Mischa Cotlar: A Biography	xv
Introduction of Professor Mischa Cotlar to the National Academy of Exact Sciences of Argentina	xix
<i>Alberto P. Calderón</i>	
Mischa in Montevideo	xxi
<i>José Luis Massera</i>	
My Friend Mischa Cotlar	xxv
<i>Manuel Sadosky</i>	
<b>Part I: Harmonic and Complex Analysis</b>	
1. Summability Methods for Transferring Fourier Multipliers and Transference of Maximal Inequalities	1
<i>N. Asmar, E. Berkson, and T. A. Gillespie</i>	
2. The Three Squares Theorem, A Local Version	35
<i>C. A. Berenstein, R. Gay and A. Yger</i>	

3.	An Application of Ricci-Stein Theorem to Estimates of the C-R Equations <i>D.-C. Chang</i>	51
4.	Real-Analytic Operator-Valued Functions Defined in BMO <i>R. R. Coifman and S. Semmes</i>	85
5.	Strong $A_\infty$ Weights, Sobolev Inequalities and Quasiconformal Mappings <i>G. David and S. Semmes</i>	101
6.	Some Remarks on Harmonic Analysis and Elliptic Partial Differential Equations <i>R. Fefferman</i>	113
7.	Singular Value Estimates for Commutators and Hankel Operators on the Unit Ball and the Heisenberg Group <i>M. Feldman and R. Rochberg</i>	121
8.	General Endpoint Results in Extrapolation <i>J. García-Cuerva</i>	161
9.	Fractional Integrals on Spaces of Homogeneous Type <i>A. E. Gatto and S. Vági</i>	171
10.	Large Analytic Functions, II <i>H. Helson</i>	217
11.	Reiteration Phenomena in the Complex Method of Interpolation <i>P. W. Jones</i>	221
12.	Produits de Riesz et Séries de Dirichlet <i>J.-P. Kahane</i>	231
13.	A Note on Commutation Properties for Interpolation Spaces <i>M. Milman and T. Schonbek</i>	239
14.	Harmonic Analysis and Fundamental Solutions on Nilpotent Lie Groups <i>A. Nagel, F. Ricci, and E. M. Stein</i>	249

15.	Tangential and Approximate Free Interpolation <i>N. K. Nikolskii and A. L. Volberg</i>	277
16.	The Fock Bundle <i>J. Peetre</i>	301
17.	A Local Version of a Theorem of Khinchin <i>Y. Sagher and K. Zhou</i>	327
18.	Extrapolation for Pairs of Related Weights <i>C. Segovia and J. L. Torrea</i>	331
19.	A Simple Example of Transference <i>F. Soria, G. Weiss, and A. Založník</i>	347

**Part II: Functional Analysis and Operator Theory**

20.	Schur Analysis of a Class of Translation Invariant Forms <i>R. Arocena</i>	355
21.	Two-sided Nudelman Interpolation Problem for Rational Matrix Functions <i>J. Ball, I. Gohberg, and L. Rodman</i>	371
22.	A Metric Property of the Polar Decomposition of Projections <i>G. Corach, H. Porta, and L. Recht</i>	417
23.	On Reproducing Kernels and the Continuous Covariance Extension Problem <i>H. Dym</i>	427
24.	On the Singular Values of the Four-Block Operator and Certain Generalized Interpolation Problems <i>C. Foias and A. Tannenbaum</i>	483
25.	Some Applications of K-theory and Ext-Theory to Joint Quasitriangularity <i>S. Gohkale and N. Salinas</i>	495
26.	Algebraic Operators and Invariant Linear Manifolds <i>D. A. Herrero</i>	515

27. A Characterization of Coanalytic Toeplitz Operators in the Cowen-Douglas Class <i>L. Qing and N. Salinas</i>	519
28. Hankel Operators in the Perturbation Theory of Unbounded Self-adjoint Operators <i>V. V. Peller</i>	529
29. Composition Operators as Integral Operators <i>D. Sarason</i>	545

### **Part III: Partial Differential Equations**

30. Uniform Estimates for Regularization of Free Boundary Problems <i>H. Berestycki, L. Caffarelli, and L. Nirenberg</i>	567
31. $L^p$ Estimates for the Three-dimensional Systems of Elastostatics on Lipschitz Domains <i>B. E. J. Dahlberg and C. E. Kenig</i>	621
32. Growth and Geometry of Eigenfunctions of the Laplacian <i>H. Donnelly and C. Fefferman</i>	635
33. Trying to Beat Heisenberg <i>F. A. Grünbaum</i>	657
34. Smoothing Properties of Solutions to the Benjamin-Ono Equation <i>G. Ponce</i>	667

### **Part IV: The Mathematical Work of Mischa Cotlar**

Mathematical Publications of Mischa Cotlar	681
The Early Papers of Mischa Cotlar (1936–1955) <i>John Horváth</i>	689
The Mathematical Contributions of Mischa Cotlar Since 1955 <i>Cora Sadosky</i>	715
