# TABLE OF CONTENTS

## I. INTRODUCTION

Page 1

## II. BASIC CONCEPTS AND FOUNDATIONS

1. Definitions

   1.1 Terms for MCDM Environment
   1.2 MCDM Solutions

2. Models for MADM

   2.1 Noncompensatory Model
   2.2 Compensatory Model

3. Transformation of Attributes

   3.1 Quantification of Fuzzy Attributes
   3.2 Normalization

4. Fuzzy Decision Rules

   4.1 Definition of Fuzzy Set
   4.2 Some Basic Operations of Fuzzy Sets

5. Methods for Assessing Weight

   5.1 Eigenvector Method
   5.2 Weighted Least Square Method
   5.3 Entropy Method
   5.4 LINMAP

## III. METHODS FOR MULTIPLE ATTRIBUTE DECISION MAKING

Page 58

1. Methods for No Preference Information Given

   1.1.1 Dominance
   1.1.2 Maximin
   1.1.3 Maximax
2. Methods for Information on Attribute Given

2.1 Methods for Standard Level of Attribute Given

2.1.1 Conjunctive Method (Satisficing Method)

2.1.2 Disjunctive Method

2.2 Methods for Ordinal Preference of Attribute Given

2.2.1 Lexicographic Method

2.2.2 Elimination By Aspects

2.2.3 Permutation Method

2.3 Methods for Cardinal Preference of Attribute Given

2.3.1 Linear Assignment Method

2.3.2 Simple Additive Weighting Method

2.3.3 Hierarchical Additive Weighting Method

2.3.4 ELECTRE Method

2.3.5 TOPSIS

2.4 Methods for Marginal Rate of Substitution of Attributes Given

2.4.1 Hierarchical Tradeoffs

3. Methods for Information on Alternative Given

3.1 Methods for Pairwise Preference Given

3.1.1 LINMAP

3.1.2 Interactive Simple Additive Weighting Method

3.2 Method for Pairwise Proximity Given

3.2.1 Multidimensional Scaling with Ideal Point

IV. APPLICATIONS

1. Commodity Selection

2. Facility Location (Siting) Selection

3. Personnel Selection
4. Project Selection
   4.1 Environmental Planning 198
   4.2 Land Use Planning 200
   4.3 R & D Project 201
   4.4 Water Resources Planning 202
   4.5 Miscellaneous 202

5. Public Facility Selection 204

V. CONCLUDING REMARKS 207
   On MADM Methods Classification 207
   On Applications of MADM 207
   On Multiple Objective Decision Making (MODM) Methods 207
   On Multiattribute Utility Theory (MAUT) 208
   A Choice Rule for MADM Methods 210
   A Unified Approach to MADM 213
   On Future Study 222

VI. BIBLIOGRAPHY 226
   Books, Monographs, and Conference Proceedings 226
   Journal Articles, Technical Reports, and Theses 228
