

CONTENTS

PREFACE	3
CONTENTS	5
SCIENTIFIC PROGRAM	7
LIST OF PARTICIPANTS	11
A.A. Balkema – L. de Haan, Limit laws for order statistics	17
I. Berkes, On the asymptotic behaviour of $\sum f(n_k x)$	23
E. Csáki, Some notes on the law of the iterated logarithm for empirical distribution function	47
M. Csörgő – P. Révész, Some notes on the empirical distribution function and the quantile process	59
I.I. Ežov – T. Gergely, Law of large numbers for Markov chains homogeneous in time and in the second component	73
J. Fritz, Learning from an ergodic training sequence	79
P. Gaenssler, Around the Glivenko – Cantelli theorem	93
H. Heyer, Gauss distributions and central limit theorem for locally compact groups	105
J. Klasa, Limit problems on topological stochastic groups and Bohr compactification	135
J. Komlós – P. Major – G. Tusnády, Weak convergence and embedding	149
V.S. Koroljuk – A.F. Turbin, The method of perturbation on the spectrum of linear operators in asymptotic problems of probability theory	167
T. Nemetz, Equivalence-orthogonality dichotomies of probability measures	183
M.B. Nevel'son, On some asymptotical properties of recursive estimates	193
M.B. Nevel'son, On the properties of the recursive estimates for a functional of an unknown distribution function	227
H. Oodaira, Some functional laws of the iterated logarithm for dependent random variables	253

W. Philipp – W.F. Stout , Asymptotic fluctuation behavior of sums of weakly dependent random variables	273
R.-D. Reiss , The asymptotic normality and asymptotic expansions for the joint distribution of several order statistics	297
K. Sarkadi , On the convergence of the expectation of the sample quantile	341
Domokos Szász , Shocks in a two component paralleled system ...	347
Domokos Szász , Some results and problems in the limit theory of random sums (independent case)	351
G.J. Székely , On the polynomials of independent random variables	365
A. Szép , S_p -systems and their generalizations	373
S. Takahashi , Probability limit theorems for trigonometric series ..	381
N. Veraverbeke – J.L. Teugels , Regular speed of convergence for the maximum of a random walk	399
H. Walk , An invariance principle for a non-randomized thinning of a renewal process	407
