Contents

Preface ix

1 Overview 1

Part I Policy Perspectives

2 Global 2100: A Model of CO₂-Energy-Economy Interactions 25

3 The Costs of Limiting U.S. CO₂ Emissions 45

4 Decision Making under Uncertainty 67

5 A Global Cost Analysis 89

6 Willingness to Pay for Carbon Emission Rights 111

Part II Model Structure

7 Global 2100: Model Formulation 119

8 A Decomposition Procedure for International Trade in Carbon Emission Rights 141

9 Estimating The Energy Conservation Parameters: An Experiment in Backcasting 151

Appendix A Macro Assumptions (MACRO.TAB) 163
Appendix B Electric Power Technologies (ELEC.TAB) 165
Appendix C  Nonelectric Energy Supplies (NELE.TAB)  169
Appendix D  International Oil Trade (OILTRADE.TAB)  173
Appendix E  Carbon Emissions (CARBON.TAB)  175

Index  179
