and Justin S. Brashares

18.1 Introduction
18.2 Hunter and household surveys
18.3 Market surveys
18.4 Conclusion

19. Conclusion: the future of studying primates in a changing world
Eleanor J. Sterling, Nora Bynum, and Mary E. Blair
