CONTENTS

CHAPTER 0. INTRODUCTION.  

CHAPTER 1. ANALYSIS OF THE BASIC MODEL WITH BACKORDERING OF EXCESS DEMAND.  
  1.1. The model and preliminaries.  
  1.2. The service measures.  
  1.3. Expressions for \( p(x,u) \), \( E[U(x)] \) and \( t_1(x) \).  
  1.4. Expressions for \( t_2(x) \), \( q(x) \), \( b(x) \) and \( c(x) \).  
  1.5. Numerical results and conclusions.  

CHAPTER 2. THE LOST-SALES MODEL.  
  2.1. Description of the model and service measures.  
  2.2. Expressions for \( t_1(x) \) and \( p(x,u) \).  
  2.3. Expressions for \( t_2(x) \), \( b(x) \) and \( q(x) \).  
  2.4. Numerical results and conclusions.  

CHAPTER 3. THE SINGLE PRODUCT PRODUCTION–INVENTORY MODEL WITH MIXED BACKLOGGING AND PARTIAL LOST-SALES.  
  3.1. Model and service measures.  
  3.2. The key relations.  

CHAPTER 4. THE SINGLE PRODUCT PRODUCTION–INVENTORY MODEL IN WHICH EXCESS DEMAND IS EITHER BACKLOGGED OR COMPLETELY LOST.  
  4.1. Model and preliminaries.  
  4.2. The key relations.  

CHAPTER 5. APPROXIMATIONS FOR THE AVERAGE HOLDING AND SWITCHING COSTS; THE OPTIMAL PRODUCTION QUANTITY.  
  5.1. General results for the holding cost per cycle.  
  5.2. The function \( k_1(x) \) for \( \pi_1=0 \).  
  5.3. The function \( k_1(x) \) for \( \pi_1 \neq 0 \).  
  5.4. The function \( k_2(x) \).  
  5.5. The average holding and switching costs per unit time and insensitivity results for M-m.  
  5.6. Numerical results and conclusions.
CHAPTER 6. A PRODUCTION-INVENTORY MODEL WITH POSITIVE SETUP TIME.  
6.1. Model and service measures.  
6.2. Approximations for $F_\xi(x)$ and $F_\eta(x)$.  
6.3. The basic functions associated with setup time $T$.  
6.4. Average holding and setup costs.  
6.5. Numerical results and conclusions.  

CHAPTER 7. A DAM PROBLEM WITH VARIABLE RELEASE RATE.  
7.1. The model.  
7.2. The service measures.  
7.3. Approximations for $t_2(x)$, $\phi(x)$ and $n_u(x)$.  
7.4. Approximations for $t_1(x)$, $t_E(x)$ and $p(x,u)$.  
7.5. The average content of the dam.  
7.6. Numerical results and conclusions.  

APPENDIX A. SOME RESULTS FOR A RANDOM WALK INDUCED BY A DISTRIBUTION FUNCTION WITH AN EXPONENTIAL TAIL.
