

Contents

	Introduction, 1
§ 1	Some Examples, 3
§ 2	Reconstruction of dynamics for Hamiltonian systems, 19
§ 3	Reconstruction of dynamics for Lagrangian systems, 26
§ 4	Ehresmann connections and holonomy, 36
§ 5	Reconstruction phases, 42
§ 6	Averaging connections, 56
§ 7	Existence, uniqueness and curvature of the Hannay-Berry connections, 63
§ 8	The Hannay-Berry connection in the presence of additional symmetry, 69
§ 9	The Hannay-Berry connection on level sets of the momentum map, 74
§ 10	Case I: Bundles of symplectic manifolds with the canonical connection; integrable systems, 76
§ 11	Case II: Cartan connections; moving systems, 87
§ 12	The Cartan angles; the ball in the hoop and the Foucault pendulum, 92
§ 13	Induced connections on the tower of bundles, 98
§ 14	The Hannay-Berry connection for general systems, 104
	References, 107
