Contents

Introduction vii

Part 1: DEDS Behavior

A Comparison of the Dynamics of Continuous and Discrete Event Systems
X.-R. Cao (Proceedings of the IEEE, January 1989) 3

A GSMP Formalism for Discrete Event Systems
P. W. Glynn (Proceedings of the IEEE, January 1989) 11

Sample Path Properties of Timed Discrete Event Systems
C. G. Cassandras and S. G. Strickland (Proceedings of the IEEE, January 1989) 21

Part 2: Models for DEDS

DEVS Representation of Dynamical Systems: Event-Based Intelligent Control
B. P. Zeigler (Proceedings of the IEEE, January 1989) 37

The Control of Discrete Event Systems

Concurrency and Discrete Event Control
M. Heyman (IEEE Control Systems Magazine) 65

Algebraic Tools for Performance Evaluation in Discrete Event Systems

Algebras of Discrete Event Models
K. M. Inan and P. P. Varaiya (Proceedings of the IEEE, January 1989) 97

Synthesis of Feedback Control Logic for a Class of Controlled Petri-Nets

Part 3: Qualitative and Quantitative Performance Evaluation of DEDS

Second Order Stochastic Properties in Queueing Systems
J. G. Shanthikumar and D. D. Yao (Proceedings of the IEEE, January 1989) 127

Queueing Models for Systems with Synchronization Constraints
A. Makowski and F. Baccelli (Proceedings of the IEEE, January 1989) 136

Measurements and Approximations to Describe the Offered Traffic and Predict the Average Workload in a Single-Server Queue
K. W. Fendick and W. Whitt (Proceedings of the IEEE, January 1989) 159
Perturbation Analysis: The State of the Art and Research Issues Explained via the GI/G/1 Queue
R. Suri (Proceedings of the IEEE, January 1989)

A Taxonomy of PA Techniques
Y. C. Ho and S. Strickland

Variance Reduction for Likelihood Ratio Methods
B. Zhang and Y. C. Ho (IEEE Conference on Decision and Control, 1989)

Distributed Simulation of Discrete Event Systems

Part 4: Applications and the Real World

Distributed Routing for Load Balancing

Hierarchical Flow Control: A Framework for Scheduling and Planning Discrete Events in Manufacturing Systems
S. B. Gershwin (Proceedings of the IEEE, January 1989)

National Airspace System Demand and Capacity Model

Scheduling Jobs with Simple Precedence Constraints on Parallel Machines
