# Contents

Preface ix

## Part 1 Pitch-Class Sets and Relations

1.0 Pitch combinations 1
1.1 Pitch-Class sets 1
1.2 Normal order; the prime forms 3
1.3 Transpositionally equivalent pc sets 5
1.4 Inversionally equivalent pc sets 7
1.5 The list of prime forms; set names 11
1.6 Intervals of a pc set; the interval vector 13
1.7 Some properties of interval vectors 16
1.8 Cardinal number and interval content 19
1.9 Non-equivalent pc sets with identical vectors 21
1.10 The subsets of a pc set 24
1.11 Invariant subsets under transposition 29
1.12 Invariant subsets under inversion 38
1.13 Similarity relations 46
1.14 Order relations 60
1.15 The complement of a pc set 73
1.16 Segmentation 83

## Part 2 Pitch-Class Set Complexes

2.0 Introduction 93
2.1 The set complex K 93
2.2 The subcomplex Kh 96
2.3 Set-Complex sizes 101
2.4 The closure property 101
2.5 Invariance within the set complex 104
2.6 Similarity relations within the set complex 108
2.7 Set-Complex structures of small scale 113
2.8 Set-Complex structures of larger scale 124

## Appendix 1 Prime Forms and Vectors of Pitch-Class Sets 179

## Appendix 2 Similarity Relations 182

## Appendix 3 The Subcomplexes Kh 200

## Glossary of Technical Terms 209

## References 213

## Index 1 Musical Examples 215

## Index 2 Pc Sets in Musical Examples 216

## Index 3 General Index 223
