Contents

Preface xiii

BASIC THEORY AND APPLICATION TO ELLIPTIC PROBLEMS

1 Feedback, Adaptivity, and a posteriori Estimates in Finite Elements: Aims, Theory, and Experience 3
   I. Babuška

2 Adaptive Refinement, Error Estimates, Multigrid Solution, and Hierarchic Finite Element Method Concepts. 25
   O. C. Zienkiewicz and Alan Craig

3 Estimation and Control of Error Based on p Convergence 61
   Barna A. Szabo

4 Adaptivity and Accuracy Estimation for Finite Element and Boundary Integral Element Methods 79
   Ernst Rank

5 Discretization and Modelling Errors in Thick Plate Analysis: An Adaptive Approach 95
   Jorge Paulo de S. R. Gago and Pedro Borges Dinis

6 Adaptive Macroelements Using Sinusoidal Shape Functions 113
   E. R. de Arantes e Oliviera, Jorge Paulo de S. R. Gago, and J. dos Santos Rebelo

7 Analysis of a Local a posteriori Error Estimate for Elliptic Equations 119
   Randolph E. Bank

8 The Self-equilibration of Residuals and ‘Upper-bound’ Error Estimates for the Finite Element Method 129
   D. W. Kelly

9 Methods of Convergence Acceleration by Uniform and Adaptive Refining and Coarsening of Finite Element Meshes, with Application to Contact Problems 147
   E. Stein, D. Bischof, G. Brand, and L. Plank
10 Error Estimations and Adaptive Techniques for Non-Linear Parametrized Equations 163
   Werner C. Rheinboldt
11 Accuracy of Elastoplastic and Dynamic Analysis 181
   P. Ladeveze, G. Coffignal, and J. P. Pelle
12 Adaptive Finite Element Analysis and CAD 205
   Mark S. Shephard
13 The Application of Adaptive Mesh Refinement to Shape Optimization of Plate Structures 227
   M. E. Botkin and J. A. Bennett

FLUID MECHANICS AND TRANSIENT PROBLEMS

14 Adaptive Methods for Problems in Solid and Fluid Mechanics 249
   J. T. Oden, L. Demkowicz, T. Strouboulis, and P. Devloo
15 Adaptive Grid Refinement for the Compressible Euler Equations. 281
   R. Löhner, K. Morgan, and O. C. Zienkiewicz
16 Adaptive Mesh Refinements in Large-Scale Fluid Flow Simulation 299
   Richard E. Ewing
17 Adaptive Grids in Petrov–Galerkin Computations 315
   A. R. Mitchell and B. M. Herbst
18 Recent Results on Finite Element Methods with Moving Nodes 325
   Keith Miller
   Michael Bietermann, Joseph E. Flaherty, and Peter K. Moore
20 Adaptive Finite Element Refinement and Fully Irregular and Conforming Triangulations 359
   Maria-Cecilia Rivara
21 Self-Qualification of Finite Element Predictions of Resonances 371
   Robert J. Melosh
