

## CONTENTS

Foreword .....	ix
Preface .....	xi
A remark on the topological entropy and invariant circles of an area preserving twistmap .....	1
<i>Sigurd B. Angenent</i>	
The concept of anti-integrability: Definition, theorems and applications to the standard map .....	7
<i>Serge J. Aubry</i>	
Hypersurfaces without selfintersections in the torus .....	55
<i>Victor Bangert</i>	
The rotation set as a dynamical invariant .....	73
<i>Philip Boyland</i>	
Birkhoff periodic orbits for small perturbations of completely integrable Hamiltonian systems with nondegenerate Hessian .....	87
<i>Weifeng Chen</i>	
Physical examples of linked twist maps with chaotic dynamics .....	95
<i>Victor J. Donnay</i>	
Ghost tori for monotone maps .....	119
<i>Christophe Golé</i>	
Poincaré's proof of Poincaré's last geometric theorem .....	135
<i>Christophe Golé and Glen R. Hall</i>	
Dynamics connected with indefinite normal torsion .....	153
<i>Michael R. Herman</i>	
Minimal orbits for small perturbations of completely integrable Hamiltonian systems .....	183
<i>A. Katok</i>
