
Contents

Part 1 Curve Design

- 3 Chapter 1 Properties of Minimal-Energy Splines
Guido H. Brunnett
- 23 Chapter 2 Minimal-Energy Splines with Various End Constraints
Emery Jou and Weimin Han
- 41 Chapter 3 Interval Weighted Tau-Splines
Dieter Lasser and Hans Hagen
- 55 Chapter 4 Curve and Surface Interpolation Using Quintic Weighted Tau-Splines
David A. Neuser
- 87 Chapter 5 Weighted Splines Based on Piecewise Polynomial Weight Functions
L. Bos and K. Šalkauskas
- 99 Chapter 6 Algorithms for Geometric Spline Curves
Matthias Eck
- 123 Chapter 7 On the Problem of Determining the Distance Between Parametric Curves
Frederick N. Fritsch and Gregory M. Nielson

Part 2 Nontensor Product Surfaces

- 145 Chapter 8 A Survey of Parametric Scattered Data Fitting Using Triangular Interpolants
Stephen Mann, Charles Loop, Michael Lounsbery, David Meyers, James Painter, Tony DeRose, and Kenneth Sloan
- 173 Chapter 9 Free-Form Surfaces from Partial Differential Equations
M. I. G. Bloor and M. J. Wilson
- 191 Chapter 10 Modeling with Box Spline Surfaces
Morten Dæhlen
