

# CONTENTS

<b>Foreword</b>	<b>9</b>
<b>Acknowledgments</b>	<b>10</b>
<b>1. What Is a Standardized Survey Interview?</b>	<b>11</b>
The Nature of Survey Interviews	11
Sources of Error in Surveys	12
The Role of the Interviewer	13
Survey as Measurement: The Need for Standardization	13
A Comparison with Two Other Types of Interviews	16
When and When Not to Standardize in Social Research	18
About the Book: Approaches to Minimizing Interviewer-Related Error	21
<b>2. What Is Interviewer-Related Error?</b>	<b>24</b>
The Significance of Standardization	25
Detecting Interviewer-Related Error	30
Conclusion	32
<b>3. Standardized Interviewing Techniques</b>	<b>33</b>
Reading Questions as Worded	34
Probing Inadequate Answers	37
Recording Answers	46
Being Interpersonally Neutral	48
Training the Respondent	50
Conclusion	53
<b>4. Establishing the Context for Standardized Interviews</b>	<b>55</b>
Respondent Reasons for Participating in Surveys	56
The Interviewer-Respondent Relationship	63
Setting Standards for the Respondent	68
Conclusion	74
<b>5. The Role of Question Design in Standardized Interviewing</b>	<b>77</b>
Question Content	77
Question Form	80
The Question-and-Answer Process	80
Correlates of Probing	82
Specific Threats to Standardized Measurement	83

Designing Survey Instruments to Minimize Interviewer Effects	89
Strategies for Identifying Question Problems	92
Conclusion	94
<b>6. Interviewer Selection and Interviewer-Related Error</b>	<b>96</b>
Interviewer Characteristics and Performance	96
Interviewer Characteristics and the Context of the Interview	98
Interviewer-Respondent Relationships	101
Conclusion	104
<b>7. Training Interviewers</b>	<b>106</b>
Options for Training	106
A Study of the Value of Interviewer Training	108
Effect of Training on How Interviewers Were Oriented to Their Jobs	110
Interviewing Skills	113
Respondent Perceptions of Interviewers	114
Effect of Training on Data Quality	117
Conclusion	117
<b>8. Interviewer Supervision</b>	<b>120</b>
Information for Supervision	120
A Study of the Effect of Monitoring Interviewers	126
Interviewer Orientation to the Job	127
Effects of Tape Recording on Respondents	129
Effect of Monitoring on Interviewer Skills	130
Effects of Monitoring on Quality of Data	131
Conclusion	133
<b>9. How to Reduce Interviewer-Related Error in Surveys</b>	<b>136</b>
Question Design	136
Interviewing Procedures	138
The Relationship with the Respondent	138
Interviewer Selection	139
Interviewer Training	140
Supervision	141
Conclusion	142

<b>Index</b>	<b>149</b>
<b>About the Authors</b>	<b>151</b>

## TABLES

Table 1.1: Sources of Error in Surveys	14
Table 1.2: Comparison of Types of Interviews	18
Table 2.1: Components of Variance of Answers	26
Table 2.2: The Effect of Unreliability on Correlations	27
Table 2.3: Calculation of <i>Rho</i> and Design Effects	28
Table 2.4: Multipliers of Estimates of Standard Errors of Means (DEFTS) Due to Interviewer Effects for Selected Values of <i>Rho</i> and Average Interviewer Assignments	29
Table 3.1: Standardized Interviewing and Its Impediments	35
Table 3.2: Guidelines for Recording Answers for Different Types of Questions	47
Table 4.1: Measures of Respondent Information About the Health Interview Survey by Respondent Education	61
Table 4.2: Respondent Perceptions of Why People Would React Positively to an Interview	62
Table 4.3: Distribution of Respondent Reports of What Interviewer Was Most Like, Next Most Like, and Least Like	66
Table 4.4: Answers to Question 37: "Some people say they would rather an interviewer be businesslike—stick to her job—while some say they would rather the interviewer visit a little which would you like best?"	67
Table 4.5: Summary of Correlates of Reporting Quality Related to Standards for Performance	70
Table 4.6: Respondent Perception of Interview Standards by Interviewer Concern About Efficiency and Accuracy for High School Graduates Only	71
Table 4.7: Percent of Persons in Selected Response Categories by Experimental Interview Treatment	75
Table 5.1: Significant Correlations Between the Incidence of Specific Interviewer Behaviors and <i>Rho</i>	83
Table 5.2: Significant Correlations Between the Incidence of Specific Interviewer Behavior and Question Characteristics	83
Table 5.3: Adverbial Equivalents	91
Table 6.1: Selected Indicators of Interpersonal Attraction of Interviewer and Respondent by Education of Respondent	103
Table 6.2: Respondent Ratings of Interviewers by Interviewer Gender	105

Table 7.1:	Summary of Training Experiences by Length of Training (in minutes)	110
Table 7.2:	Proportion of Interviewers Saying Their Preparation Was "Less Than Needed" in Several Areas of Interviewer Skills by Length of Training Program	111
Table 7.3:	Selected Measures of Interviewer Behavior from Coding Taped Practice Interviews by Length of Training Program	113
Table 7.4:	Selected Measures of Interviewer Behavior from Coding Taped Interviews by Length of Training Program (supervision level III only)	115
Table 7.5:	Respondent Ratings by Length of Training Program	116
Table 8.1:	Monitoring Form	125
Table 8.2:	Interviewer Rankings of Importance of Various Goals to Center Staff by Level of Supervision	129
Table 8.3:	Selected Measures of Interviewer Behavior from Coding of Taped Interviews for First and Second Half of Interviewers' Assignment (all training groups, supervision level III only)	132
Table 8.4:	Rating of Two Interviewer Behaviors from Coding First and Second Half of Interviewers' Assignment by Training Program (supervision level III only)	133
Table 8.5:	Intraclass Correlations for All Items and Average Standard Scores (X:000) of Questions Judged Likely Subject to Systematic Bias by Level of Supervision	134
Table 9.1:	Five Ways to Decrease Standard Errors of Estimates	144
