Introduction xv

I RAYS AND BODY WAVES IN ONE-DIMENSIONAL MEDIA

I.1 Spectral Synthesis of Body Waves in Earth Models Specified by Vertically Varying Layers 3

VERNON F. CORMIER and PAUL G. RICHARDS

1 Introduction 3
2 Example body-wave problem 5
3 Synthesis of seismograms 15
4 Extensions and special applications 31
5 Conclusions 41
   Acknowledgements 43
   References 43

I.2 The WKBJ Seismogram Algorithm 47

C. H. CHAPMAN, CHU JEN-YI and D. G. LYNNESS

1 Introduction 47
2 WKBJ seismogram theory 49
3 Description of subroutines 57
4 Conclusions 69
   Acknowledgements 69
   Appendix: WKBJ seismograms with attenuation 69
   References 73
I.3 Asphericity and Ellipticity Corrections 75
D. J. DOORNBOS

1 Introduction 75
2 Velocity models 76
3 Ray-tracing algorithm 77
4 Spherical harmonics in rotated coordinates 79
5 Ellipticity corrections 81
6 A test case: the core–mantle boundary 82
References 85

II RAYS AND BODY WAVES IN THREE-DIMENSIONAL MEDIA

II.1 Complete Seismic Ray Tracing in Three-Dimensional Structures 89
V. ČERVENÝ, L. KLIMEŠ and I. PŠENČÍK

1 Introduction 89
2 Coordinate system 92
3 Model of the medium 94
4 Codes for elementary waves 105
5 Complete ray tracing 106
6 Initial points of rays 140
7 Applications and processing of the results of complete ray tracing 143
References 167

II.2 Numerical Methods for Tracing Rays and Wavefronts 169
ANDRZEJ HANYGA

1 Basic assumptions and methods 169
2 Initial-value ray tracing 176
3 Two-point ray tracing 180
4 Dynamic ray tracing 195
5 Computation of body-wave pulses 213
Acknowledgements 217
Appendices 218
References 231

III REFLECTIVITY METHODS FOR STRATIFIED MEDIA

III.1 Systematic Approximations to the Seismic Wavefield 237
B. L. N. KENNETT

1 Introduction 237
2 Reflection and transmission of seismic waves 239
3 Response of a medium to a source 243
4 Split stratification 244
5 The construction of approximations to the response 247
6 Examples of approximations 252
   Appendix: Recursive approach for a stack of uniform layers 256
   References 258

III.2 Hybrid Methods in Reflectivity Calculations 261
   URI ASCHER
   1 Introduction 261
   2 Methods for solving two-point problems 264
   3 A hybrid method 271
   4 An example 273
      References 276

III.3 Quadrature of Wavenumber Integrals 279
   L. NEIL FRAZER
   1 Introduction 279
   2 Trapezoidal Filon 280
   3 Alternative methods 286
      Acknowledgements 288
      References 288

IV MODE METHODS FOR STRATIFIED MEDIA 293

IV.1 Disper80: A Subroutine Package for the Calculation of Seismic
      Normal-Mode Solutions 293
      MASANORI SAITO
      1 Introduction 293
      2 Transversely isotropic Earth model 293
      3 Methods of integration and specification of the model 294
      4 Torsional oscillations 296
      5 Spheroidal oscillations of a non-gravitating Earth 300
      6 Spheroidal oscillations of a self-gravitating Earth 307
      7 Love waves and Rayleigh waves 317
       Acknowledgements 319
       References 319

IV.2 The Calculation of Eigenfrequencies and Eigenfunctions of the
      Free Oscillations of the Earth and the Sun 321
      J. H. WOODHOUSE
      1 Introduction 321
      2 The algebra of minors 326
3 Linear transformations of vector subspaces 337
4 Linear systems of ordinary differential equations 343
5 The differential-equations governing the Earth's free oscillations 354
6 Description of program 367
   Acknowledgements 370
   References 370

IV.3 Variational Methods 371
RAY BULAND

1 Rayleigh's Principle 371
2 The Rayleigh–Ritz algorithm 372
3 Natural basis functions 377
4 Finite-element basis functions 381
5 Frequency-dependent problems 393
6 Instabilities 394
7 Natural basis functions revisited 395
8 Comparison with other methods 395
9 Closing remarks 398
   References 398

V UTILITY ALGORITHMS AND SOURCES 403

V.1 Vector and Matrix Manipulation Algorithms 403
GARY L. PAVLIS

1 Introduction 403
2 Basic vector operations 404
3 Manipulation of non-sparse matrices 407
4 Sparse-matrix inversion algorithms 420
   Acknowledgements 424
   References 424

V.2 Radiation from a Moment-Tensor Source 427
B. L. N. KENNETT

1 Introduction 427
2 Point sources 428
3 Body-wave radiation patterns 431
4 Surface-wave radiation patterns 437
   Appendix: Principal values of the moment tensor 439
   References 440
### V.3 Single and Joint Fault-Plane Solutions from First-Motion Data

A. UDÍAS and E. BUFORM

1. Introduction 443
2. Geometry of the problem 443
3. Probability model and likelihood function 445
4. Joint solutions 449
5. Computer programs 452
   Acknowledgements 453
   References 453
