CONTENTS

CHAPTER 1  NUMBERS AND STATISTICS  1
  1.1 Descriptive and inferential statistics  2
  1.2 Notation and the summation operator  3

CHAPTER 2  DESCRIPTIVE STATISTICS  11
  2.1 Tables and graphs  11
  2.2 Summary measures  22
  2.3 Coding of data  37
  2.4 Summary  40

CHAPTER 3  RANDOM VARIABLES  42
  3.1 Random variables and their ranges  44
  3.2 Discrete random variables and probability measures  48
  3.3 Continuous random variables and probability measures  57
  3.4 Summary  66

CHAPTER 4  EXPECTED VALUES  70
  4.1 Measures of location  70
  4.2 Measures of variability  80
  4.3 Summary measures and continuous random variables  86
  4.4 Summary  96

CHAPTER 5  SOME SPECIAL PROBABILITY MEASURES  99
  5.1 The binomial probability measure  99
  5.2 The normal probability measure  111
  5.3 The Poisson probability measure  123
  5.4 Summary  129
### CHAPTER 6  POPULATION AND SAMPLES  133

6.1 Populations and distributions  133
6.2 Samples  139
6.3 Sums of random variables  147
6.4 The central limit theorem; approximations  155
6.5 Summary  168

### CHAPTER 7  STATISTICAL INFERENCE: ESTIMATION  171

7.1 Point estimates  173
  7.1.1 Parameter estimates  174
  7.1.2 Properties of point estimators  176
7.2 Interval estimates  185
  7.2.1 Confidence intervals for $\mu$ and $\sigma$ in the normal distribution  186
  7.2.2 Confidence intervals for means of other populations  193
  7.2.3 Confidence intervals for proportions  194
  7.2.4 Confidence interval for $\lambda$, the Poisson rate parameter  196
  7.2.5 One-sided confidence intervals  197
  7.2.6 Sample sizes  199
7.3 Summary  207

### CHAPTER 8  STATISTICAL INFERENCES: TESTS OF HYPOTHESES  210

8.1 Tests and errors  211
8.2 Some standard tests  220
  8.2.1 Tests about means  220
  8.2.2 Tests about variances  229
  8.2.3 Tests about proportions  230
8.3 Some $\chi^2$ tests  237
  8.3.1 Goodness of fit tests  237
  8.3.2 Contingency tables  243
8.4 Summary  253
CHAPTER 9 COMPARATIVE EXPERIMENTS 256
9.1 Estimation 257
9.2 Tests of hypotheses 266
9.3 The one-way analysis of variance 273
9.4 Summary 285

CHAPTER 10 LEAST SQUARES AND REGRESSION 288
10.1 Least squares estimation 289
10.2 Confidence intervals and tests of hypotheses 301
10.3 Correlation techniques 307
10.4 Summary 315

CHAPTER 11 SOME NONPARAMETRIC PROCEDURES 319
11.1 Estimation of percentiles 320
11.2 Some nonparametric tests 324
11.2.1 Sign test 324
11.2.2 Population percentile test 325
11.2.3 Wilcoxon-Mann-Whitney test 326
11.2.4 Test for randomness 328
11.3 Summary 331

APPENDIX 334
Table A.1 Binomial Probability Measure 385
Table A.2 Standard Normal Probability Measure 391
Table A.3 Poisson Probability Measure 392
Table A.4 Student’s t-Distribution 394
Table A.5 $\chi^2$ Distribution 395
Table A.6 $F$ Distribution 396
