

CONTENTS

Foreword	5
M. ARATÓ, A. BENCZÚR, A. KRÁMLI, On the solution of optimal performance of page storage hierarchies with an independent reference string	9
J. K. BAKSALARY and R. KALA, A note on Ahlers and Lewis' representation of the best linear unbiased estimator in the general Gauss–Markoff model	17
R. BARTOSZYŃSKI and Z. GOVINDARAJULU, A note on the secretary problem	23
R. BARTOSZYŃSKI and E. PLESZCZYŃSKA, Reducibility of statistical structures and decision problems	29
B. BEDNAREK-KOZEK and A. KOZEK, Stability, sensitivity and sensitivity of characterizations	39
H. BERGSTRÖM, On weak convergence of sequences of measures	65
L. BONEVA, Seriation with applications in philology	73
L. C. A. CORSTEN, Use of matrix approximation in statistics	83
N. N. ČENCOV, On basic concepts of mathematical statistics	85
H. DRYGAS, Hsu's theorem in variance component models	95
V. DUPAČ, On the dynamic stochastic approximation (Abstract)	109
A. ENGELBERT and H. J. ENGELBERT, On a generalization of a theorem of W. Sudderth and some applications	111
H. J. ENGELBERT and A. N. SHIRYAEV, On absolute continuity and singularity of probability measures	121
H. J. GIRLICH, On Markovian decision processes with unbounded rewards	133
B. GYIRES, Weak convergence of linear rank statistics	141
H. HECKENDORFF, Sequential statistical structures	151
S. HOLM, On multiple test procedures	159
J. JUREČKOVÁ, Robust estimation in a linear regression model	169
A. KŁOPOTOWSKI, A remark on the conditioning in limit theorems for dependent random vectors in \mathbb{R}^d	175
E. KHMALADZE and E. PARSADANISHVILI, Rank tests for the hypotheses concerning unidentifiable objects	179
J. KORONACKI, A note on confidence intervals for the Kiefer–Wolfowitz problem	183
T. KOWALCZYK, A. MATUSZEWSKI, A. NALBACH-LENIEWSKA, E. PLESZCZYŃSKA, On concepts and measures of bivariate stochastic dependence	189
K. KRICKEBERG, Statistical problems on point processes	197
T. LEDWINA, On the admissibility of tests for discrete exponential families	225
J. C. LEE and P. R. KRISHNAIAH, On the asymptotic distributions of certain functions of eigenvalues of correlation matrices	229
E. LYTTKENS, The conditional distribution of random errors for given observed values with application to factor analysis	239
A. A. NOVIKOV, Recursive interpolation of partially observable random fields	245

R. PINCUS, Monotonicity properties of statistical procedures for an increasing number of observations or a decreasing number of parameters, especially Anova procedures . . .	249
E. PLATEN, About secretary problems	257
M. L. PURI and N. S. RAJARAM, Asymptotic normality and convergence rates of linear rank statistics under alternatives	267
G. G. ROUSSAS, On some asymptotic results in statistics by way of contiguity	279
K. SARKADI, Testing for normality	281
J.-L. SOLER, Some results for the quadratic analysis of Gaussian processes and applications	289
E. SPJØTVOLL, A simple technique for proving unbiasedness of tests and confidence regions	303
J. N. SRIVASTAVA, Some basic results on search linear models with nuisance parameters . .	309
E. N. TORGERSEN, Deviations from total information and from total ignorance as measures of information	315
I. VINCZE, On the Cramér-Rao inequality and on a new version of the chi-square statistic	323
W. WINKLER, Sequential estimation in processes with independent increments	325
H. WOLD, Soft modelling: intermediate between traditional model building and data analysis	333
W. WOLF, Some remarks on large deviations for weighted sums if Cramér's condition is not satisfied	347
R. ZIELIŃSKI, Robustness: a quantitative approach	353
R. ZMYŚŁONY, Completeness for a family of normal distributions	355
V. M. ZOLOTAREV, Statistical estimates of the parameters of stable laws	359
