

C O N T E N T S

List of contributors	9
A.S. CARASSO	
A stable marching scheme for an ill-posed initial value problem	11
G. CHAVENT	
Stability of parameters estimated by the output least square method	37
D. COLTON and A. KIRSCH	
Analytical and numerical methods in the study of the inverse scattering problem for acoustic waves	47
D. COLTON and R. REEMTSEN	
A numerical method for solving the inverse Stefan problem in two spaces variables	57
A.R. DAVIES	
On a constrained Fourier extrapolation method for numerical deconvolution	65
H.W. ENGL	
On the convergence of regularization methods for ill-posed linear operator equations	81
C.W. GROETSCH	
Comments on Morozov's discrepancy principle	97

M. HILPERT	
Reconstruction of a free boundary	105
G.C. HSIAO	
The finite element method for a class of improperly posed integral equations	117
V. JANOVSKY, I. MAREK, J. NEUBERG	
Maxwell's equations with incident waves as a field source	133
P. JOCHUM	
The identification of kinetical parameters in medical receptor analysis .	149
P. KNABNER	
Regularizing the Cauchy problem for the heat equation by sign restrictions	155
J.T. MARTI	
Numerical solution of Fujita's equation	179
F. NATTERER	
On the order of regularization methods	189
L. RUBINSTEIN	
Free boundary problem for a non-linear system of parabolic equations, including one wth reversed time	205
E. SCHOCK	
Regularisierungsverfahren für Gleichungen erster Art mit positiv definiten Operatoren	227
A.N. TIKHONOV	
Ueber mathematische Methoden der Beobachtungsverarbeitung	237
Problem session	257
