Preface xiii

1 Rediscovering the social in the economics of interfirm relations
Gernot Grabher 1

Part I Understanding networks: actors, resources, and processes in interfirm cooperation 33

2 The network as a governance structure: interfirm cooperation beyond markets and hierarchies
Håkan Håkansson and Jan Johanson 35

3 Explaining interfirm cooperation and innovation: limits of the transaction-cost approach
Bengt-Åke Lundvall 52

Part II High-technology networks: horizontal interfirm cooperation and strategic alliances 65

4 Knowledge in the network and the network as knowledge: the structuring of new industries
Bruce Kogut, Weijian Shan, and Gordon Walker 67

5 Organizational perspectives of strategic alliances: external growth in the computer industry
Mario Benassi 95

6 Strategic technology alliances and modes of cooperation in high-technology industries
John Hagedoorn 116
Contents

Part III  Supplier networks: vertical interfirm cooperation and disaggregation of large firms

7 An exit–voice analysis of supplier relations: the case of the US automobile industry
   Susan Helper

8 Small firms and outsourcing as flexibility reservoirs of large firms
   Klaus Semlinger

9 Decentralization and privatization in Hungary: towards supplier networks?
   László Neumann

Part IV  Regional networks: multidimensional interfirm cooperation in industrial districts

10 Factory or putting-out? Knitting networks in Modena
   Mark Lazerson

11 Power and the redefinition of industrial districts: the case of Baden-Württemberg
   Gary B. Herrigel

Part V  Limits of networks: problems with embeddedness

12 The weakness of strong ties: the lock-in of regional development in the Ruhr area
   Gernot Grabher

13 The globalization of the economy: an erosion of regional networks?
   Ash Amin

Index
## Figures

| 2.1 Relations between actors and activities/resources | 36 |
| 2.2 Circular causal relation between exchange relation and activity interdependencies | 40 |
| 2.3 Classification of governance structures | 45 |
| 4.1 Alliance by US semiconductor start-ups | 87 |
| 4.2 Alliance by US biotechnology start-ups | 88 |
| 5.1 Joint-venture activities – parent–child relation | 98 |
| 5.2 Nonequity agreements by relevance degree | 99 |
| 5.3 Three levels of analysis | 103 |
| 6.1 Distribution of strategic technology alliances in core technologies, 1980–9 (in percentages) | 119 |
| 6.2 Growth in the number of newly established strategic technology alliances in core technologies and in total, 1980–9 | 121 |
| 6.3 Distribution of modes of strategic technology alliances in core technologies and in total, 1980–9 (in percentages) | 131 |
| 7.1 Dimensions of supplier relations | 146 |
| 7.2 Use of computer numerically controlled (CNC) machine tools | 148 |
| 12.1 Development of the machine-building and steel construction industries, 1970–85 (index of production output) | 258 |
| 12.2 Development of world crude steel production, 1945–85 | 262 |
| 12.3 Profile of suppliers of environmental technology in North Rhine-Westphalia | 270 |
Tables

4.1 Selected established companies’ alliance shares in the semiconductor industry (in percentages) 73
4.2 Variations in country networks 78
4.3 Sources of flexibility 82
4.4 Alliance type by semiconductor start-ups 86
4.5 Alliance type by biotechnology start-ups 86
5.1 Case studies 97
6.1 The companies with the largest number of strategic technology alliances, 1980–4 and 1985–9 125
6.2 The leading companies according to strategic technology alliances in information technologies, biotechnology, and new materials 126
6.3 A comparison of network density in core technologies (for the 45 firms with the most strategic technology relations) 127
6.4 The assumed relation between modes of strategic technology alliances and their strategic content 128
6.5 A classification of modes of strategic technology alliances and their organizational interdependence 129
6.6 The growth of different modes of strategic technology alliances, 1985–9 (1980–4 = 1.00) 130
10.1 Number of knitwear firms in the province of Modena by number of employees and principal phases of production 207
10.2 Twenty-year change in distribution of Modena firms by workforce size 209
10.3 Typical sequence in knitwear production 210
12.1 Shares of central divisions in total sales of the five most important steel enterprises in western Germany (in percentages) 267
12.2 Structure of orders in plant engineering (shares in total volume of orders) 271
