<b>Block 1</b>	<b>1</b>
1. S. S. Stevens On the theory of scales of measurement . . . . .	3
2. Bela O. Baker, Curtis D. Hardyck, and Lewis F. Petrinovich Weak measurements vs. strong statistics: an empirical critique of S. S. Stevens' proscriptions on statistics . . . . .	11
3. Frederick M. Lord On the statistical treatment of football numbers . . . . .	30
4. C. J. Burke Additive scales and statistics . . . . .	34
5. C. Alan Boneau A note on measurement scales and statistical tests . . . . .	39
6. S. S. Stevens Measurement, statistics, and the schemapiric view. . . . .	43
<b>Block 2</b>	<b>64</b>
7. Student The probable error of a mean . . . . .	66

8.	Joseph Sandler	
	A test of the significance of the difference between the means of correlated measures based on a simplification of student's $t$	100
9.	Richard P. Runyon	
	Note on use of the $A$ statistic as a substitute for $t$ in the one-sample case	104
10.	Norman H. Anderson	
	On teaching $F$ instead of $t$	106
11.	Jacob Cohen	
	The statistical power of abnormal-social psychological research: a review	111
12.	Helen M. Walker	
	Degrees of freedom	130
	<b>Block 3</b>	<b>147</b>
13.	Lincoln E. Moses	
	Non-parametric statistics for psychological research	149

14.	C. Alan Boneau A comparison of the power of the <i>U</i> and <i>t</i> tests . . . . .	172
15.	Jean L. Bresnahan and Martin M. Shapiro A general equation and technique for the exact partitioning of chi-square contingency tables . . . . .	191
16.	Quinn McNemar Note on the sampling error of the difference between correlated proportions or percentages . . . . .	210
17.	Allen L. Edwards Note on the “correction for continuity” in testing the significance of the difference between correlated proportions . . . . .	215
18.	John Gaito Non-parametric methods in psychological research . . . . .	218
19.	C. Alan Boneau The effects of violations of assumptions underlying the <i>t</i> test . . . . .	231
