

CONTENTS

| | | |
|--------------|---|------------|
| ONE | Review and Preparation for the Study of Calculus | 1 |
| | 1.1 The Arrest of a Seventeenth Century Nonconformist and the Development of Analytic Geometry | 2 |
| | 1.2 Rebellion at the University and the Formalization of the Calculus | 3 |
| | 1.3 The Power of the Calculus and the Rationale for its Study | 4 |
| | 1.4 The Set of Real Numbers—Review of Basic Ideas Order Relationships | 6 |
| | 1.5 Rectangular Coordinate System and Graphing The Distance between Two Points | 10 |
| | 1.6 Slope; Straight Line Linear Demand and Supply Equations, Equilibrium Point; Break-even Point | 20 |
| | 1.7 Functions Cost, Revenue, and Profit Functions | 37 |
| | 1.8 Inequalities Linear Programming (Optional) | 50 |
| | 1.9 Forming Algebraic Functions | 59 |
| | 1.10 Chapter Review | 64 |
| TWO | Limits, Derivatives, and Continuity | 71 |
| | 2.1 Overview of Chapter | 72 |
| | 2.2 Increment Notation and Average Rate of Change | 72 |
| | 2.3 Limit of a Function The Limit Theorems | 84 |
| | 2.4 Additional Limits | 93 |
| | 2.5 Continuous Functions | 97 |
| | 2.6 Tangent Line to a Curve and the Derivative | 107 |
| | 2.7 Chapter Review | 118 |
| THREE | Differentiation Techniques | 123 |
| | 3.1 Techniques of Differentiation | 124 |
| | 3.2 The Chain Rule | 136 |
| | 3.3 Higher Order Derivatives | 144 |
| | 3.4 Implicit Differentiation | 146 |
| | 3.5 When May the Values of a Function Change Sign? | 153 |
| | 3.6 The Mean Value Theorem for Derivatives (Optional) | 155 |
| | 3.7 Chapter Review | 159 |
| FOUR | Applications of the Derivative | 163 |
| | 4.1 Overview of Chapter | 164 |
| | 4.2 Increasing and Decreasing Functions | 164 |
| | 4.3 Relative Extrema—Relative Maximum and Relative Minimum | 173 |
| | 4.4 Absolute Extrema—Absolute Maximum and Absolute Minimum | 179 |

| | | |
|--------------|---|------------|
| 4.5 | Information from the Second Derivative—Concavity and Point of Inflection | 185 |
| 4.6 | Second Test for Relative Maxima and Relative Minima | 190 |
| 4.7 | The Use of Maximum, Minimum, and Points of Inflection in Graphing | 192 |
| 4.8 | Applied Extrema Problems | 196 |
| 4.9 | The Differential | 211 |
| 4.10 | Chapter Review | 216 |
| FIVE | Integration | 225 |
| 5.1 | Introduction | 226 |
| 5.2 | Indefinite Integral | 226 |
| 5.3 | Areas by Summation, The Definite Integral | 234 |
| 5.4 | Why Dwell in Hell? Use the Fundamental Theorem of Integral Calculus | 246 |
| 5.5 | Proof of the Fundamental Theorem of Integral Calculus (Optional) | 252 |
| 5.6 | Applications of the Definite Integral | 261 |
| | The Area between Two Curves; Consumers' Surplus, Producers' Surplus; Probability of a Continuous Frequency Function (Optional) | |
| 5.7 | Further Techniques of Integration | 272 |
| | Integration by Substitution; Integration by Formula | |
| 5.8 | Simpson's Rule (Optional) | 281 |
| 5.9 | Improper Integrals (Optional) | 282 |
| 5.10 | Chapter Review | 287 |
| SIX | The Logarithmic and Exponential Functions; Review of the Great Ideas of the Calculus | 293 |
| 6.1 | Introduction | 294 |
| | The Number e ; A Brief Review of the Properties of Exponents; A Brief Review of Properties of Logarithms | |
| 6.2 | The Natural Logarithm Function and its Derivative | 299 |
| 6.3 | The Exponential Function | 307 |
| 6.4 | Integrals that Yield Logarithmic and Exponential Functions | 315 |
| 6.5 | Integration by Parts | 318 |
| 6.6 | Differential Equations | 323 |
| 6.7 | Growth and Decay Curves | 326 |
| 6.8 | A Population Model (Optional) | 329 |
| 6.9 | Chapter Review | 337 |
| SEVEN | Partial Derivatives and Multiple Integrals | 341 |
| 7.1 | Introduction | 342 |
| 7.2 | The Three-Dimensional Coordinate System | 342 |
| 7.3 | Definitions of Function and Limit in E^3 Space | 343 |
| 7.4 | Graphing in E^3 Space | 345 |
| 7.5 | Partial Derivatives and Their Geometric Interpretation | 351 |
| 7.6 | Higher Order Partial Derivatives | 354 |
| 7.7 | Relative Extrema in E^3 Space | 358 |
| | The M-Test for Relative Extrema | |
| 7.8 | Relative Extrema with Constraints, Lagrangian Multipliers | 365 |

| | | |
|----------|---|------------|
| 7.9 | Multiple Integrals | 369 |
| 7.10 | Chapter Review | 374 |
| APPENDIX | | 379 |
| I. | Review of Basic Mathematical Skills Factoring; Operations on Algebraic Fractions; Solutions of Equations; Exponents, Radicals, and Logarithms | 380 |
| II. | Limits | 388 |
| III. | Proofs of Differentiation Theorems Power Rule; Product Rule; Quotient Rule | 394 |
| IV. | The Trigonometric Functions Derivative and Integration of the Trigonometric Functions | 399 |
| V. | Sequences and Series | 418 |
| VI. | Taylor's Theorem | 424 |
| | Table of Exponentials and Natural Logarithms | 427 |
| | Answers to Selected Problems | 429 |
| | Index | 469 |
